

EXPANDED HUMAN RESOURCE DEVELOPMENT PROGRAM

EHRDP Terminal Report

EXECUTIVE SUMMARY

PROJECT TITLE: EXPANDED HUMAN RESOURCE DEVELOPMENT PROGRAM (EHRDP)

PROPOSER: Agricultural Training Institute

PROJECT COST : P500 Million

DURATION : Five (5) Years

The Expanded Human Resource Development Program (EHRDP) was approved in Year 1999 with funding under the US PL 480 Food for Peace Program for the Year 2000 to 2004 and extended to Year 2008 to 2011 (extended to 2014).

The EHRDP aimed to help address an urgent need for the agriculture and fisheries sectors develop its human resource base specified in Republic Act 8435, known as the Agriculture and Fisheries Modernization Act (AFMA).

The EHRDP sought to improve the Philippines' capability to modernize the scientific and technological capability of deserving and qualified technical, scientific, professional and academic workers, and extension workers working in agriculture and fisheries. It offers a program of continuing education and expands existing scholarship programs for degree and non-degree courses in national and international institutions.

The Agricultural Training Institute (ATI) is mandated to develop and administer a national human resource development program for degree and non-degree trainings for DA, LGU and other personnel in agriculture and fisheries sectors.

The first funding for Year 2000 was P105.448 Million for the 267 Masteral Degree scholars to five (5) Universities for the Year 2000-2006. The second funding for the Year 2008 was P110.053 Million which were utilized for Masteral and Doctoral Degree, financial assistance for the completion of Thesis and Dissertaion, financial support to book publication, local and international non-degree courses, and Observation Tours on Good Agricultural Practices in Organic Agriculture.

The National Agricultural and Fishery Council (NAFC) in support of and realizing the significance of the project in developing the human resource of the agriculture and fisheries sectors, provided financial assistance for the implementation for the last three (3) years of the EHRDP.

The coordination of the Project was transferred from DA-OSEC to NAFC by virtue of Administrative Order No. 16, dated 20 May 2008 issued by the Secretary of Agriculture,

Arthur C. Yap, which gives authority to NAFC to manage the PL 480 Program, and release the remaining funds for the scheduled activities.

Funding for the EHRDP CY 2009-2011 until its extension period of 2014 amounting to P284.498 Million was sourced from the proceeds of PL 480 Title I Program. These amount were utilized for the Masteral and Doctoral Degree, financial assistance for the completion of Thesis and Dissertation; financial support to book publications, conduct of policy studies, participation in non-degree courses locally and in USA, and participation to Observation Tours on Organic Agriculture.

The Table below shows the EHRDP Targets and Accomplishments from Year 2000-2013.

PPA	Total Target	Total Accomplishments
Masteral Degree Scholars: -Year 2000-2006 -Year 2008-2013	267 555	267 (100%) 555 (100%)
Doctoral Degree Scholars	136	136 (100%)
Non-degree courses (Local) Non-degree courses (in USA) Observation Tour	2,072 64 100	1,542 (74%) 81 (126%) 106 (106%)
Study Grants (No.): -Dissertation Assistance -Thesis Assistance -Book Publication -Policy Study	65 90 6 2	62 (95%) 68 (76%) 6 (100%) 2 (100%)

It is worthy to note that the DA as mandated in AFMA has the responsibility of providing its personnel equal opportunities for training, education, and career development on a continuing basis. Investment in human resource through capability building and education support will enable them to acquire desirable wisdom, knowledge, and skills to face modern development challenges. Along this line, it is highly recommended that the EHRDP be extended and revitalized to provide formal and non-formal capability building to DA personnel, LGUs, SUCs, and other partner institutions.

Revitalization of the EHRDP should be enhanced and tailored to respond to the needs of the agriculture sector. Moreover, allowances and benefits should be increased to make EHRDP competitive to scholarship programs offered by other institutions and intensification of program communication should be done to encourage applicants to the program.

The EHRDP enhanced the capability of the scholars in their job performance. Implementation of the program through the ATI Network of Training Centers expedited the process of flow of the program. Also, issue and concerns were addressed faster and easier. Overall, the EHRDP contributed in the goal of achieving sustainable development in the Philippines by addressing the need of human resource development in the agriculture and fisheries sector.

I. PROJECT BACKGROUND

The Agriculture and Fisheries Modernization Act (AFMA) of 1997 spells out an urgent need for the implementation of a Human Resource Development Program in the agriculture and fisheries sectors. As the sectors are challenged by international competition and globalization, the development of scientific and technological capabilities of its manpower is indispensable in realizing the vision of AFMA.

The Department of Agriculture (DA) as mandated in AFMA shall have the responsibility of providing its personnel equal opportunities for training, education and career development on a continuing basis consistent with the overall framework of AFMA. To carry this out, the Agricultural Training Institute (ATI), National Agricultural and Fishery Council (NAFC), and Human Resource Development Division (HRDD) developed the proposal on the Expanded Human Resource Development Program (EHRDP). It was approved in November 1999. Funding of this program comes from the proceeds of the US Public Law 480 (US PL 480) Title 1 and Section 416B.

The US PL 480 Title 1 is a concessional sales program to promote exports of the United States agricultural commodities and foster broad-based sustainable development. In the Philippines, commodities are sold by the DA's NAFC, and the proceeds are spent on projects to assist agriculture and fisheries.

The EHRDP is intended for scholarships and trainings to develop technical, scientific, professionals, and academic workers to meet the challenges and requirements of a modernized agriculture and fisheries sector in the Philippines. The EHRDP was developed along the DA's mandate of providing quality education and training in science and technology to promote the total development of its human resources for greater service to the nation. In 2000, the ATI as the extension arm of the DA started the implementation of the EHRDP. It is a five-year program that was to end in 2004. The releases of funds were extended, likewise its implementation until 2013. The total EHRDP cost for a five-year implementation is P500 M.

II. OBJECTIVES OF THE PROGRAM

The EHRDP has the following objectives:

1. Offer a program of continuing education for the DA, SUCs and LGU staff and extension workers;
2. Expand existing program of scholarship for degree and non-degree trainings in national and international institutions for deserving technical, administrative, academic, scientific staff and extension workers, and practitioners in agriculture and fisheries; and

3. Scholarship for degree and non-degree trainings in agriculture and fisheries for capable and deserving youths, particularly the children of smallholders, in order to support their studies, services and professional careers in agriculture and fisheries.

III. PROJECT DESCRIPTION

A. General Description, Features and Expected Outputs of the Program

The EHRDP offers a program thru the national and international institutions which sought to improve the Philippines' capability to modernize the deserving technical and academic personnel, and extension workers in agriculture and fisheries. It also aims to upgrade their technical knowledge and skills as well as values re-orientation to broaden the professional experiences in areas related to their field unit of specialization. The program has two components, namely, Provision of Scholarship Programs and Monitoring and Evaluation.

1. Provision of Scholarship Programs

Degree Courses

Baccalaureate Degree - This aims to award indigent but deserving students specifically the sons and daughters of smallholder farmers to encourage them to enroll in agri-related fishery course. A Memorandum of Agreement (MOA) was forged with the Aurora State College for this.

Expected output: 28 bachelor's degree holders

Master's Degree - This is designed to provide advanced education to sharpen and broaden the professional competence on one's field of specialization.

In Year 2000-2006, Memoranda of Agreement (MOA) were forged with the following universities to offer the following programs:

1. The Ateneo School of Government (ASoG) for the degree in Master in Public Management focused on Rural and Agricultural Development (MPM-RAD). By the end of the program, the scholars are expected to prepare to achieve the broader goals of transforming communities and building the nation through ethical leadership and good governance in the public service.
2. The University of Asia and the Pacific (UAP) for the degree in Master Program in Food Systems Management (FSM). This program aims to develop high caliber managers and analysts who will help initiate and/or catalyze changes in the agri-food sector and meet the challenges of globalization.
3. The Xavier University-Ateneo de Cagayan for a degree in Master in Public Management (MPM). The course is meant to develop leaders who will use

the necessary tools to adopt a multi-disciplinary approach to implement policy strategies.

4. D. The University of the Philippines-Visayas for Master of Management (MM) program. The program is designed for career professionals and entrepreneurs to enhance their competitive edge in organizational management, policy development and program implementation in their various fields of specialization and endeavor.
5. E. The University of the Philippines-Diliman (UPD) for a degree in Master in Development Economics (MdevEcon). This program gives priority admission to middle-level technical and professional personnel from tranches of government service whose current or future work involves development planning, policy analysis, applied economic research or project development.

Expected output: 267 bachelor's degree holders

In Years 2008-2013, selected state universities and colleges (SUCs) nationwide which offers agriculture and fishery related courses nationwide, forged a MOA with ATI.

Expected output: 555 bachelor's degree holders

Doctoral Degree - The DA aims to develop high caliber manpower or potential leaders in their respective field of studies and institutions. This is awarded to master's degree holders with high leadership potentials and achievements in areas of specialization in agri-fishery related courses. Like the master's degree, this is offered in selected SUCs.

Expected output: 136 bachelor's degree holders

Non-Degree Courses

International non-degree courses - these are short-term training courses mainly obtained in the United States of America (USA), like the experience-based learning visits, fellowships, short training course on any agriculture and fishery-related subjects as well as attendance to symposia, conferences, and research presentations.

Expected output: 64 participants

Local non-degree training courses - these are short-term training courses on social technology specifically for the middle level managers of the local government units (LGUs), SUCs and from the DA. These also include experience-based learning visits to organic farms or those with the latest package of technology on good agricultural practices (GAP).

Expected output: 2,072 participants

Grants

Thesis and Dissertation support - this program provides financial assistance to ongoing students of master's and doctorate degree programs.

Expected output: 90 Grantees of Thesis support for masteral students
65 Grantees of Dissertation support

Book Publication - this program gives financial assistance for book publications in support to agriculture and fishery extension.

Expected output: 6 Book Publications

Policy Studies - the program funds policy studies in support to agriculture and fishery extension

Expected output: 2 Grantees of Policy Studies

Observation Tours - EHRDP funds observation tours to organic or GAP accredited farms to learn, observe and to have learning and insights.

Expected output: 100 Observation Tours

Table 1 shows the total targets of the EHRDP.

Table 1. EHRDP Targets for Years 2000-2013

PROGRAM	INDICATOR	TARGETS
Year 2000-2006		
Degree Courses - Baccalaureate degree - Master's degree	No. of scholars No. of scholars	28 267
Year 2008-2013		
Degree Courses - Master's degree - Doctoral degree	No. of scholars No. of scholars	555 136

- Dissertation assistance - Thesis assistance - Book Publication - Policy Studies - Observation Tours	No. of grantees No. of grantees No. of book publications funded No. of policy studies funded No. of observation tours funded	65 90 6 2 100

B. Strategies: Recruitment, Selection and Placement

During the first years (2000-2007) of the implementation of the EHRDP, the ATI was the implementer and served as Secretariat of the program. The initial screening and nomination of applicants were carried out by the Institute, while the approval passed through the Scholarship Committee. This Committee was chaired by the Undersecretary of the Policy and Planning, the ATI Director as Vice Chair, the National Agriculture and Fishery Council (NAFC), Bureau of Agricultural Research (BAR) and the Department of Agriculture's Policy and Planning Service as members. Funding support were all transferred to the concerned universities thru a MOA. This included tuition and other miscellaneous fees and book allowance every semester, monthly stipend, relocation allowance of those scholars enrolled in the university outside their regional residence, and the university's management fees.

In 2008 to 2013, there was a change in the recruitment and placement of scholars. The ATI Capability Building Committee (ACBC) was created thru ATI Special Order No. 63 dated 07 April 2009. This committee was formed and accorded authority to approve applicants to the different scholarship program using the Scholarship Guidelines. The recruitment and selection process emanated from the network of the ATI training centers and forwarded to ATI central office (ATI-CO) for approval. The ATI – CO served as the national program coordinator.

2. Program Monitoring and Evaluation Activities

Monitoring activities shall include the conduct of mid and annual reviews every year. Likewise, monitoring activities in the regional level shall also be conducted. These shall include the conduct of forums to bridge the gap between the technology generators and the end-users. The scholar-graduates are given the chance to showcase or introduce latest trends in technology to other extension workers, farmers and even students.

Communication facilities shall also be upgraded by procuring powerful computers, printers, laptops and photocopier machines and camera in the knowledge center of the ATI's information technology center.

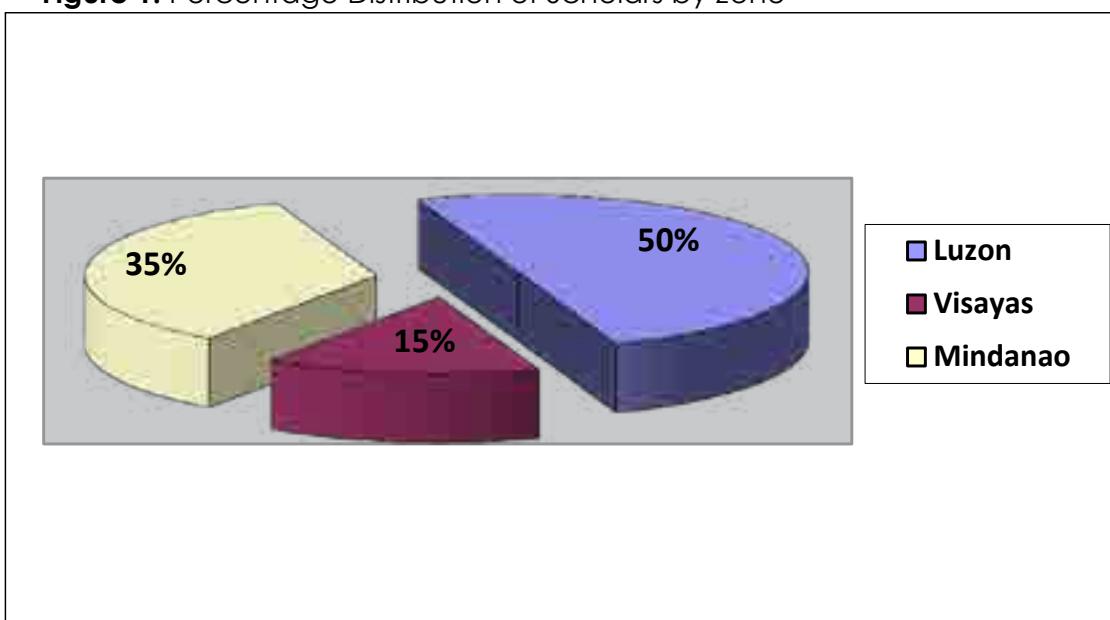

IV. PROJECT RESULTS

A total of 1,097 scholars availed of the degree courses and grants under the EHRDP from 2000 to 2013. The highest number of scholars came from the National Capital Region with 129 scholars followed by Region XI with 101 scholars. Summing up by zone, NCR with Luzon had the 50% share of the total scholars while Mindanao had 35%. Only 15% came from the Visayas as shown in Figure 1. Females are dominantly 12% more than the males as shown in Table 2.

Table 2. Regional profile of Scholars by Gender by Agency

REGION	GENDER		AGENCY			TOTAL
	MALE	FEMALE	DA	LGU	SUC	
CAR	20	22	10	26	6	42
I	16	32	14	34	-	44
II	31	37	20	35	13	68
III	23	36	11	38	10	59
IV-A	31	38	27	32	10	69
IV-B	41	32	15	52	6	73
V	24	37	9	42	10	61
VI	37	48	34	28	23	85
VII	15	31	12	26	8	46
VIII	15	21	7	18	11	36
IX	29	31	26	34	-	60
X	42	51	35	54	4	93
XI	59	42	14	71	16	101
XII	29	44	15	47	11	73
CARAGA	15	21	8	22	6	36
ARMM	10	8	2	12	4	18
NCR	51	78	126	2	1	129
TOTAL	488	609	385	573	139	1,097
%	44	56	35	52	13	

It is apparent that 52% of the scholars were from the local government units (LGUs) while 35% from the Department of Agriculture (DA). A chunk of 13% came from state colleges and universities (SUCs).

Figure 1. Percentage Distribution of Scholars by Zone

Degree Courses

Year 2000-2007

In the first years of the program (2000-2007), 28 deserving children of smallholder farmers graduated with a degree in Bachelor of Science in Agriculture (BSA) in Aurora State College.

Likewise, there were 267 scholars who took master's degree from universities, like, the Ateneo School of Government (ASoG), University of the Asia and the Pacific (UA&P), Xavier University (XU) and in the University of the Philippines in the Visayas (UPVis). Out of this total, 220 or 82% graduated with master's degree in various field of specialization. However, 18% did not graduate and finish their paper as of May 2017. Regions CAR, III, IV-B, V, VII, IX, XI, CARAGA and ARMM had a notably 100% completion rate.

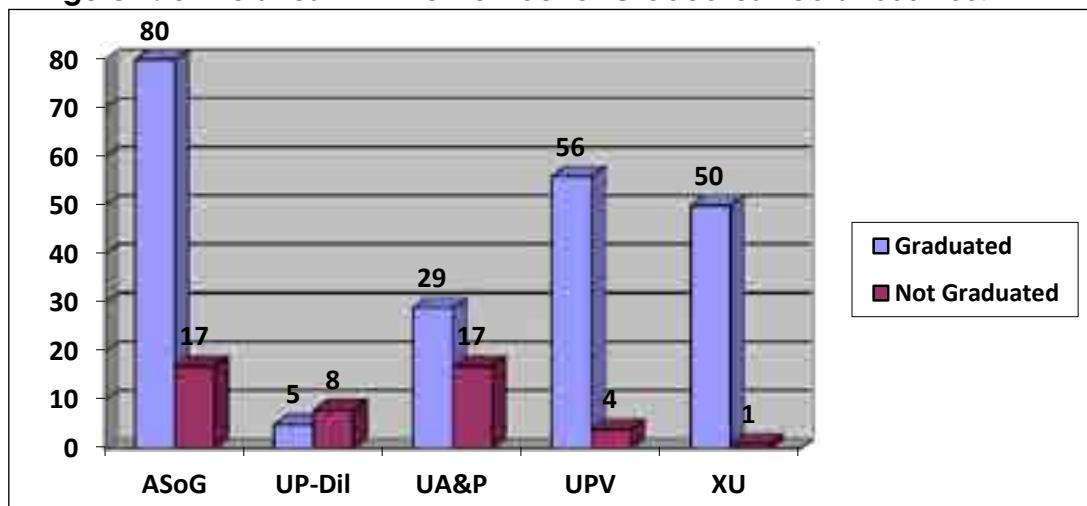

(Annex A)

Table 3. Regional Status of Scholars Enrolled in ASoG, UA&P, XU, UPVis from Year 2000-2007

REGION	GRADUATED	NOT GRADUATED	TOTAL
CAR	2	-	2
I	3	1	4
II	5	3	8
III	2	-	2
IV-A	13	5	18
IV-B	4	-	4
V	6	-	6
VI	31	1	32
VII	4	-	4
VIII	11	1	12
IX	4	-	4
X	33	1	34
XI	5	-	5
XII	1	1	2
CARAGA	11	-	11
ARMM	1	-	1
NCR	84	34	118
TOTAL	220	47	267

Figure 2 shows how the university fared as to the number of graduates. Xavier University had just one who did not graduate while UP-Diliman had more scholars who did not graduate than who graduated.

Figure 2. Universities with the Number of Graduates-Years 2000-2007

Year 2008-2013

While scholars in 2000-2007 yielded 82% of graduates, scholars in 2008-2013 (**See Annex B**) produced 83% of graduates. Region X had the most number of graduates (97%), followed by Region V (93%) and Region CARAGA (92%). Some regions however, have number of graduates below 75%. These were in Regions IV-A (59%), IX (66%), ARMM (71%) and III (72%). NCR had the least number of graduates (30%) (Table 4).

Table 4. Regional Breakdown of Status of the Scholars in Years 2008-2013

REGION	GRADUATED	ON-GOING	FOR REFUND	TOTAL
CAR	39	0	1	40
I	33	2	9	44
II	53	2	5	60
III	41	13	3	57
IV-A	31	5	15	51
IV-B	59	4	6	69
V	51	3	1	55
VI	46	2	6	54
VII	37	5	0	42
VIII	22	1	1	24
IX	37	8	11	56
X	57	1	1	59
XI	82	12	2	96
XII	63	2	6	71
CARAGA	23	-	2	25
ARMM	13	-	4	17
NCR	3	3	4	10
TOTAL	690	63	77	830

There are about 63 (7.59%) scholars with on-going status working on their papers/theses. Reasons of delay include those research-based thesis or dissertation which were mostly affected by force majeure which need to be restored or rebuilt. Others include non-availability and conflict of schedule between adviser and advisee which contributed to the delay in the defense of their papers.

While on-going scholars have greater compliance to graduate within 2017, 77 (9.27%) of the 830 scholars constitute those who could no longer finish their studies. They were dropped from the roll, could not cope up with the pressures of being a student and working at the same time, lapses in time to conduct research studies, some deceased, and even affected by political instability, among others.

Year 2000-2013

In totality, Table 5 shows the overall regional status of the 1,097 EHRDP scholars from 2000 to 2013. Out of this total, master's degree was granted to 832 scholars or 76% of the total, while doctoral degree with only 12%. Thesis and dissertation grants had a chunk of 6% each.

While the NCR had the most number of scholars who took up master's degree, Region X had the most number of graduates (98%), followed by Region V (95%) and Region CARAGA (93%). A total of 673 graduated with a Master's degree out of the 832 scholars. This registered an 81% achievement rate.

There were 116 who received doctoral degrees from various SUCs. Regions IV-A, V, VII, VIII and CARAGA had a 100% successful PhDs in various fields in agriculture and fishery. This registered an 84% accomplishment over its target of 137 scholars.

Grants on thesis support were also availed by 66 scholars. A total of 60 scholars graduated with 91% accomplishment. Regions with all scholars graduated came from III, IV-B, VI, VII, VIII, XI, XII and CARAGA.

Similarly, dissertation support were availed by 62 scholars. Out of this, 56 or 90% graduated. All scholars in Regions CAR, I, II, IV-A, IV-B, VIII, IX, X, XI, XII and CARAGA graduated.

Overall, out of the 1,097 scholars who availed of degree courses and grants, 910 graduated, an 82.95% rate of accomplishment. The remaining 17.05% constituted the 5.74% of the scholars who are still working on their manuscript which will be finished towards the end of 2017. The 11.30% will be required to refund as per grantee's obligations and responsibilities as stated in the scholarship contract.

Table 5. Overall Regional Status of EHRDP Scholars - Years 2000-2013

Non-Degree Courses

Local Non-Degree

On July 13, 2009, the DA, represented by then Secretary Arthur C. Yap, signed a MOA with the Southeast Asian Regional Center for Graduate Study and Research Agriculture (SEARCA), represented by its Dean, Dr. Arsenio M. Balisacan, Ateneo School of Government (ASoG), University of Asia and the Pacific School of Management (UA&P-MSN) and UPecon Foundation, Inc. The MOA established the Umbrella Capacity Development Program (UCDP) on Strategic Management and Policy for Agriculture Professionals and Executives for Implementation from 2009-2010 to 2013-2014. Its total project cost was P60,014,642.00, with the following counterpart funding: DA, Php 50,000,612.00; SEARCA. Php 4,466,307; ASoG, Php 2,160,149; UA&P SMN, Php 2,133,635; and UPecon Foundation, Php 1,358,269.

The DA UCDP had five program components for implementation, namely 1) Needs and Situation Analysis; 2) Graduate Scholarship; 3) Executive Program; 4) Peer Mentoring/Solutions Exchange and Incentives; and 5) Program Monitoring and Oversight, Midterm Review and Evaluation. (**DA-SEARCA Umbrella Capacity Development Program (UCDP) on Strategic Management and Policy for Agriculture Professionals, PROGRESS REPORT (13 July 2009 to 14 April 2011)**).

SEARCA-UCDP had the following accomplishments:

1. Needs and Situation Analysis

Needs and Situation Analysis sought to: 1) analyze current and anticipated capacity development needs of incumbent and prospective DA leaders (middle to senior manager level and selected executive/technical staff) 2) determine the preferred approaches and get specific suggestions in program modalities; 3) identify the facilitating factors and barriers from participating in the customized executive program and pursuing a graduate degree; and 4) draw out relevant criteria and indicators for evaluating the impacts of the Program and its respective components.

- It included a review of existing documents and reports focused on previous capacity development programs of DA
- Key informant interviews with 11 DA directors or their representatives from the regions and DA agencies
- Two (2) focus group discussions with seven (7) DA agency directors and their deputies and with their seven (7) selected division chiefs, totaling fourteen (14) FGD respondents.
- Five Key issues in the external operating environment and internal environment of DA - Respondents mentioned devolution of agricultural extension, delay in the approval of the rationalization policy of the DA, weak incentives and rewards system, weak human resource development program, and vulnerability to political meddling.
- Needs of DA executives – DA executives and executives-in-line need enhanced competencies in strategic leadership, program and process management, and in facilitating networks and linkages with other organizations and groups. Specific suggestions on the program modalities dealt with qualifications of participants, length and venues of offerings, ensuring good attendance, and maximizing benefits from participants' learning outputs, among others.

2. Graduate Scholarship

- Nine (9) scholars completed their program. Six (6) scholars took up MPM in ASoG and three (3) took up Master in development in Economics in University of the Philippines School of Economics (UPSE). (**Annex C**)

- Training courses attended by DA-SEARCA scholars - Four (4) scholars attended the pilot course offering of "Introduction to Social Entrepreneurship", three (3) on Training-Workshop on Partnership Building Through Bridging Leadership, One (1) on Regional Conference on Research and Management for Executives, Five (5) on Training Course on Impact Assessment and Poverty Alleviation: Focus on Technology and Capacity Development.

3. Executive Program

- Nine (9) lecture fora were conducted with 250 DA executives and professionals from March to October 2012
- UPecon Foundation, Inc along with SEARCA, implemented three learning modules in economics for agricultural development for DA corps of highly skilled senior and mid-level managers. Module 1: Economic Analysis for Policy Formulation was attended by 32 participants; Module 2: Agriculture, Trade and Development (WTO) with 28 participants and Module 3: Program and Project Monitoring and Evaluation with 35 participants. As a result of the post-evaluation meetings in the conduct of the three (3) modules, the recommendations were 1) Conduct of a post-learning modules get-together in six months' time, primarily to assess how the knowledge and skills the participants acquired in the training are helping them in their line of work, and secondly, to renew the working team spirit that was developed in the training. 2) Conduct of Module 4 training on applied statistics or on a condensed week-long training for the technical staff of the DA regional offices and other attached agencies.
- Global Developments in Agribusiness – a module offered by the UA&P SMN. A total of 49 top executives of the DA attended this executive forum, which took place in conjunction with the DA ManCom meeting in Siargao Island for the second quarter of 2012.
- Benchmarking in Agribusiness: the Practice and Success – the forum aimed to analyze the state of Philippine agriculture and how their performance has compared with key competitor countries like Thailand, Vietnam, Malaysia and Indonesia. Around 62 participants registered to this forum.
- Project Development and Management, Monitoring and Evaluation for Middle-level and Technical Staff – this course was geared to better facilitate project management, particularly in monitoring and evaluation. A post-training evaluation showed that participants rated the course very relevant in terms of their current work or function; in terms of training's contribution to their future professional development, the high average obtained signified the participants' confidence that said knowledge and skills will stand them in good stead in terms of furthering their careers and increasing their capacity to perform functions assigned to them.

- Executive Course on Greater than Leadership Module – this was participated in by 28 participants comprising an Undersecretary, an Assistant Secretary, 16 executive Directors, Five Directors, 1 General Manager, two (2) Administrators and 2 Deputy Administrators.

Likewise, the ATI also forged MOA with the Development Center for Asia Africa Pacific (DCAAP) to conduct non-degree courses for middle-level managers to enhance the managerial capabilities of the participants. These included planning, governance, organizing, directing and project implementation strategies. As managers, they are expected to perform creditably in their respective organization. List of participants are in Annex D. There were a total of 2,100 individuals benefited from local non-degree courses not just offerings from SEARCA and DCAAP but from other institutions nationwide.

International Non-Degree

These international non-degree activities were mainly conducted in the United States. The participants were mainly middle-level managers, extension workers, and scientists from various DA agencies and professors of SUCs. They participated in various extension activities like, training courses, visits to the different extension modalities and served as lecturers on the latest trends in technologies.

RECIRCULATING AQUAPONIC SYSTEM USING NILE TILAPIA (*Oreochromis niloticus*) and FRESHWATER PRAWN (*Macrobrachium rosenbergii*) POLYCULTURE and the PRODUCTIVITY of SELECTED LEAFY VEGETABLES

CHITO F. SACE, Ph.D.
Philippines
KEVIN M. FITZSIMMONS, Ph.D.
Arizona, USA

These international non-degree activities were mainly conducted in the United States. The participants were mainly middle-level managers, extension workers, and scientists from various DA agencies and professors of SUCs. They participated in various extension activities like, training courses, visits to the different extension modalities and served as lecturers on the latest trends in technologies.

Moreover, a group of Veterinarians participated in the Goat Meat Production in Institute for Goat Research in Oklahoma, USA. Same group also attended the training course on Sustainable Agriculture in Berkeley, California.

Visit to Petaluma Poultry Farm

Several scientists from SUCs and bureaus under the Department of Agriculture were invited by the US government to impart and showcase their technology in several fora in the United States.

Biotechnology Advances in the Extraction, Detection, Enumeration and Risks Assessment of Vibrios and Enteric Viruses in Seafood
January 5-10, 2013
Food and Drug Administration, Atlanta, USA

A photograph of a person standing in front of a large, modern building with a glass entrance and red brick walls. Below this main image are five smaller photographs showing various outdoor scenes, possibly related to seafood processing or marine environments.

Most of the learning visits to USA were observations and appreciations on cooperative extension service of the USA, and the very important roles of the 4-H Club of the youth sector in the US.

Reports of the Observation and Learning Visits are listed in Annex E-N

Grants

Six book publications on either for promotion or compilation of technologies were published thru grants. These publications were the following:

1. Operationalizing the Philippine Agriculture and Fisheries Extension Platform: Technical Guidance Notes for Extension Service Providers
2. Adoption of the PalayCheck System by the Farmers' Field School Graduates in the Philippines
3. Gauging Effectiveness of Agricultural Extension Workers of Agricultural Extension Workers in disseminating the PalayCheck System – An Evaluation of the Season Long Training of Trainers (TOT) on the PalayCheck System in the Philippines
4. Malungtarong Panguma – by Prof. Jose Tavera of Bohol Island State University (BISU)
5. The Testimonies of YAFP Scholars of Region 02
6. The Testimonies of EHRDP Scholars of Region 02

Two policy studies were also funded by the program. These were:

1. A Proposal on the Impact Evaluation of the Local Scholarship Program under the EHRDP from 2000 to 2009
2. Predisposition Factors of Students' Choice in Agriculture, Fisheries and Natural Resource Courses (Visayas Area)

Observation Tours

Various agencies, local government units and DA-Regional field Offices (RFOs) were grantees of the 106 observation and learning visits. They were given the chance to observe and experience updated trends in various learning sites mostly on organic agriculture.

The inclusion of Observation and Learning Visits in EHRDP was appreciated by the LGU extension workers. Visiting model farms enhanced their appreciation to duplicate best practices in their locality. A total of 106 observation and learning visits were granted to the LGUs, SUCs and in the department's bureaus and attached agencies.

In summary, Table below shows the accomplishments of the Program.

Table 6. Targets versus Accomplishments

PROGRAM	INDICATOR	TARGETS	ACCOMPLISHMENTS	
			No.	%
Degree Courses				
- Baccalaureate degree	No. of scholars No. of graduates	28	28 28	100 100
- Master's degree	No. of scholars No. of graduates	822	832 673	101 81
- Doctoral degree	No. of scholars No. of graduates	137	137 116	100 84
Non-Degree Courses				
- Local - International	No. of participants No. of participants	2,072 64	2,100 91	101 142
Study Grants				
- Dissertation assistance	No. of grantees No. of graduates	65	62 56	95 90
- Thesis assistance	No. of grantees No. of graduates	90	66 60	73 91
- Book Publication	No. of book publications funded	6	6	100
- Policy Studies	No. of policy studies funded	2	2	100
- Observation Tours/ Learning Visits	No. of observations tours/ learning visits funded	100	106	106

Strengths and Weaknesses

Based on the impact evaluation conducted by the Extension Governance and Policy Division of the ATI last June – December 2012 on the EHRDP implementation in 2000-2009, the following strengths, weaknesses, opportunities and threats (SWOT) were identified:

STRENGTHS	WEAKNESSES
<p>The program was very relevant and consistent with the goal of achieving overall sustainable development in the Philippines.</p> <p>The degree courses offered addressed the needs of the human resource base of the Department of Agriculture.</p> <p>Grantees exhibited increase in their knowledge, skills and attitudes after program participation.</p> <p>Customized degree programs will gain more takers/enrollees. Approval of permission from employers is easy because only short period will be utilized for a grantee to be out of his/her office.</p>	<p>Poor monitoring and evaluation done by the implementing agency.</p> <p>Poor information dissemination about the program's availability.</p> <p>Process not yet perfect for the Public offering courses/programs.</p> <p>Only few Courses/Degrees and few Universities were involved in the implementation of the customized degree programs.</p> <p>Non-uniform understanding as to the process and project components by the ATI-RTCs (i.e. Focal Persons).</p> <p>For the public offering handled by ATI-RTCs, scheme in the release of stipend poses setback for potential applicants.</p>
OPPORTUNITIES	THREATS
<p>Former scholars are likely to create a positive contribution to the needs of their agencies/offices.</p> <p>Prestige/honor of the agencies/offices as to educational attainment of their staff may be boosted up.</p> <p>Other Academic Institutions in the Regions may be tapped for expansion.</p> <p>More and varied/wide-ranging courses may be offered so not only Technical Staff may avail of the Scholarships.</p>	<p>Increasing costs of tuition and other school fees of the partner academic institutions.</p> <p>Fewer takers of the scholarship program due to the imposed age requirement and also because of the rationalization in the department in the case of regional and national offices. While in the case of the LGU, it is the long absence of the scholars from their offices.</p> <p>Uncertainty of the continued financial support in case of eventual program expansion and/or replication to other provinces.</p>

Problems

Staggered Release of Funds

The EHRDP was implemented for thirteen (13) years. The ATI experienced staggered fund releases specifically for 2002 – 2003 and 2005 – 2007 which resulted in none recruitment of scholars for those years.

Succeeding fund releases for the Project commenced in 2008 – 2011, thus, recruitment of scholars was resumed.

In 2011, ATI requested authority from the Department of Budget Management for the extension of validity of Special Allotment Release Order (SARO) till 2013 which was approved. This enabled the Institute to continue the program until CY 2013 to meet the Program's physical targets.

Delinquent Scholars

Based on records, a total of 125 or 11% of the scholars failed to complete their studies on time as stipulated in their signed scholarship contract. Scholars who breached their scholarship contract were made to refund the total amount of grants awarded to them.

Majority of the scholars who breached on their contract cited non-conformance of their agency heads to allow them to enjoy full-time study privileges and a few cited force-majeure, physical and health condition.

Inadequate Monitoring and Evaluation Mechanism

Monitoring and evaluation activities were not carried out systematically in the 13 years of program implementation.

Several changes and turn-over of the Program from one Administration/Implementer to another without proper turn-over of related official documents resulted in inadequate documentation of the programs results or accomplishments.

Inadequate number of personnel assigned in the implementing division of the ATI also contributed to the weak monitoring of the program implementation.

ATI through the Career Development and Management Division (CDMD) carried out several program assessment but the actual situation in the field and other implementing partners were not established. Changes in the designation of Focal Person on Scholarship without proper turn-over of related documents likewise contributed to difficulties in conducting monitoring activities in the field.

Slow Liquidation of Partner Agencies

Some partner-agencies, universities, extension service providers and other government agencies have not submitted final liquidation of funds released to date in spite of several notices/letters issued to them.

Unmet Physical Targets

In Year 2009, a MOA was forged between the SEARCA and the Department of Agriculture to undertake capability enhancement activities for middle level managers of the DA and scholarships for the department's staff. The project cost of P50 Million was taken from the EHRDP fund.

Due to the rationalization of the DA, SEARCA had a hard time recruiting applicants. Delay in the filling up of positions and over-aged work force within the DA and its agencies, resulted in under accomplishment of the target. Also, only few passed the stringent process of the SEARCA.

Impact of EHRDP

A. Success Stories

The success of the EHRDP scholarship program cannot be measured by merely counting the number of its recipients and its graduates but by knowing as well that most of them have achieved career advancement, received recognition for their researches and acquired wider opportunity to excel personally and professionally. These are few of the success stories of this scholarship program:

Engr. Elmer T. Ferry, Center Chief of Palawan Agricultural Experiment Station, DA-IVB, gained his doctoral degree under the EHRDP scholarship program. He persuaded three of his office's Science Specialist to pursue their master's through the same scholarship program because it was his dream to bring their office to the highest standard of quality that can compete within national and international standards. With the support of EHRDP

scholarship program, Engr. Ferry was able to transform the Station into an outstanding Research Development & Extension (RD&E) Management Agency. As a result, an increase in project support came from different agencies. The Bureau of Agricultural Research (BAR) also funded several PAES-initiated projects and researches. As for his career, Engr. Ferry has been recently designated as Officer-In-Charge Regional Technical Director for Operation in DA MIMAROPA Regional Field Office.

Nanette M. Rosales, started working at the Department of Agriculture Oriental Mindoro Agricultural Experiment Station as casual employee in 1983. Six months after, with her excellent job performance, she was then promoted as Livestock Inspector for a permanent post. In 1992, without any doubt, she took her Master's Degree in Agriculture major in Crops Science at Pampanga Agricultural College. With her new gained learning and years of experience in agriculture, she was promoted as Agriculturist II in 1994. When she heard about the Expanded

Human Resource Development Program (EHRDP) Scholarship offered by the DA through ATI, Nanette applied and fortunately qualified to be an EHRDP scholar. The scholarship provided for her tuition fee and book allowance every semester, monthly operational allowance and thesis assistance until she finished her doctoral degree. Now, at the age of 56, she has finally reached the pinnacle of her career. She is now the Chief Agriculturist at Regional Integrated Agricultural Research Center, also known as Regional Crop Protection Center in the DA in MiMaRoPa. Nanette is indeed grateful to ATI for having EHRDP who gave financial support to individuals who want to enrich their lives by improving their professional skills. As part of giving back to ATI, she offers her expertise as resource person in several trainings of the agency. Most of the time, she gives her talk for free.

Glimar V. Gaspar of Bagong Sikat, San Jose, Occidental Mindoro finished his Bachelor of Science in Agriculture (Farm Management) at Central Luzon State University in 1983. Right after he graduated, he started to serve the government. He was an Elementary Grade Teacher from 1983 – 1985. After two years of being an elementary teacher, he was employed as Secondary School Teacher at Occidental Mindoro National College (OMNC) where

he became the first Officer-in-Charge of the OMNC Damayan Center for 10 years. In 1995, he completed the Comprehensive Academic Requirement for Master of Arts in Education at OMNC and his Master of Science in Agriculture in 1998 at Cavite State University (CavSU). Due to his exemplary performance, he was promoted to college instructor and handled various projects and programs in OMNC. He was also designated and involved in instruction, research and agri-business projects, extension programs with successive promotions to Assistant Professor I, II, IV and Associate Professor I in a short span of time. When he became an EHRDP scholar, Glim temporarily left his job

and returned to school with hopes of improving his life and family's standard of living. On April 2014, Glim had finally reaped the fruits of his labor. He was able to finish his doctoral degree after three years of studying. Months later, he was designated as Campus Director in OMSC – Murtha Campus San Jose, Occidental Mindoro which involves the instruction, production, research, and extension programs of the campus.

Mr. Pedro Cabang, Jr. was working as a District Head of the City Agriculturist Office in Tugbok in Davao City when he entered the EHRDP Scholarship. He took up Master in Science in Agriculture major in Animal Science to align his career path since his Bachelor's degree was Agriculture major in Animal Science. After earning his master's degree, he was promoted as the Acting Administrative

Officer for the year 2015-2016. He had his PRC License as Agriculturist and he was also accredited as Professional Test Administrator of Civil Service Commission. If he will be given a chance for another scholarship of ATI or other agencies, he still wants to pursue his Doctorate degree.

Mr. James Arly A. Danac, was a recipient of the UCPB-CIIF Scholarship program for his bachelor's degree in Agricultural Business in 2006, with latin honor. After years of being Agriculturist II in the City Hall of Davao, he was given the opportunity for a higher position after he gained his Master's degree in Agriculture and Fisheries thru the EHRDP Program. He was recognized as the youngest

Municipal Agricultural Officer in Davao City. He said that integrity and humility in the workplace are the keys to his rapid promotion. He also believes that every open door of opportunity is a light to success.

B. Studies with great impact to the community

Thesis and dissertation were conducted by the scholars as a requirement for the Master's and Doctoral degrees. The following studies are just one of the few that had great impacts to the community.

Ms. Maricel Endico was working at LGU Mainit, Surigao del Norte and was closely working with ATI – RTC XIII for extension services before she pursued her master's degree. She never expected that ATI will be part of her professional growth, by taking up Masters in Environmental Management through the EHRDP implemented by the agency. Her research entitled Assessment of Mercury Contamination in Sediments and Common Carp in selected river mount of Lake Mainit, Philippines examines the mercury content on the sediment since the lake is surrounded with small and large scales of mining companies. The study has a great impact in their community because it aims to protect and preserve Lake Mainit, since it is the communities' main source of livelihood as well as an icon and a tourist destination. The research has been presented to BFAR and gained recognition by local and international conferences.

Mr. Alan Pugong, availed the thesis assistance for graduate studies under the EHRDP program. His thesis entitled "Assessment of the Unified National Artificial Insemination Program of the DA-RFU I 1st District of La Union" has great impact on the different bureaus, field units and other attached agencies (RFU-1, BAI, PCC, NDA, LDC) and the Office of the Provincial Veterinarians (OPVET) in evaluating whether artificial insemination program has successfully and extensively implemented within the 1st District of La Union. It has been a basis for the concerned offices in formulating changes and innovations on projects, activities and policies to enhance efficiency and progress in the implementation of programs.

Jerlinda Cruz, an agricultural extension worker from the BFAR-RFTC V, is a recipient of the EHRDP Scholarship Program. Her thesis titled "Performance Evaluation of Modified Floating Rope Method in the Production of Seaweed in Tiwi, Albay", aimed to evaluate the Modified Floating Rope Method (MFRM) which was promoted by the BFAR-RFTC V to address the problem of the community with regard to unsustainable livelihood of fishers due to damages caused by typhoons. This method is where seaweeds are attached to ropes forming like a floating farm lot in the middle of the sea. This is seen to help seaweed withstand strong typhoons since it can be easily submerged as compared to the usual method. As a matter of fact, seaweed farmed using this method had a survival rate of 88.33% which also withstood typhoon Yolanda (Haiyan).

Jennifer N. Baguinang of Region 10 made a difference on her thesis entitled "The Efficiency of Different Indigenous Attractants with Traps at varying placement distances on Sweet Pepper" which showcased the appropriate placement distance of indigenous attractants with trap to minimize and even control pests' incidence. Periodic synthetic pesticides spraying is a common practice by our farmers to control pests which resulted to health related problems and pollution to the environment. Using indigenous attractants with traps will help address the threats of global warming by recycling these materials into a usable form that would ensure quality farm products best and safe for human consumption.

C. Testimonies

Part of the assessment of the program is to compile stories of the scholars which describes their experiences, challenges and opportunities along the way of improving their profession towards a more effective and efficient service and the following are some of the scholar's testimonies:

1. Hector A. Tabun

Mr. Hector U. Tabbun highly expressed his gratitude for being one of the fortunate recipients of EHRD Program. He emphasized that "...the program molded me to be an efficient and effective public servant with the introduction of new ideas and strategies on organization, management, human behavior and public administration." Moreover, the Program motivates him to bring out the best in his work to view gratitude to the people's money and worth for the opportunity given to him.

2. Roger Tamayo

Professor Roger Tamayo is an inspiring professor who believed that do not limit your knowledge and skills for what you have but aspire for growth. Prof. Tamayo express his appreciation to the program offered and for being fortunate recipient of EHRDP. He added that "...the program has a rippling effect – through that scholarship given to teachers and workers, my students will be benefited with deeper knowledge and equipped with appropriate skills to be globally competitive."

3. Herminia B. Atal

Herminia B. Atal is an Agricultural Technologist in Region II who has a big heart in public service. She believe that learning is a continuous process however, taking Master's Degree requires big amount of money. That is why EHRDP has contributed big part to Atal's life to take her Masters with worry less in terms of financials. She highlighted that she took her studies smoothly because of unfailing support of ATI. She emphasize that "I graduated Master's degree with pride and honor in which I am forever grateful to this agency (ATI)". In able to give back she said that "I promised myself to serve farmer-clientele with accurate, immediate and helpful information through tireless public service. Aiming to touch their mind and heart and uplift their lives through assisting them in their noble way of living-farming."

4. Pat F. Bumalaon

Mr. Pat F. Dumaloan started seeing only himself dreaming for all his achievements today. Before, he was hesitant to pursue any studies because his priority was his family and work. But in 2009 he was granted for a full scholarship program offered by ATI. He said that after he was completed his Masters a big change has come and totally a dream came true. Because through the learning experiences and knowledge and skills he acquired during his Masters he used it to pass his Agriculturist Licensure Examination in 2012. He was also promoted to become a Municipal Agricultural Officer in March 2013. Dumaloan said "*I became more competent and gained more expertise in my field. My salary doubled plus other benefits*". He said that EHRDP plays a vital role in his life and he stated that "*I would not have been able to realize my dreams without the EHRDP-ATI scholarship program.*"

5. Maria Lilith M. Turan

Ms. Maria Lilith M. Turan share her award received after the EHRDP scholarship program. Like the other experiences of the graduates, she also share that her life was uplift through the benefits gained because of the earned degree. Because of the learned experiences, knowledge and skills acquired during her thesis, she applied it when completing the needed requirement in joining the Rice Achiever Award "...*I received an award as an Outstanding DA Rice Achiever Award – Agricultural Extension Worker.*" She was grateful and honored for the award she received. In addition to that she said, "*It made me so proud that for two years, our province has become an Outstanding Rice Achiever – LGU Category.*"

6. Liza Abarido

Ms. Liza L. Abarido of LGU-Manolo Fortich, Bukidnon was once only dreaming to be a scholar of EHRDP Scholarship Program. But once she had the opportunity to apply for this scholarship program she immediately grab it and comply with the needed requirements. When accepted in the scholarship program she experienced lot of challenges and gone through hardships. There was a series of crying and heartaches nor sleepless nights to comply with the requirements needed, study for the examinations and defense. It makes her heart struggle a lot when she found out that her LGU-MAO family cannot support in her endeavor. Nonetheless, through the cheering hearts of her family, friends and lots of prayer, she got the strength to move and do all the work she needed to complete and graduate the program. She said after taking her graduate studies she realized that "*1) rejection should never stop you, 2) failure is not a problem at all, 3) people who reject you know nothing and 4) believing in yourself is the key to success in life*". She also added that "*there's nothing better than educating yourself to become a successful individual.*"

7. Baby Jane S. Almogela

Ms. Baby Jane S. Almogela of LGU-Kauswagan expressed her gratitude for being fortunate scholar of EHRDP scholarship program. She said that the scholarship program contributed much to her character, knowledge and experience. The program gave her the opportunity to acquaint, mingle and relate to co-workers and practitioners of Agriculture. She said that "*the scholarship program encouraged me all the more to be more efficient and effective AEW*" so that she can contribute to the agricultural productivity and to the environment conservation through the knowledge and experience she earned during her study. Moreover she said that "*EHRDP was an instrument for me to develop my technical working skills*". Ms. Almogela also share that through the gained knowledge and skills she got passed the licensure examination for agriculturist and promoted as Agriculturist II last December 2013. And she believed that the program help her enhance her passion to deliver quality extension services in the municipality. And this passion leads her to help achieve the greatest dreams of her municipality. She mentioned that "*I am proud to say I was a partaker of the milestones in our municipality*". Because last 2013 the municipality won the National Organic Agriculture Achievers Award for LGU Category and they made to the top 10 of the Gawad Galing Pook Awards for the "*Arms to Farms-Walking through the Paths of Peace*" a joint program of ATI, AFP and the LGU Kauswagan. This only some of the municipality achievements that she was really proud that she contributed to the progress after enhancing her knowledge, skills and experienced through the EHRDP Scholarship program

8. Johnny V. Ramos

Mr. Johnny V. Ramos said that he was like the other scholars who also gone hardships and triumph because of the EHRDP scholarship program. Moreover, he emphasize that his experienced would become an authentication that if you believed poverty is not hindrance to success you will achieve progress in your life. And he said that "*as a public servant for five (5) years, I am cognizant that there are still a lot of things I need to learn and experience*".

V. PROJECT PROMOTION/PUBLICITY

The information regarding the EHRDP was initially presented to partner institutions during the Briefing/Orientation conducted for the SUCs last 2009. This is the year when the ATI-RTCs are involved in the implementation of the EHRDP. It was highlighted during the orientation that the EHRDP was funded under the US PL 480 Food for Peace (Title I) Program.

Briefing/Orientation conducted by ATI-RTCs re-echoed that EHRDP was funded from the US PL 480 Title I Program.

Billboards are established inside the campuses of the EHRDP scholars that states the support of the US PL480 in the scholarship program.

There were promotional materials for the US PL 480 printed in T-Shirts and coffee mugs distributed to the scholars and their colleagues.

VI. FINANCIAL REPORT

FINANCIAL ACCOMPLISHMENT (YEAR 2000-2014)			
Year	Financial Allocation (Million Pesos)		
	Allotment	Actual Obligation	Disbursement
2000-2005 (Fund 102)	105.448	105.448	105.448
2008: 2009 (Fund 102)	110.053	110.053	72.053
2009: 2010-2011 (Trust Fund)	105.373	105.373	105.373
2010: 2011-2013 (Trust Fund)	94.713	94.615	94.615
2011: 2013-2014 (Fund 102)	84.413	84.413	84.413
TOTAL	500.000	499.902	461.902

The financial report revealed that 99.98% or PhP 499.902 Million was obligated out of the total program cost of P500 Million. In Year 2009, a MOA was forged between the SEARCA and the DA to undertake capability enhancement activities for middle level managers of the DA and scholarships for the department's staff. The project cost of P50 Million was taken from the EHRDP fund.

Due to the rationalization of the DA, SEARCA had a hard time recruiting applicants due to the delay in the filling up of positions and majority of the DA employees were over age. Also, only few passed the stringent process of SEARCA.

These were the reasons SEARCA's cash utilization was only P 12 Million out of the P50 Million obligated to them. SEARCA ended its contract in December 31, 2014.

Thus, the amount of P 38.092 Million was not utilized.

VII. RECOMMENDATIONS

It is worthy to emphasize that the DA as mandated in AFMA has the responsibility of providing its personnel equal opportunities for training, education and career development on a continuing basis. In addition, investments in Agriculture and Fisheries (AF) human resource through capability building and education support will enable them to require desirable wisdom, knowledge and skills to face modern development challenges. Along this line, it is highly recommended that the EHRDP be extended and revitalized to provide formal and non-formal capability building to DA personnel, LGUs, SUCs, and other partner institutions.

The courses offering of the SUCs should be enhanced to respond to the needs of the agriculture sector (e.g. Climate Change resiliency, Good Agricultural Practices, ASEAN Economic Integration, etc.)

A scholarship program tailored for working personnel/staff should also be included. The designed scholarship program must allow the scholars to finish a course while continue performing his/her job. Another system that can be offered is the blended learning strategy. This is a combination of regular classes and internet/e-learning.

Briefings and orientation on the scholarship guidelines to all implementers should also be done. Intensification of communication will always be an integral component in the success of any program. After a review of the guidelines as to the relevance and appropriateness, it is suggested that an intensified information drive to reach and attract more scholars be done.

Increase in the scholarship allowances and benefits will level or be competitive with other scholarship programs of other institutions.

Institutionalizing the Technology Forum/Symposium conducted in the region and in the Central office to encourage scholars to conduct high quality researches.

To continue the EHRDP to provide equal opportunities for training, education and career development to the newly hired employees in the DA under the Rationalization Plan.

VIII. CONCLUSIONS

1. From several assessments and reviews conducted, it was found out that EHRDP enhanced the capability of the scholars in their job performance. The scholar's employer feels more confident on the ability of their scholar upon completion of the course. The program has a positive impact on the scholar's performance and scope of responsibilities. Scholars from the SUCs were grateful because the program gave them the opportunity to complete their Master's Degree which is one of the requirements to get his/her appointment.
2. The conduct of Technology Forum/Symposium was an effective activity to present the results of studies conducted by the scholars. The participants composed of LGUs, DA and SUC extension workers, and farmers/fisherfolk felt grateful for the new ideas and technologies that can be demonstrated or adopted back in their locality.
3. There was a smooth implementation of course offering of the partner institutions: UAP; ASoG; UP-Visayas; XU-CDO; and UP-Diliman for the year 2001-2006. A MOA was forged with these partner institutions to implement the EHRDP. During this period, the ATI-Regional Training Centers has limited involvement; hence, there was a direct supervision by Central Office through its ATI Capability Building Committee. Any issues/concerns for its implementation was addressed directly to the Central Office. The course offering during this period was limited only to these five (5) institutions, which limits the number of applicants that availed in the program.
4. The implementation of the EHRDP through the ATI Network of Training Centers for the year 2008-2013 expedited the process flow of the program. Targets were attained and problems/issues and concerns were addressed faster and easier. Periodic monitoring of the scholars was conducted as part of management strategy in program implementation.
5. The EHRDP provided financial support to six (6) book publications that were distributed to partner agencies.
6. The EHRDP contributed to the goal of achieving overall sustainable development in the Philippines. The achievement of the scholars addressed the need of human resource development in agriculture and fisheries sectors. The presence of capable technical staff in the workplace is a booster in achieving agriculture and fisheries development.
7. Likewise, EHRDP was able to support policy study that determines the predisposition factors that contributed the students to enroll in agri-based courses and, policy study on the implementation of Local Scholarship Program.

ANNEXES

Annex A

List of EHRDP Scholars (YEAR 2000-2007)

EXPANDED HUMAN RESOURCE DEVELOPMENT PROGRAM (EHRDP) - (YEAR 2000-2007)

CENTER	Name (Last, First, Middle Name)	Agency/ Office	Degree Course	School	Status (Graduated or for Refund)	Thesis/Dissertation
1 NCR	Abella, Ellen Ruth L.	NNC	NPM-RAD	ASoG	Graduated	Assessment of the Policy Formulation and Coordination Capacity of the National Nutrition Council Technical Staff Towards The Achievement of its Mandate
2 NCR	Agoot, Estela H.	NAFC	NPM-RAD	ASoG	Graduated	Open Skies Policy at the Diosdado Macapagal International Airport (DMA), Clark Freeport Zone, Pampanga: Evaluating the Air Transport Market Potential of the Clark Route
3 NCR	Ambrocio, Rachelle F.	LDC	NPM-RAD	ASoG	Graduated	Financial and Economic Analyses of Small Water Impounding Projects in Selected Sites in the Philippines
4 NCR	Arellano, Bertolio P.	BSWMM, NCR	Master's Program in Food Systems	UAP	Graduated	Firm-level Impact of Trade Discrimination on Philippine Canned Tuna by the United states of America and the European Union
5 NCR	Arreza, Rosarie	BFAR, NCR	Master's Program in Food Systems	UAP	Graduated	Alternatives in Achieving Food Security (A Case of Nueva Ecija, Ilocos Norte, and Bulacan)

185	VI	Alviar, Marlene Y.	BAS, Iloilo City	MM-RD	UPV	Graduated	Effects of Rice Importation on Rice Farming Profitability in Cabatuan, Iloilo
186	VI	Balasoto, Darcy I.	DA-RFU VI	MM-RD	UPV	Graduated	Implementation of the Farm-to-Market Road Programs in the Province of Iloilo
187	VI	Borja, Jose Sergio M.	DA-RFU VI	MM-RD	UPV	Graduated	
188	VI	Cagasan, Evelyn B.	FIDA, Iloilo City	MM-RD	UPV	Graduated	
189	VI	Cambas, Oliver T.	NFA, Capiz	MM-RD	UPV	Graduated	Evaluation of the Government Support Price for Palay Producers in Dumangas and Sara, Province of Iloilo
190	VI	Castillo, Josephine Venus D.	NFA, Aklan	MM-RD	UPV	Graduated	Financing and Marketing Strategies of Selected Farmers in the Province of Capiz
191	VI	Baria, Mary Ann V.	CLGU, Roxas City	MM-RD	UPV	Graduated	The Marketing System of the Dried Fish Industry in Roxas City
192	VI	Elican, Jabez R.	DA-RFU VI	MM-RD	UPV	Graduated	
193	VI	Felarca, Nelly L.	DA-RFU VI	MM-RD	UPV	Graduated	
194	VI	Fernandez, Yran B.	BAS, Aklan	MM-RD	UPV	Graduated	Crop Preference of Farmers in Passi City
195	VI	Tejado, Herman John Z.	PLGU, Balasan District Hospital	MM-RD	UPV	Refund	
196	VI	Fidel, Benilda T.	NFA, Bacolod	MM-RD	UPV	Graduated	Accredited Retailers' Perception of the Rice Distribution System of National Food Authority in the Province of Negros Occidental
197	VI	Flamiano, Emelda B.	BAS, Iloilo City	MM-RD	UPV	Graduated	Backyard Livestock and Poultry Raising as Alternative Livelihood Activities in Selected Barangays in Carles, Iloilo
198	VI	Fulgueras, Luisa P.	DA-RFU VI	MM-RD	UPV	Graduated	The Adoption of Recommended Technologies and Practices for Wet Direct Seeded Rice (WDSR) by Farmers in Barotac Nuevo, Iloilo
199	VI	Gaton, Juvy S.	DA-RFU VI	MM-RD	UPV	Graduated	Communication Capabilities and Needs of Information Officers at the Department of Agriculture and Local Government Units in Western Visayas

200	VI	Gonzaga, Eddie C.	NFA-Iloilo City	MM-RD	UPV	Graduated	The Institutionalized Procurement Program of the National Food Authority: Its Effects on Farmers' Organizations in the Province of Iloilo
201	VI	Granada, Arn D.	PCC, Iloilo City	MM-RD	UPV	Graduated	
202	VI	Hapitan, Enelyn A.	DA-RFU VI	MM-RD	UPV	Graduated	
203	VI	Jagunap, Teresa C.	DA-Iloilo City	MM-RD	UPV	Graduated	The Effects of LEAD Project on the Income of the Beneficiaries in Sta. Barbara, Iloilo
204	VI	Jimenea, Nadja V.	NFA, Iloilo City	MM-RD	UPV	Graduated	Consumers' Perception on the Quality of NFA Imported Rice in the Municipality of Zarraga
205	VI	Laud, Marie Girle R.	BPI, La Carlota City, Neg. Occ.	MM-RD	UPV	Graduated	Adoption of Rice Certified Seed Technology in Selected Barangays in Pototan, Iloilo
206	VI	Margallo, Marlon O.	NFA, Iloilo City	MM-RD	UPV	Graduated	Gender Role in Rice Postharvest Activities of Farmers in Selected Barangays in Pototan, Iloilo
207	VI	Margarico, Modesto, Jr. S.	PLGU, Iloilo City	MM-RD	UPV	Graduated	Assessment of the Swine Dispersal Livelihood Project of the Iloilo Provincial Agricultural Office
208	VI	Neturada, Felicitas M.	DA-RFU VI	MM-RD	UPV	Graduated	
209	VI	Ogatis, James Earl E.	DA-RFU VI	MM-RD	UPV	Graduated	
210	VI	Piansay, Eric P.	BAS, Capiz	MPM-RAD	ASoG	Graduated	
211	VI	Ramos, Mary Ann A.	ATI, RTC VI	MPM-RAD	ASoG	Graduated	Assessment of the Human Resource Capability In the Visayan Field Offices of the Bureau of Agriculture Statistics
212	VI	Resol, Rhea Christina G.	DA-RFU VI	MM-RD	UPV	Graduated	Evaluation of the Trainers' Training on Integrated Pest Management and Its Effect on the Technology Adoption of Rice Farmers
213	VI	Talabong, Mira H.	DA-RFU VI	MM-RD	UPV	Graduated	
214	VI	Villorente, Mavillo Z.	ATI, RTC VI	MM-RD	UPV	Graduated	Women Participation in the Integrated Pest Management Program in the Second District of Iloilo: Harnessing Women's Potentials in Technology Sharing
215	VI	Young-Abello, Erma T.	NFA, Iloilo	MM-RD	UPV	Graduated	Acceptability of Hybrid Rice Technology Among Farmers in the Province of Aklan
216	VII	Fuentes, Gertrudes S.	OPA - Bohol	MM-RD	UPV	Graduated	Economic Benefits of Tindahan ni Gloria Labandera (coconut Farmers Access Program)
217	VII	Gallardo, Samuel G.	ATI-RTC 7, Cebu City	MM-RD	UPV	Graduated	among the Poorest Barangays of Aklan
218	VII	Macalino, Pilar P.	OPA-Siquijor	MM-RD	UPV	Graduated	
219	VII	Sinoy, Ronald A.	PSA, Cebu City	MM-RD	UPV	Graduated	

220	VII	Lobrigo, Gerardo B.	CLGU, Tacloban City	MM-RD	UPV	Refund	
221	VII	Dado, Carlos P.	FIDA, Tacloban City	MM-RD	UPV	Graduated	The Role of Microcredit in the Abaca Weaving Industry of Lezo, Aklan
222	VII	Sullano, Glenda P.	NFA, Leyte	MM-RD	UPV	Graduated	The GMA Tindahan ni Gloria Labandera Rolling Store: Its Socio-economic Benefits among the Rural Poor of San Joaquin, Iloilo
223	VII	Sala, Fe V.	PLGU, Tacloban City	MM-RD	UPV	Graduated	
224	VII	Noya, Nida M.	PLGU, Tacloban City	MM-RD	UPV	Graduated	Effectiveness of Modified Swine Dispersal Program in Improving the Socio-Economic condition of its Recipients in the Province of Leyte
225	VII	Pajanustan, Dalmacio L.	ATI, Samar	MM-RD	UPV	Graduated	
226	VII	Sescon, Martha B.	PLGU, Maasin	MM-RD	UPV	Graduated	
227	VII	Sultan, Nenita G.	PLGU, Tacloban City	MM-RD	UPV	Graduated	Acceptability of Community Based Participatory Action Research (CPAR) Corn-Based Technology among Farmers in Barangay Sto. Niño, Capoocan, Leyte
228	VII	Tabinas, Mario B.	PLGU, Tacloban City	MM-RD	UPV	Graduated	
229	VII	Ultra, Loida	DA-RFU VIII/BPI, Catarman	Master's Program in Food Systems	UAP	Graduated	Food Balance Assessment of Selected Agricultural Commodities of Samar
230	VII	Villacorte, Jose L.	Tacloban National Agricultural School	MM-RD	UPV	Graduated	Effects of Mariculture Program on the Economic Condition of the Residents of Barangay Tinaugan, Basey, Samar
231	VII	Zantua, Clariza A.	CLGU, Tacloban City	MM-RD	UPV	Graduated	The Contribution of Farm Youth Exchange Scholars to Rural Development Efforts in Camarines Norte
232	IX	Acopiado, Armie	PLGU, Dipolog City	MM-RD	UPV	Graduated	Perception of the Municipal and Barangay Local Government Units of Zamboanga del Norte of the Proposed Institutionalization of Barangay Agricultural Workers
233	IX	Angon, Charlita J.	PCA, Pagadian City	MPM	XU-CDO	Graduated	Effectiveness of Fertilizer Support on Coconut Production under the coconut Rehabilitation Program in the Province of Zamboanga del Sur
234	IX	Ta-an, Arlene V.	PLGU, Dipolog City	MM-RD	UPV	Graduated	

235	IX	Tapales, Andres, Jr. S.	BAS, Dipolog City	MPM	XU-CDO	Graduated	Trend Analysis of Corn Production in the Province of Bukidnon CY 1998-2001
236	X	Acebedo, Alberto, Jr. C.	NFA - Ozamiz City	MPM	XU-CDO	Graduated	The Acceptability of Hybrid Rice Production in the Irrigated Rice Areas of Piaridel, Misamis Occidental CY 2000-2001
237	X	Aleria, Gay Nanette R.	DA-RFU X	MPM	XU-CDO	Graduated	Slaughterhouse Management and Sanitation of Cagayan de Oro City CY 2002
238	X	Ampong, Lilian O.	NMIC, CDO	MPM	XU-CDO	Graduated	Adaptation Level of Total Quality Productivity Management (TQPM) Approaches in Rice Farming: Its Production Impact
239	X	Andalan, Javier P.	ATI, Mis. Or.	MPM	XU-CDO	Graduated	Utilization of Multi-purpose Drying Pavements in Malaybalay City, Bukidnon
240	X	Ansale, Rolando M.	DA-RFU X	MPM	XU-CDO	Graduated	Barangay Livestock Breeding Loan Program (BLLP): The Case of 2000 Launched Guimariz Arc of Buenavista, Agusan del Norte
241	X	Balandra, Josef Raymundo V.	PLGU, Mis. Or.	MPM	XU-CDO	Graduated	
242	X	Barcelona, Angelita E.	NMIS - 7	MPM	XU-CDO	Graduated	
243	X	Daanoy, Arsellita M.	PSA - Mis Or	MPM	XU-CDO	Graduated	Trend Analysis of Rice Production in Rice Production in the Province of Bukidnon CY 1998-2001
244	X	Daanoy, Jorge J.	PSA	MPM	XU-CDO	Graduated	Mango Production Practices and Marketing Strategies: Impact on Productivity and Profitability CY 2001-2003
245	X	Del Gallego, Ma. Rowena V.	ATI-RTC, CDO	MPM	XU-CDO	Graduated	Adoption Level of Recommended Farming Practices on Vegetable Production: Its Impact on Yield
246	X	Flores, Judith R.	BPI, CDO	MPM	XU-CDO	Graduated	Occurrence of Pesticides in Various Vegetables in Selected Location of Region 10 from 1997 to 2001
247	X	Gementiza, Jocelyn A.	DA-RFU X	MPM	XU-CDO	Graduated	Production Practices and Marketing Approaches of Cashew Farmers in Lumbia, Cagayan de Oro City CY 2001-2002
248	X	Hojas, Roxana H.	DA-RFU X	MPM	XU-CDO	Graduated	Extent of Participation of Local Government Units in the Initial Stages of the Agriculture and Fisheries Modernization Program: The Case of Misamis Oriental
249	X	Jaraba, Teodosia D.	ATI-RTC, Iligan City	MPM	XU-CDO	Graduated	Corn Technology Adoption: Its Implications to Yield

250	X	Jaramillo, Amor R.	BFAR, Reg. X	MPM	XU-CDO	Graduated	Success and Failure of Selected Fish Sanctuaries in Region 10: Implications to Management Collaboration of Bureau of Fisheries & Aquatic Resources and the Local Government Unit
251	X	Jumalon, Alanita A.	DA-RFU X	MPM	XU-CDO	Graduated	Production Level Among Selected Potato Farmers in Bukidnon CY 2001
252	X	Laquia, Rose Susan G.	PLGU, CDO	MPM	XU-CDO	Graduated	The Acceptability of Hybrid Rice Among Small Farmers CY 2002-2003
253	X	Lauro, Rene C.	PSA - Buk	MPM	XU-CDO	Graduated	Farmers Utilization of Price Information on Agricultural Products in the Municipalities of Lantapan and Impasug-Ong in the Province of Bukidnon CY 2005
254	X	Lawanza, Papala F.	DA-Fisheries, Marawi City	MPM	XU-CDO	Graduated	Effectiveness of the Information Dissemination Strategies in the Implementation of DA Rice Program as Perceived by the Farmers of Lanao del Sur CY 1999-2000
255	X	Loking, Macario, Jr. D.	CLGU, Valencia, Bukidnon	MPM	XU-CDO	Graduated	Traditional and Rice-Fish Farming: A Productivity and Profitability Analyses
256	X	Maape, Eddie, Jr. C.	MLGU, Opol, Mis. Or.	MPM	XU-CDO	Refund	
257	X	Garay, Lorenzo C.	SRA, Maramag, Bukidnon	MM-RD	UPV	Graduated	Factors Influencing the Productivity of Sugarcane Planters in Bukidnon
258	X	Maglente, Marcos, Jr. A.	ATI-RTC, Iligan City	MPM	XU-CDO	Graduated	The Lakatan Production Industry in Lanao del Norte
259	X	Mondragon, Mary Ann B.	BPI, CDO	MPM	XU-CDO	Graduated	Pesticide Residues in Vegetables Collected from the Public Markets in Cagayan de Oro city
260	X	Navarro, Beverly M.	NFA - Cagayan de Oro	MPM	XU-CDO	Graduated	The Effectiveness of the Rice and Corn Fertilizer Assistance Program of Ozamiz City for the Year 2001
261	X	Neri, Luz Socorro E.	NFA, CDO	MPM	XU-CDO	Graduated	Sustainability for Farm Level Grains Center Project: The Case of Managok Multi Purpose Cooperative, Inc. Bukidnon
262	X	Obsioma, Beata Humilda O.	NMIS CO	MPM	XU-CDO	Graduated	Management Approaches of the Office of the city Veterinarian in Region 10 on Local Meat Inspection

263	X	Paje, Marjorie D.	NMIS, Reg. X	MPM	XU-CDO	Graduated	Microbiological Count of Chicken Meat in "AA" Accredited Poultry Dressing Plant Region X for CY 2004-2005
264	X	Para, Helen B.	NMIC, CDO	MPM	XU-CDO	Graduated	Functionality of Abattoir Development Projects in Region 10
265	X	Pepito, Roque S.	FIDA, CDO	MPM	XU-CDO	Graduated	Post Harvest Facilities Management Practices of Farmer Organizations: Implications to Access of Post Harvest Facilities CY 1999-2002
266	X	Simon, Roseminda T.	NFA, Misamis Or.	MPM	XU-CDO	Graduated	School on the Air Program on Fruits and Vegetable Processing Technology: Application and Sustainability
267	X	Sta. Elena, Mary Grace B.	DA-RFU X	MPM	XU-CDO	Graduated	Status of Food Processing Training Application among Rural Women in Three Municipalities of Misamis Oriental
268	X	Villegas, Philip	ATI, Mis. Or.	MM-RD	UPV	Graduated	
269	X	Zarate, Jocelyn O.	ATI-RTC, Mis. Or.	MPM	XU-CDO	Graduated	
270	XI	Alayton, Juvy T.	PCA, Mati, Davao Or.	MPM	XU-CDO	Graduated	
271	XI	Cordova, Rodney M.	PLGU, Tagum City	MPM	XU-CDO	Graduated	Production and Marketing Practices of Durian in Region XI for CY 2000-2001
272	XI	Dana, Manuel, Jr. T.	PFDA, Davao City	MPM	XU-CDO	Graduated	
273	XI	Ellana, Nestor B.	PFDA, Davao City	MPM	XU-CDO	Graduated	Demand Level of Bangus Baits in Tuna Transshipment Operation at Davao Fish Port Complex: Its Implications to the Bangus Industry of Mindanao
274	XI	Procianos, Percy M.	DA-RFU XI	MM-RD	UPV	Graduated	Acceptability of Biogas Technology Among Livestock Farmers in the 3rd District of Iloilo Province
275	XII	Embajador, Ray H.	DA-RFU XII	Master's Program in Food Systems	UAP	Refund	
276	XII	Vento, Mellany M.	NFA, Kidapawan City	MPM	XU-CDO	Graduated	The Cooperative Development Incentive Fund (CDIF) in Cotabato Province: Its Utilization CY 1996-2001
277	CARAGA	Canda, Aurelia M.	BAS, Agusan del Sur	MPM	XU-CDO	Graduated	Freshwater Fish Cage Farming Technology: Impact to Productivity
278	CARAGA	Celeste, Alberto M.	PLGU, Agusan Sur	MPM	XU-CDO	Graduated	Durian Farming Practices Implication to Production

279	CARAGA	Gabutan, Elven B.	DA-RFU XIII	MPM	XU-CDO	Graduated	Farmer Cooperatives' Management of Postharvest Facilities: Implications to Access and Utilization CY 2000-2002
280	CARAGA	Maglunsod, Ryan C.	Quedancor, Davao City	MPM	XU-CDO	Graduated	Quedancor Loan Assistance to Corn Farmers: Its Implication to Cost Variation of Inputs
281	CARAGA	Milan, Alice D.	CLGU, Bislig City	MPM	XU-CDO	Graduated	
282	CARAGA	Pedrosa, Presa A.	BAS, Agusan del Sur	MPM	XU-CDO	Graduated	Economic Advantages of Small Scale Irrigation System
283	CARAGA	Quilacio, Rhouela M.	BFAR, Reg. XIII	MPM	XU-CDO	Graduated	Success and Failure of Selected Fish Sanctuaries in Agusan del Norte Implications to Management Collaboration of Bureau of Fisheries & Aquatic Resources and Local Government Unit
284	CARAGA	Ramos, Johnny V.	PLGU, Agusan Sur	MPM	XU-CDO	Graduated	Perceived Level of Satisfaction on the Delivery of Services by the Agricultural Technologists (AT's) among Rice Farmers in Agusan del Sur during CY 2001 and First Cropping Season of CY 2002
285	CARAGA	Solano, Christine C.	NFA, Butuan City	MPM	XU-CDO	Graduated	
286	CARAGA	Suarez, Helen L.	BFAR, Butuan City	MPM	XU-CDO	Graduated	The Survival and Sustainability of Two Delected Sea Weeds Farms Cooperative of CARAGA Region
287	CARAGA	Suday, Ariel R.	BAS, Butuan City	MPM	XU-CDO	Graduated	Productivity and Profitability Analysis of Saba Banana Production in the Province of Agusan del Norte
288	ARMM	Marohom, Sacar D.	DAF-ARMV/ATI	MPM	XU-CDO	Graduated	Farmers' Adaptation Level on Modern Practices in Irrigated Rice Farming System: Taraka, Lanao del Sur

Annex B

List of EHRDP Scholars (YEAR 2008-2013)

EXPANDED HUMAN RESOURCE DEVELOPMENT PROGRAM (EHRDP) - (Year 2008-2013)

CENTER	Name (Last, First, Middle Name)	Agency/ Office	Degree Course	School	Status (Graduated or For Refund)	Thesis/Dissertation
1	CAR Aromin, Maximino R.	ATI-CAR	Development Communication	BSU	Graduated	Development of an On-line Course on Basic Beekeeping for the e-Exhnsion Program of the Department of Agriculture
2	CAR Lawagan, Sol	ATI-CAR	Agriculture and Fisheries	BSU	Graduated	Awareness of Farmers on Good Agricultural Practices in Tabuk City, Kalinga
3	CAR Balachawi, Genevieve K.	OMAG-Hingyon	Agriculture and Fisheries	IFSU	Graduated	Towards and Improved Implementation of the four Banner Programs: The Case of Agriculture in the Municipality of Hingyon, Ifugao
4	CAR Banhan, Marcelo I.	OMAG-Lagawe	Animal Science	NVSU	Graduated	Potential of Split-Feeding for Laying Hens
5	CAR Baral, Mary Ruth O.	Matonin, Mt. Province	Crop Science	NVSU	Graduated	Propagation of Stevia Rebaudiana Growth in Different Soil Substrates
6	CAR Baula, Yolanda B.	OMAG-Pinuukpuk	Rural Development	BSU	Graduated	Assessment of the Corn Industry in the Province of Abra
7	CAR Bolaoit, Herminia C.	OPAG-Abra	Rural Development	BSU	Graduated	Implementation of Project in Support to Organic Agriculture in Abra: An Analysis
8	CAR Buenaventura, Catherine V.	OPAG-Ifugao	Agriculture	NVSU	Graduated	The Community-Based Participatory Action Research (CPAR) Project the Ifugao Experience
9	CAR Buli-e, Bongbong L.	ATI-BSU	Development Communication	BSU	Graduated	Revisiting the e-Learning Course on Arabica Coffee Production of ATI-CAR
10	CAR Bulong, Marissa P.	OPAG-Ifugao	Crop Science	NVSU	Graduated	Soilless Substrates and Shading for High Yield and Good Quality Lettuce (<i>Lactuca Sativa L.</i>) in Screenhouse
11	CAR Daodacon, Carlito M. Jr.	ASIST, Abra	Agronomy	ISPSC	Graduated	Productivity of Corn Farms in the Province of Abra Crop Year (2010-2011)
12	CAR Donato, Fe G.	DA-FIDA-CAR	Community Development	BSU	Graduated	Operationalization of the Silk Industry as a Community Development Program in Kapangan, Benguet
13	CAR Fagyan, Hazel S.	OPAG-Mt. Province	Community Development	BSU	Graduated	Women's Participation and Decision Making Role on the Production and Product Development of Heirloom Rice in Sadanga, Mountain Province
14	CAR Gamommac, Cristela D.	OPAG-Mt. Province	Community Development	BSU	Graduated	Enhancing the Sugarcane Wine Industry in Sadanga, Mountain Province
15	CAR Ganotic, Ferdinand L.	KASC-Tabuk, Kalinga	Crop Science	ISU	Graduated	Low-input Technology: Its Implication to Lowland Rice Technology

16	CAR	Gapacan, Dennis G.	KASC-Tabuk, Kalinga	Forestry	ISU	Graduated	Early Growth Field Performance of Lipote (<i>Syzygium polyccephalooides</i> (C.B. Rob.) Merr.)
17	CAR	Garces, Carina S.	MAO-San Quentin, Abra	Rural Development	ISFSC	Graduated	Status of RBOs Under the Implementation of AFMA Program in the Municipality of San Quintin, Abra
18	CAR	Garcia, Marx Perfecto C.	BFAR, CAR	Environmental Management	CSU	Graduated	Assessment of Diversity of Macro Aquatic Species in Amburayan River in Kapangan, Benguet
19	CAR	Gumilam, Amerigo M.	Lubngan, Kalinga	Rural Development	KASC	Graduated	Rural-Based Organizations Involvement in Rural Development Projects in Lubugan, Kalinga, Benguet
20	CAR	Kimmayong, David L.	OPAG-Ifugao	Crop Science	IFSU	Graduated	Efficacy of Plant Juice and Bio-Inoculant on Seedling Growth and Development of Heirloom Rice
21	CAR	Latap, Nelson S.	IFSU-Ifugao	Environmental Sciences	IFSU	Graduated	Sustainability analysis of Carabao Logging in Quezon, Nueva Vizcaya, Philippines
22	CAR	Liberato, Milagros O.	San Quentin, Abra	Agronomy	ISFSC	Graduated	Ripening of Carabao Mango (Mangifera indica) Using Different Storage Techniques
23	CAR	Mariacos, Denver A.	OMAG, Kibungan	Rural Development	BSU	Graduated	Management of Communal Forests Occupied by Claimants in Bakun, Benguet
24	CAR	Oryan, Ceferino C.	OMAG-Barig, Mt. Province	Development Communication	BSU	Graduated	Conservation of Heirloom Rice in the Development of Barig, Mountain Province
25	CAR	Oyando, Arlene B.	ODC-Tabuk, Kalinga	Development Communication	KASC	Graduated	Cooperatives as Catalyst for Rural Development in the Province of Kalinga: An Organizational Performance Assessment
26	CAR	Pascua, Rodan P.	MAO- Sta. Marcela, Apayao	Crop Science	MMSU	Graduated	Response of Modern Upland Rice Varieties to Vermicompost Rates Grown in Sta. Marcela, Apayao
27	CAR	Pila, Roland B.	Lagawe, Ifugao	Agriculture and Fisheries	BSU	On Going	Fermented Giant Taro (<i>Alocasia macrorhiza</i>) as Primary Feed Ingredient for Muscovy Duck Feed
28	CAR	Pinos-an, Pedro C.	DA, RFU	Rural Development	BSU	Graduated	The Status of the Coffee Industry in Benguet
29	CAR	Ramos, Richard B.	MA-Luna, Apayao	Crop Science	MMSU	Graduated	Evaluation of Green Super Rice Lines as Influenced by Soil Fertility Management under Irrigated Lowland and Ecosystem in Luna, Apayao
30	CAR	dela Rosa, Jane B.	MA-Luna, Apayao	Crop Science	MMSU	Graduated	Growth and Yield Performance of Modern Rice Varieties Applied With Organic Fertilizer in Lowland Irrigated Ecosystem of Luna, Apayao

31	CAR	Saquing, Jill B.	IFSU-Ifugao	Rural Development	BSU	On Going	Determinants of Adoption Decisions of Organic Agriculture in Ifugao
32	CAR	Siloy, Veronica B.	ATI-BSU	Technology and Home Economics	BSU	On Going	Enhancing the Implementation of the Project Assistance for 4-H Clubs in CAR
33	CAR	Sotero, Jeffrey D.	OMAG-Atok, Benguet	Rural Development	BSU	On Going	Extent of Adoption of Mokusoku Technology to Vegetable Growers in Tublay, Benguet
34	CAR	Tapat, Virginia A.	RFU-CAR	Agronomy	BSU	Graduated	Growth and Yield Performance of Rice Grown under two moisture regimes in different Agro-Ecological Zones
35	CAR	Landes, Teofilo B.	DA-RFU	Rural Development	BSU	Graduated	Status of Arabica Coffee in the Highland Municipalities in Mountain Province
36	CAR	Tesoro, Rosemarie B.	DA-RFU	Rural Development	BSU	Graduated	Management and Marketing of Phillipine Native Chicken in the Province of Aklan
37	CAR	Valdez, Genevieve L.	IFSU-Ifugao	Animal Science	ISU	Graduated	Carcass Evaluation and Sensory Assessment of Processed "ETAG" of Selected Upgraded Wether Goats
38	CAR	Valencia, Jimmy D.	MAO-Licuan-Baay, Abra	Agronomy	ISFSC	Graduated	The Implementation of Agroforestry Integrated Pest Management Farmers Field School in Licuan-Baay, Abra
39	CAR	Villa, Noelita		Agriculture and Fisheries	BSU	For Refund	
40	CAR	Yogyog, Daisy B.	OMAG-Hungudan	Rural Development	BSU	Graduated	The agricultural delivery system and socioeconomic status of the farmers of Hungduan, Ifugao
41	I	Abulencia, Radio G	Urdaneta, Pangasinan	Veterinary Medicine	PSU	Graduated	Microbiological Assessment of Newly Slaughtered and Thawed Pork In City Wet Market in Pangasinan
42	I	Acosta, Marichu	Natividad, Pangasinan	Crop Science	PSU	Graduated	Effects of Different Methods of Application of Calcium Nitrate on the Growth and Yield of Tomato
43	I	Aguirre, Christopher	LGU, Laoag	Rural Development	MMSU	For Refund	
44	I	Agustin, Eva	DA-RFU III	Development Management	PSU-Lingayen	Graduated	Competency of the Agricultural Extension Workers in the Management of Rice Techno Demo Projects
45	I	Arado, Danilo V.	PAO, Ilocos Norte	Rural Development	MMSU	On Going	
46	I	Bacnat, Ma. Theresa	Batac City, Ilocos Norte	Rural Development	MMSU	Graduated	Evaluation of the 2005-2008 Farmers Led Extension Program in Ilocos Norte
47	I	Balauro, Nancy C.	LGU-Nueva Era, Ilocos Norte	Agriculture	MMSU	Graduated	Performance of Basmati Rice Varieties Applied with Vermicast and Vermifex Under Lowland condition

48	Basuel, Mila G.	LGU,- Bugallon, Pangasinan	Rural Development	TCA	Graduated	Performance of Agricultural cooperatives in the Second district of Pangasinan an Assessment Towards the Formulation of a Cooperative Development Program
49	Bustamante, Peter	Bamban, Pangasinan	Agriculture and Fisheries	PSU	Graduated	Growth Performance of Outplanted Physic Nut (<i>Jatropha Curcas L</i>) Under Varying Levels of Nitrogen and Water
50	Binala, Orlan C	PAO, Ilocos Norte	Agriculture and Fisheries	MMSU	Graduated	Supply Chain of Onion In Pangasinan: A Case Study
51	Carbonnel-Cobardo, Grace R.	Sta. Maria, Pangasinan	Agribusiness	CLSU	Graduated	Effectiveness of the FIELDS Program in Natividad, Pangasinan
52	Cases, Veronica	Natividad, Pangasinan	Crop Science	PSU	Graduated	
53	Casil, Ferdinand Jr.	LGU, Batac City, Ilocos Norte	Agricultural Engineering	MMSU	For Refund	
54	Catungal, Edilyn P.	San Fernando, Pangasinan	Crop Science	PSU-Lingayen	Graduated	Competency of Farmers Field School Corn Implementers in Pangasinan
55	Cornes, Imelda R.	RFO I, La Union	Agriculture	PSU	Graduated	Performance of the different Eggplant Varieties as Affected by Different Organic Fertilizer
56	Corpuz, Zeny C.	Sudipen, La Union	Environmental Science and Management	DMMMSU	Graduated	Effects of Contract Growing Piggery Projects In The Municipality of Sudipen
57	Dacapias, Maricel D.	ATI, La Union	Agriculture and Fisheries	PSU-OUOS	Graduated	The ATI School on the Air As An Alternative Method of Training
58	Diculen, Nelson C.	Batac City, Ilocos Norte	Rural Development	MMSU	For Refund	DECEASED
59	Fernandez-Valenzuela, Marvi	Lacac, Pangasinan	Crop Science	PSU	On Going	
60	Gabur, Jordan G.	ATI, Pangasinan	Agriculture and Fisheries	MMSU	For Refund	
61	Gacutan, Eric A.	Candon City, Ilocos Sur	Rural Community Development	DMMMSU	Graduated	Adaptability of Five (5) of Dragon Fruit Plant as Affected By The Application of Organic Fertilizers in Calamansi-Based Agroforestry System of DMMMSU, Bacnotan, La Union
62	Galvan, Rhoda	DA RFU III	Rural Community Development	MMSU	Graduated	Status of Integrated Pest Management-Farmer Field School Technology Adoption in the Corn Producing Areas in Region I
63	Gapuz, Ma. Liza B.	ATI, Pangasinan	Development Management	PSU-OUOS	Graduated	Implementation of te Youth in agriculture and Fisheries Scholarship Program of ATI

64	Jaramilla, Editha O.	BAS-Vigan, Ilocos Sur	Agricultural Engineering	MMSU	For Refund	Simulating Rice Yield Using Decision Support System for Agrotechnology Transfer (DSSAT) Model under Ilocos Condition
65	Javier, Cherie Ann T.	NMIS, Quezon City	Agriculture	PSU	Graduated	Microbiological Assessment of Newly Slaughtered Beef and Carabef in City Wet Market in Pangasinan
66	Laca, Joyito	ATI, Pangasinan	Development Management	PSU-OUS	Graduated	Productivity of Palaycheck System Adopters
67	Lagmay, Norma B.	LGU-Batac City, Ilocos Norte	Agriculture and Fisheries	MMSU	For Refund	
68	Llarenas, Rodel C.	LGU, Alcala, Pangasinan	Agriculture and Fisheries	CSU	For Refund

589	X	Orillo, Edgar S.	MAO, San Fernando, Bukidnon	Agriculture and Fisheries	CMU	On Going	

590	X	Pabellon, Rodulfo Jr.	LGU-Kinogitian, Misamis Oriental	Agricultural Science and Technology	MOSCAT	Graduated	Efficacy of Varying Levels and Brewed Potency of Vermi-Tea Application on the Growth and Yield of Eggplant (<i>Solanum melongena</i> L.)
591	X	Pace, Chyrellyn A.	PCA - 10, Cagayan de Oro City	Entomology	CMU	Graduated	Dynamics of Entomophagous Arthropod Population on Coconut and Biology of Potential Biocontrol Agent Against <i>Brotiopsis longissima</i> Gestro in Selected Areas of Bukidnon and Misamis Oriental
592	X	Pagobo, Dennis	DAR-Mis. Or., Cagayan de Oro City	Agricultural Science and Technology	MOSCAT	Graduated	Influence of Varying Tapping Times and Tapping Frequencies on the Latex Yield of Rubber (<i>Hevea brasiliensis</i>) Under Claveria Condition
593	X	Pakig-anggay, Neil S.	LGU-Lala, Lanao del Norte	Farming System	LDN	Graduated	The Potentials of Radish Intercropped with Mungbean Under Varied Solutions of Aerated Vermi Tea Applied at Different Frequencies
594	X	Para, Helen B.	DA-NMIS 10, Cagayan de Oro City	Agricultural Education	CMU	Graduated	Food Safety Management System in Accredited Meat Establishments in Northern Mindanao
595	X	Piti-Ilan, Jalandoni	LGU-OPAG-Lanao del Norte	Farming System	MSU-LNAC	Graduated	The Response of Narrow Strip Planting of Glutinous Corn (<i>Zea mays</i> , Cerafina) and Stringbeans (<i>Vigna sinensis</i> var. <i>sesquipedalis</i>) Fertilized with Organic, Inorganic and of Combination
596	X	Politiud, Eric Randy R.	MOSCAT, Claveria, Misamis Oriental	Crop Science	CMU	Graduated	Growth, Yield and Chemico-Nutritional Composition of Stevia (<i>Stevia rebaudiana</i> Bert.) in Response to Methods of Clonal Propagation and Growth Media
597	X	Rafisura, Beaullah Grace	LGU-Kitaotao, Bukidnon	Agriculture and Fisheries	CMU	Graduated	Effectiveness of Freshwater Aquaculture Technology Transfer Program on Poverty Alleviation Among the Fisheries in Bukidnon
598	X	Ravelo, Emma C.	PAO, Malaybalay, Bukidnon	Agricultural Extension	CMU	Graduated	Competencies, Organizational Commitment and Job Performance of Agricultural Extension Workers: Implications for Human Resource Development
599	X	Rupinta, Antonia	LGU-Pangantucan, Bukidnon	Agricultural Extension	CMU	Graduated	Effectiveness of Rural Improvement Club Programs among Women in Pangantuan, Bukidnon
600	X	Salva, Agripino	LGU-Baungon, Bukidnon	Agricultural Science and Technology	MOSCAT	Graduated	Drought Response of Organically-Grown Upland Rice (<i>Oryza sativa</i> L.) Varieties under Rainshelter Condition

601	X	Sangcopan, Sana A.	LGU-Salvador, Lanao del Norte	Farming System	LDN	Graduated	Performance of Glutinous Corn Intercropped with Mungbean Applied with Different Organic Liquid Fertilizer and Planting Distances
602	X	Saraos, Generosa B.	LGU-Dangcagan, Bukidnon	Agricultural Extension	CMU	Graduated	The Impact of Quarantine Stations on Livestock Production in Southern Bukidnon
603	X	Simacon, Jr. Rufino E.	LGU-Claveria, Misamis Oriental	Crop Science	MOSCAT	Graduated	Efficacy of Balance Fertilization on Corn (<i>Zea mays L.</i>) in Relation to Carbon Sequestration under Low Elevation
604	X	Soria, Kristina P.	LGU-Lantapan, Bukidnon	Agricultural Extension	CMU	Graduated	Impact of High Value Commercial Crop - Vegetable Production on the Nutritional Status of Upland Farmers in Lantapan, Bukidnon
605	X	Tabacon, Rebecca	LGU-Lala, Lanao del Norte	Farming System	MSU	Graduated	The Response of Peanut Intercropped with Green Onion to the Different Levels of Vermicast and Frequencies of Application
606	X	Tugano, Nylynn T.	OCA, Ozamis City	Farming System	MSU-LNAC	Graduated	The Performance of Ampalaya to Varied Organic Fertilizers and Indigenous Insect Pests Control
607	X	Turan, Maria Lilith M.	PAO, Malaybalay, Bukidnon	Agricultural Extension	CMU	Graduated	Values Orientation and Job Performance of Agricultural Extension Workers in the Province of Bukidnon
608	X	Vicente, Jessica A.	Balingasag, Misamis Oriental	Agriculture	MOSCAT	Graduated	Response of Bitter Gourd (<i>Momordica charantia</i>) to varying levels of Chicken Dung and NFT Concoctions
609	X	Villamil, Edwin B.	MAO, Claveria, Mis. Oz.	Agriculture	MOSCAT	Graduated	Physiological and Agronomic Responses of Corn (<i>Zea mays L.</i>) Applied with different Levels of Nitrogen Plus Bio-N Under Cassava
610	X	Vivicente, Marites	LGU-PVO-Tubod, Lanao del Norte	Animal Science	MSU-LNAC	Graduated	Growth Performance of "Cobb" Broilers Fed with Commercial Ration Mixed with Different Levels of Cassava (Manihot esculenta) Leaf Meal and Dietary Stone Grit Inclusion
611	X	Yecyec, Pepe I.	LGU, Claveria, Misamis Oriental	Animal Production	MOSCAT	Graduated	Growth Performance and Meat Quality of Broilers Fed with Different Sources of Lignocellulose with and without Probiotics
612	XI	Abiling, Roberto R.	RFU XI	Agriculture	USEP	Graduated	Screening of Legume Species for Total Mixed Ration as Ruminant Feed
613	XI	Aguanta, Lauro M.	LGU, Gov. Gen. Davao. Oz.	Extension Education	USEP	Graduated	Effectiveness of Palaycheck systems as an Extension Model Among Rice Farmers in selected Municipalities of Davao Oriental

614	XI	Aguillo, Teresita B.	PAGRO, ComVal	Agricultural Engineering	USEP	For Refund	
615	XI	Alcoser, Joel T.	FIDA, Davao City	Extension Education	USEP	Graduated	Management Practices and Organization of SouthEastern Philippines (USEP), Apokon Campus, Tagum City
616	XI	Almador, Pablita	CAO, Davao City	Extension Education	USEP	Graduated	The Perceived Leadership Styles Of The Municipal Agricultural Officers Of City Agriculturist Office In Davao City
617	XI	Anay, Samuel N.	LGU, Panabo City	Animal Science	USEP	Graduated	Performance of Upgraded Goats (A.Nubian X Boer X Native) Fed with Varying Levels of Harvested Cavendish Banana Bracts with Molasses
618	XI	Andrade, Reynante T.	LGU, Davao del Sur	Extension Education	USEP	Graduated	Service Delivery Characteristics and Total Quality Management Practices of Davao del Sur Provincial Agriculture Office: Basis for Total Quality Management Framework
619	XI	Anter, Jaime D.	PAGRO, ComVal	Horticulture	USEP	Graduated	The Influence of Different Concentrations of Benzyl Amino Purine Applied to Brown and Green Budding of PB 260 And RRM 600 Rubber Clones (<i>Hevea brasiliensis</i> Muell, Arg) Under Nursery Condition
620	XI	Aparece, Ariell L.	DNAS, ComVal	Extension Education	USEP	Graduated	Crop-Livestock Farming System For Sustainable Economic Empowerment For Small-Scale And Emerging Farmer: The Case Of Compostella Valley Province
621	XI	Ariola, Joey T.	LGU, Dujali, Davao N.	Animal Science	USEP	For Refund	
622	XI	Attos, Rondo S.	MAO, Cateel	Agriculture and Fisheries	USEP	For Refund	
623	XI	Auxillo, Marvin S.	CAO, Davao City	Extension Education	USEP	Graduated	Climate Change and Food Production among smallholder farmers: The case of Marilog District, Davao City
624	XI	Balico, Joemen B.	LGU, Maragusan, ComVal	Crop Science	USEP	Graduated	Diversity and Abundance of Arthropods in Cabbage Grown Under Conventional and Natural Pest Management Systems Under Maragusan, Comval Condition
625	XI	Bangoy, Renilda T	PAO, Tagum, Davao	Agriculture	USEP	Graduated	Effects of Different Levels of Vermicompost on the Growth and Rooting Performance of 'Robusta' Coffee Plagiotropic Cuttings Treated with Vermi Tea and Humic Acid Under Nursery Condition

626	XI	Barte, Agnes S.	CAO, Davao City	Extension Education	USEP	Graduated	An Assessment of the 4-H Youth Development program in Davao City
627	XI	Bayo, Jasmin C	DA-RFU	Agriculture	USEP	For Refund	
628	XI	Bermejo, Renato	LGU, New Bataan, Comval	Extension Education	USEP	Graduated	Assessment on the Influence of Farmers Field School to the Practices and Income of Cacao Farmers in Compostella Valley
629	XI	Besas, Ulysses P.	USP, Tagum	Horticulture	UPLB	Graduated	Biochemical and Physiological Changes in the Potassium Nitrate-Induced Release of Floral Bud Quiescence on Carabao Mango (<i>Mangifera indica</i> L.)
630	XI	Borbon, Annabelle L.	PAO, Tagum, Davao	Extension Education	USEP	Graduated	Profitability and Market Chain of Rice: The Case of Davao Del Norte
631	XI	Buates, Cecile G.	USEP, Tagum	Extension Education	USEP	Graduated	Effectiveness of Training Materials for Extension Programs as Perceived by Agricultural Extension Workers in Selected Local Government Units of Davao del Norte
632	XI	Bugawisan, Elenito P.	SPAMAST, Malita	Agriculture and Fisheries	VSU	Graduated	Production and Postharvest Performance of Strawberry (<i>Fragaria x ananassa</i>) Under Protected and Unprotected Type of Cultivation Using Different Potting Media and Number of Trifoliolate Leaves
633	XI	Cabang, Pedro B., Jr.	CAO, Davao City	Agriculture	USEP	Graduated	Production Status of the Commercial Swine Industry in Davao Region
634	XI	Cabatbat, Fermina	DA-RFU	Extension Education	USEP	Graduated	Effects of Different Mulching Materials to the Population, Dynamics, diversity and Management of Anthropod Pests and Weeds in Tomato
635	XI	Calimpong, Ronald B.	LGU, Montevista, Comval	Extension Education	USEP	For Refund	
636	XI	Cayme, Manalo S.	PAGRO, Comval	Agriculture	USEP	Graduated	Botanical Extracts for the Control of Eggplant Fuit and Shoot Borer (<i>Leucinodes orbonalis</i> Guenee)
637	XI	Constantino, Mari Ann M.	RFU, Davao City	Agribusiness Management	SP	Graduated	Assessment of Dairy Goat Development Program in Region XI
638	XI	Crispino, Ferdinand L.	PAO, Digos City	Business Management	SPAMAST	Graduated	Supply Chain Analysis of High Valued Vegetables in key producing areas in Davao Del Sur

639	XI	Dagpin, Judith G.	MAO, Lupon	Extension Education	USEP	Graduated	Impact Assessment of Diversified Farming System (DFS) Implemented by the Upland Development Programme (UDP) in Five (5) Upland Barangays in the Municipality of Lupon, Davao Oriental
640	XI	Dalisay, Christopher S.	PAO, Davao N.	Ag. Engineering	USEP	For Refund	Factors Affecting Sustainability of Barangay Food Terminal (BFT) Project in Third District of Davao City
641	XI	Danac, James Arly A.	CAO, Davao City	Agriculture and Fisheries	USEP	Graduated	The Response of Open-Pollinated Corn Varieties on the Varying Rate of Organic Fertilizer (Vermicast) Application
642	XI	Daquiz, Ciriaco G. Jr.	PAGRO, ComVal	Agriculture	USEP	Graduated	Performance of Irrigated Lowland Rice (<i>Oryza sativa</i>) Production under Different Irrigation Techniques in Sto. Tomas, Davao del Norte
643	XI	Degorio, Elmer B.	LGU, Sto. Tomas, Davao N.	Land and Water Management	USEP	Graduated	Socio-Economic Impact of 4-H Club Programs in Selected Municipalities in the Second District of Compostela Valley Province
644	XI	Del Pilar, Arnold C.	PAGRO, ComVal	Agricultural Engineering	USEP	For Refund	Response of Rubber (<i>Hevea brasiliensis</i> Muell.Arg.) Seedling to Vermicompost, Vermitea and Heading back under Polybag Nursery Condition
645	XI	Dumingsel, Helen G.	Mabini	Extension Education	USEP	Graduated	Participation of Women in the Socio-Economic Development of the Second Congressional District of Davao del Norte
646	XI	Edjic, Christopher	LGU, Monkayo, ComVal	Horticulture	USEP	Graduated	Potential Effects of the Varying Levels of Vermicast Against Fusarium Wilt of "Cavendish" Banana (MUSA CAVENDISH)
647	XI	Edradan, Vilma L.	LGU, Sto. Tomas, Davao N.	Extension Education	USEP	Graduated	Factors Associated with the Adoption and Effectiveness of Palaycheck System Among Farmers within Three Rice Producing Municipalities in the Second District of Davao del Norte
648	XI	Empanado, Ruben A. Jr.	LGU, Sto. Tomas, Davao N.	Agriculture	USEP	Graduated	Rooting Response of Cacao (<i>Theobroma cacao</i> L.) Plagiotropic Cuttings to Different Soaking Time and Concentration Levels of Alpha-Naphthalene Acetic Acid (ANAA)
649	XI	Escobar, Lorna M.	LGU, Davao del Norte	Extension Education	USEP	Graduated	Supply Chain of Cacao in Selected Municipalities in Davao Del Sur
650	XI	Esconde, Rowina T.	LGU, San Isidro, Davao Or.	Agriculture and Fisheries	USEP	Graduated	
651	XI	Fernandez, Rodolfo	LGU, Sta. Maria, Davao Sur	Agribusiness Development	SP	Graduated	

652	XI	Fullozo, Cristy P.	PAO, Davao N.	Crop Science	USEP	Graduated	Effect of Vermiculture Technologies on Major Insect Pests and Beneficial Arthropods of Corn (<i>Zea mays</i>) and Eggplant (<i>Solanum melongena</i> L.)
653	XI	Galvez, Glen L.	DNAS, ComVal	Extension Education	USEP	Graduated	Value Chain Analysis of Vegetable: The Case of Compostela Valley Province
654	XI	Garcia, Reynilo D.	USEP-Davao City	Devt Research Administration	USEP	Graduated	Technical Efficiency of FITS Centers and its Impact to Rice Production of Farmers in Region XI
655	XI	Gatus, Olivia D.	ATI, Panabo City	Extension Education	USEP	Graduated	Adoption Rate of Farmers Field School-Palaycheck System and Rice Yield Among Farmers in Davao del Sur
656	XI	Gecalle, Evelyn A.	USEP-Davao City	Agriculture and Fisheries	USEP	Graduated	Dimensions of Research and Development Management in Agriculture, Aquatic and Natural Resources in Davao Region
657	XI	Gonzaga, Julie T.	LGU, Sto. Tomas, Davao N.	Extension Education	USEP	For Refund	Forecasting the Adoption of Organic Farming in Davao City
658	XI	Haspe, Edgardo A.	CAO, Davao City	Environmental science and Management	USEP	Graduated	Carbon Stock Assessment of Small Hold Rubber Farm Project in Santa Cruz, Davao del Sur
659	XI	Ito, Ricardo R.	MAO, Sta. Cruz	Environmental Management	USEP-DC	Graduated	The Participation of Women in Corn Production in Davao City
660	XI	Jaca, Roy A.	CAO, Davao City	Agriculture and Fisheries	USEP	Graduated	Impact Assessment of Agricultural Training Institute (ATI) in Region XI on the Training of Trainers on the Performance of Agricultural Technicians in Rice Production
661	XI	Jimenez, Evangeline C.	ATI, Panabo City	Extension Education	USEP	Graduated	Performance of Breadfruit (<i>Artocarpus altilis</i> Parkinson Fosberg) Root Cuttings on different Growing Media and Fertilization under Nursery condition
662	XI	Jubane, Victoria B.	LGU, Montevista, ComVal	Horticulture	USEP	Graduated	Growth and Survival of Coconut Sprouts/Seedling Shoots as Affected by Potting Media and size of Sprouts Treated with Alpha-Naphthalene Acetic Acid under Nursery Condition
663	XI	Libres, Margarito M.	MAO, Com. Val.	Horticulture	USEP	Graduated	Impact Assessment of Mindanao Rural Development Program Community Fund for Agricultural Development (MRDP) CFAD to the Program Beneficiaries of Montevista, Comval, Province
664	XI	Lico, Norelyn D.	LGU, Montevista, ComVal	Extension Education	USEP	Graduated	

665	XI	Limbaga, Cesar A.	SPAMAST, Digos City	Horticulture	VSU	Graduated	Horticultural and Physiological Responses of Phycocolloid Fertilized Lettuce (<i>Lactuca sativa L.</i>) Grown Under Protected and Conventional Cultivation System
666	XI	Lingatong Jr., Ramon M.	CAO, Davao City	Extension Education	USEP	Graduated	Technical and Allocative Efficiency of Corn Farmers in Davao City
667	XI	Lopez, Aurelio M.	PAGRO, ComVal	Crop Protection	USEP	Graduated	Performance of Open Pollinated Corn Varieties Against Corn Ear Rot in Maragusan Compostela Valley Province
668	XI	Magallones, Maria Odessa	DOSCST, Mati	Agribusiness Management	DOSCT	Graduated	Supply Chain Analysis on Cacao in Davao Oriental
669	XI	Magdato, Fernando	USEP-Davao City	Extension Education	UPLB	Graduated	Farm tourism Management Among Selected Providers in Mindanao, Philippines
670	XI	Malayan, Christopher L.	LGU, Laak, ComVal	Crop Production	USEP	For Refund	Adoption of Sustainable Cocoa Production Practices among Farmers Field School Graduates under "Success Alliance" Program in Mati City, Davao Oriental
671	XI	Manalo, Rommel B.	LGU, Mati, Dvo. Or.	Agriculture and Fisheries	USP	Graduated	Growth Performance of Broilers Fed with Homemade Diet Supplemented with Malunggay (<i>Moringa oleifera Lam</i>) Extract
672	XI	Maravillas, Richard D.	SUC, Mati, Davao Or	Animal Science	USEP	Graduated	Mindanao Sustainable Settlement Area Development (MINSAD) Agriculture-Component Project in the Province of Davao del Norte; Its Impact and Sustainability
673	XI	Mena, Ronald O.	LGU, Davao del Norte	Extension Education	USEP	Graduated	Adoption of Improved Rice Production Practices Among Farmers in Selected Municipalities of Surigao del Sur
674	XI	Mercado, Leliosa T.	SOSSCI, Tagbinau, SDS	Extension Education	USEP	Graduated	The Effect of Vermicast of Different Substrate in the Performance and Growth of Cacao (<i>Theobroma cacao</i>) Seedlings
675	XI	Mirafuentes, Marietta B.	CAO, Davao City	Agriculture	USEP	Graduated	Adoption Level and Technology Atributes of ICT Component of Open Academy for Philippine Agriculture Project in Cagangangan Cybercom, Banaybanay, Davao Oriental
676	XI	Modesto, Teresita B.	USEP-Davao City	Extension Education	USEP	Graduated	Factors Affecting the Adoption and Sustainability of Practices Towards Organic Rice Farming in the Municipality of Brualio E. Dujali, Davao Del Norte
677	XI	Molato, Mary Jane N.	MAGRO, BED	Extension Education	USEP	Graduated	Dynamics of Anger Planter Operation Under Different Soil Types and Moisture Contents
678	XI	Montepio, Ronald C.	PAO, Tagum, Davao	Agricultural Engineering	USEP	Graduated	

679	XI	Muda, Rodrigo B.	MA, JA Santos, DDS	Marine Biology	SP	Graduated	Marine Rapid Resource Appraisal as Basis for the Establishment of Marine Protected Areas (MPA) in Jose Abad Santos, Davao del Sur
680	XI	Mutoc, Davis B.	DNAs, ComVal	Extension Education	USEP	Graduated	Commercialization of Smallholder Farmers: Determinants and Welfare Outcomes
681	XI	Navarro, Rey M.	LGU, IGACOS	Rural Development	USEP	Graduated	Upstream Strategic Framework of Barangay Food Terminal (BFT) Project: The Case of Island Garden City of Samal
682	XI	Oguio, Fe G.	CAO, Davao City	Extension Education	USEP	Graduated	Knowledge and Practices on Safety Use of Pesticides Among Cacao Farmers in Davao City
683	XI	Omboy, Arlyn	SPAMAST, Digos City	Agriculture and Fisheries	RMC	Graduated	Level of Acceptability of Tart with Different Flavored Seaweed-Based Fillings: Basis for Product Development Plan
684	XI	Oray, Cheryll B.	DOSCST, Mati	Agribusiness Management	Cmu	Graduated	Supply Chain Analysis on Native Chicken in Davao Oriental
685	XI	Orbuda, Joel R.	LGU, San Isidro, Davao Or.	Extension Education	USEP	Graduated	Impact Assessment of the Diversified Farming System (DFS) Implemented by the Upland Development Programme (UDP) in Municipalities of Second District of Davao Oriental
686	XI	Owanes, Bonifacio P.	PAO, Mati	Agricultural Engineering	USEP	For Refund	
687	XI	Paulin, Sunshine G.	MAO, Monkayo	Agricultural Engineering	USEP	Graduated	Soil Loss and Fertility Mapping of selected Corn Areas in Monkayo, Compostela Valley
688	XI	Pintor, Laureano M., Jr.	LGU, San Isidro, Davao Or.	Agriculture	USEP	Graduated	Management Practices for the Control of Cacao Pod Rot Caused by Phytophthora palmivora Butler in San Isidro, Davao del Norte Condition
689	XI	Potenciano, Estrella L.	LGU, New Bataan, ComVal	Extension Education	USEP	Graduated	The Palay Check System Among Rice Farmer's Field School Graduates in the First District of Compostela Valley Province
690	XI	Prieto, Oliver M.	MAO, Malatag, DDS	Agribusiness Management	SP	Graduated	Influence of Barangay Food Terminal (BFT) on Economic Intensification of Local Agro-Business Enterprise in Davao del Sur
691	XI	Ramo, Dennis C.	Monkayo, ComVal	Agriculture	USEP	Graduated	Efficacy of Metarhizium anisopliae (Metsch) against Coconut Leaf Beetle, Brontispa longissima (Gestro)
692	XI	Rebuta, Maryann A.	FIDA, Davao City	Agriculture and Fisheries	USP	Graduated	Factors Affecting the Production the High Quality Fiber Among Abaca Farmers of Davao Oriental

693	XI	Reyes, Ildefonsa L.	LGU, Davao Oriental	Extension Education	USEP	Graduated	Factors Affecting the Service Delivery of the Municipal Agriculture Office: The Case of First Congressional District of Davao Oriental
694	XI	Reyes, Marvin C.	OPA, Digos, Davao S.	Agribusiness	SP	Graduated	Assessment of Agribusiness Support System of the Department of Agriculture in Davao del Sur
695	XI	Sanchez, Juna S.	PAGRO, Davao Norte	Animal Science	USEP	Graduated	Dry Matter Yield and Nutrient Composition of Napier (<i>Pennisetum purpureum</i>) Grown in Combination with Different for Age Legumes and Fertilizer Application
696	XI	Sánchez, Ofelia A.	ATI, Panabo City	Agriculture and Fisheries	USEP	For Refund	
697	XI	Sanoria, Zosimo V.	LGU, Davao City	Extension Education	USEP	Graduated	Analysis by the Agricultural Dimensions on the Implementation of Enhance Agricultural Practices among Farmers in Third Congressional District of Davao City
698	XI	Seville, Macaria	PAGRO, Comval	Rural Development	USEP	For Refund	Deceased
699	XI	Siaboc, Adin B.	LGU, Nabunturan	Horticulture	USEP	Graduated	Nutritional Content and Sensory Evaluation of Organic Coconut Sugar and Sap
700	XI	Simene, Rolando S.	PAGRO, Comval	Horticulture	USEP	For Refund	
701	XI	Tambis, Lilibeth N.	PACO, Davao N.	Extension Education	USEP	Graduated	Efficiency of Agricultural Technologists on the Implementation of Agricultural Programs Base on the Response of the Farmers of Third Congressional District, Davao City
702	XI	Tumambing, Renerio M.	LGU, Manay, Davao Or.	Extension Education	USEP	Graduated	Socio-Economic Impact of Diversified Farming System (DFS) of the Upland Development Programme (UDP) to the Upland Farmers of Manay, Davao Oriental
703	XI	Valdez, Estelita Pilar M.	CAO, Davao City	Agriculture and Fisheries	USEP	Graduated	Farmers' Perception of the Impact of Climate Change in Rice Production
704	XI	Valdueza, Remelyn C.	PAGRO, ComVal	Agricultural Engineering	USEP	For Refund	
705	XI	Villaruz, Rechon A.	LGU, San Isidro, Davao Or.	Agricultural Engineering	USEP	Graduated	Assessment of Soil Erosion Under Different Cacao Cropping systems in Municipality of San Isidro, Davao del Norte
706	XI	Zacarias, Lea M.	FIDA, Digos, Davao del Sur	Environmental Resource Management	USEP	Graduated	Potential of Abaca-Agroforestry Project in Mitigating Climate Change
707	XI	Zamora, Richel E.	LGU, Davao City	Extension Education	USEP	Graduated	Adoption of Recommended Corn Production Practices Among Farmers in Selected Corn Production District of Davao City

708	XII	Abrazado, Angelita F.	OPAG-Amas	Rural Development	USM	Graduated	Benefits from the Barangay Food Terminal (BFT) Program of the Department of Agriculture in Region 12
709	XII	Acoy, Rogaya Salik	LGU, Kabacan	Agriculture and Fisheries	USM	Graduated	Poverty Incidence in the Municipality of Arakan, North Cotabato
710	XII	Alba, Mitzi Aileen A. Martinez	USM, N. Cot.	Rural Development	USM	Graduated	Socio-Economic Contribution of Multi-Purpose Cooperative to Rural Development in the Province of North Cotabato
711	XII	Allera, Jean C.	MA, Maasin, Sarangani	Agricultural Science and Technology	SKSU	For Refund	
712	XII	Alonso, Cherubin M.	OPA, SK	Agricultural Science and Technology	SKSU	Graduated	Planting System and Rates of Vermicompost on Rainfed Lowland Rice
713	XII	Amil, Maimona M.	RFU XII, Koronadal	Agriculture and Fisheries		Graduated	Evaluation of Different Rates and Frequencies of Application of Vermi Tea Against Major Insect Pests of Tomato (<i>Lycopersicum esculentum</i> Mill.)
714	XII	Ango, Abdulkadir I.	RFU-XII	Agricultural Science and Technology	SKSU	Graduated	Production and Marketing Systems of Coffee in Sultan Kudarat
715	XII	Asinas, Shiela Marie M.	LGU, Alamada Cot.	Rural and Economic Development	USM	Graduated	Impacts of Potable Water System Level III Project at baranggay Kitacubong and Mirasal, Alamada, Cotabato
716	XII	Atok, Geoffray R.	USM	Animal Science	USM	Graduated	Effect of Housing Type, Different Forage Diets and Climate Variables on the Productivity and Welfare of Organically Grown Goats
717	XII	Aton, Marissa T.	LGU, Kidapawan	Crop Protection	USM	Graduated	Occurrence, Abundance and Biological Control of Coconut Leaf Beetle (<i>Brontispa longissima</i> Gtetro) in Kidapawan /city)
718	XII	Baldera, Amanda A.	RFU	Crop Science		Graduated	Development of Rapid Technologies of Composting and its Effects on the Growth and Yield of Pechay
719	XII	Bangoy, Nally S.	OPAG-Amas	Rural Development	USM	Graduated	Philippine Coconut Authority (PCA) Coconut Seedlings Dispersal Program and its Contribution to Poverty Reduction in Davao Del Sur
720	XII	Barredo, Marie Eden B.	LGU, Alamada Cot.	Rural Extension Development	USM	Graduated	The Performance of DA-LGU Agricultural Extension Workers in the Municipality of Alamada, North Cotabato
721	XII	Batobalani, Joan M.	PAO, S. Cot.	Agricultural Science and Technology	SKSU	On Going	Development of Village Level Electric Motor Driven Coffee (Coffee spp.) Depulper-Huller

722	XII	Beldia, Jessie V.	ATI, Tantangan	Extension Education	SKSU	Graduated	Status, Trends and Prospects of Mango Industry in SOCCSKSARGEN
723	XII	Beldia, Shirley L.	ATI, Tantangan	Rural Extension Development	NDMU	Graduated	Status and Prospects of Mango Industry in SOCCSKSARGEN
724	XII	Binoya, Pedro Elorde	LGU, Pikit	Rural Development	USM	Graduated	Factors Associated to the Attainment of Peace and Development in the First District of the Province of Cotabato
725	XII	Bred, Rezardo L.	LGU, Pres. Roxas	Rural and Economic Development	USM	Graduated	Effectiveness of Community Fund for Agricultural Development (CFAD) Sub-Project Implementation in President Roxas, Cotabato
726	XII	Brunio, Siony S.	SKSU, Tacurong	Extension Education	USM	Graduated	Effectiveness of Livestock Extension Service Providers in Region XII
727	XII	Cadungog, Arlene S.	LGU, Midsayap	Crop Protection	USM	Graduated	Resistance of Corn (<i>Zea Mays</i>) Germplasm to Corn Borer (<i>Ostrinia furnacalis</i> Guenee)
728	XII	Cañolas, Mary Joy S.	USM	Rural Development	USM	Graduated	Influence of the Carabao Development Program (CDP) on Poverty Alleviations in the Rural Farming Communities in Region XII
729	XII	Castillo, Andie B.	LGU, Tantangan	Agricultural Science and Technology	SKSU	Graduated	Organic Farming Strategies for Sustainable Lowland Rice Seed Production
730	XII	Cutamora, Paz A.	City Agri. Office	Agricultural Science and Technology	SKSU	Graduated	Growth and Yield Response of Adlai (<i>Coix lacryma-jobi</i> L.) on Vermicompost and Various Liquid Organic Extracts
731	XII	Dagundon, Amelita V.	MAO, Lambayong	Agriculture and Fisheries	SKSU	Graduated	Rapid Multiplication of Bamboo (<i>Bambusa</i> spp.) Varieties using levels of Anaa as Rooting Hormone
732	XII	Delcano, Rolando L.	MAO, Maitum, SP	Agricultural Science and Technology	SKSU	For Refund	
733	XII	Delco, Mitos D.	SKSU, Tacurong	Extension Education	USM	Graduated	Farmworkers' Pest Control Practices in Irrigated Rice: Effects on Their Health Status
734	XII	Deypalan, Lodifel C.	LGU	Agricultural Science and Technology	SKSU	Graduated	Insect Pest and Disease Severity Incidence of Open Pollinated White Maize (<i>Zea mays</i>) as Influenced by Organic Fertilicides under Natural Environment
735	XII	Dimasingkil, Janice Flor	LGU, Kabacan	Rural and Economic Development	USM	Graduated	Extent of Households' Adoption on Waste Segregation in Kabacan Municipality, Cotabato Province
736	XII	Dizon, Julie M.	LGU, Norala	Agricultural Science and Technology	USM	Graduated	Potentialities of Vermicast as Feed supplement on a three-Way Crossed chicken (Paraoakan x Kabir x Sasso/Cobb) Raised under Free Range System

737	XII	Duka, Jeannie U.	USM	Rural Development	USM	Graduated	Level of Adoption of Palaycheck System in Region XII
738	XII	Dulay, James V.	LGU, Arakan	Agriculture and Fisheries	USM	Graduated	Effectiveness of Strategies Adopted by Land Utilization Program for Sustainable Livelihood of Arakenos (Lupa) in Arakan, Cotabato
739	XII	Ele, Julius Jerome G.	USM	Agricultural Science	USM	Graduated	Production Performance and Immune Response of Broilers Chickens with Mangosteen Rind Powder
740	XII	Espejo, Nesmari S.	LGU-Kidapawan	Extension Education	USM	Graduated	Socio-Economic Contributions of Oil Palm Production Among Oil Palm Growers in Kidapawan City
741	XII	Eusala, Cheryl L.	LGU, Makilala	Rural and Economic Development	USM	Graduated	The Economics of Rubber Nursery Operation in Makilala Cotabato
742	XII	Falloran, Jocelyn R.	LGU, Midsayap, Cot.	Rural and Economic Development	USM	Graduated	Microfinance Development in Midsayap, Cotabato
743	XII	Flamiano, Remedios S.	MSU, Gen San	Horticulture	USP-Togum	Graduated	A Modified Yoshida Medium to Study Rice - Herbaspirillum seropediae Interaction
744	XII	Gabriel, Gretchen P.	MA, Tampakan, SK	Agricultural Science and Technology	SKSU	For Refund	
745	XII	Guerrero Jr., Marcelino N.	LGU, Lambayong, SK	Agriculture and Fisheries	SKSU	Graduated	The Level of Awareness on Farmers Perceived Effect of Climate Change in the Municipality of Pikit, Province of Cotabato
746	XII	Guerrero, Rosario D.	LGU, Pikit	Public Administration	USM	Graduated	The Level of Awareness of Farmers' Perceived Effect of Climate Change in the Municipality of Pikit, Province of Cotabato
747	XII	Guevarra, Janeth Lorraine	LGU, Tampakan	Agriculture and Fisheries	SKSU	Graduated	The Level of Awareness on Farmers Perceived Effect of Climate Change in the Municipality of Pikit, Province of Cotabato
748	XII	Guiang, May A.	ATI, Tantangan	Rural and Economic Development	USM	Graduated	Assessment on the Implementation of the 4-H Youth Development Program in Region XII
749	XII	Hitalia, Marissa C.	SKSU, Tacurong	Extension Education	USM	Graduated	Effectiveness of Farmers Field School on the Productivity of Irrigated Lowland Rice Farmers in Regiono XII
750	XII	Ibesate, Rosario V.	LGU, Midsayap, Cot.	Agriculture and Fisheries	USM	Graduated	Effect of Plant Concoctions Sprayed at Various Intervals for the Control of Eggplant Fruit and Shoot Borer (<i>Leucocinodes orbonalis</i> , Guenee)

751	XII	Jomuad, Josalyn T.	RFU XII, Koronadal	Agricultural Science and Technology	SKSU	Graduated	Rapid Multiplication Techniques of White Potatoes (<i>Solanum tuberosum Linn.</i>) as Influenced by Different Levels of Vermicomposts as Potting Media
752	XII	Kusin, Zainodin M.	CCSPC, Cot. City	Agricultural Science	USM	Graduated	Survey of Pests and Diseases and Cultural Management of Rice and Taro and Bacteria Leaf Blight and Taro Leaf Blight Management in Intermittently Flooded Areas of Tamontaka, Cotabato City, Maguindanao Province
753	XII	Larios, Nelson	LGU, Sen Ninoy Aquino	Crop Protection	USM	Graduated	Growth and Yield of Rice (Kasagpi) as influenced by Different Weed Control Measures Under Senator Ninoy Aquino Condition
754	XII	Lazaro, Maricel D.	LGU, Tantangan	Agricultural Science and Technology	SKSU	Graduated	Efficacy of Agrowaste in the Production of Charcoal Brisquette using Different Levels of Cassava Starch as Binder
755	XII	Magaway, Cyprian F.	RFU-XII	Agricultural Science and Technology	SKSU	Graduated	Post Harvest Losses of Fresh Fruit Bunches (FFB) of Oil Palm in Sultan Kudarat
756	XII	Magaadaro, Rhalyn B.	OPAG-No. Cot	Rural and Economic Development	USM	Graduated	An assessment of the Community-based Participatory Action Research (CPAR) Field Implementation in Senator Ninoy Aquino, Sultan Kudarat and M'ing, Cotabato
757	XII	Malasador, Aileen B.	MACO, Tboli, S. Cot.	Agricultural Science and Technology	SKSU	Graduated	Mild Yield of Dairy Cowfed with Varying Levels of Corn Hull Silage and Moringa Leaf Meal
758	XII	Mangindra, Nasser S.	LGU, Lambayong, SK	Rural and Economic Development	NDMU	Graduated	An Assessment of the IPM FFS Program
759	XII	Miguel, Eric A.	Koronadal	Rural and Economic Development	USM	Graduated	Production Performance of Rapid Seeds Supply Financing Program (RASSFIP) Beneficiaries in Koronadal, So. Cot.
760	XII	Montefalcon, Camilo	OPAG- Sarangani	Crop Protection	USM	Graduated	Comparative Resistance of Tomato (<i>Lycopersicum esculentum</i> , Miller) Varieties to Major Insect Pests
761	XII	Nebreja, Alicia Rose D.	All, Tantangan	Extension Education	SKSU	On Going	
762	XII	Pagarigan, Gerry R.	All, Tantangan	jomuad	SKPSC	For Refund	
763	XII	Patti, Norodin G.	LGU, Lambayong	Agricultural Science and Technology	SKSU	Graduated	Submergence-Tolerant Rice Varieties as Influence by Plant Spacing

764	XII	Pasao, Perla P.	CCSPC, Cot. City	Agriculture and Fisheries	USM	Graduated	The Effect of Different Herbs on the Sensory Characteristics of Frankfurter Sausage
765	XII	Porquiado, Dindo M.	LGU, Magpet	Rural and Economic Development	USM	Graduated	The Implementation of Gulayan sa Brangay Project of the Local Government Unit of Magpet, Cotabato
766	XII	Samson, Jovy M.	OPAG-SK	Institutional Development & Management	SKSU	Graduated	The Oil Palm Industry in Region XII: An Analysis of Value Chain Management
767	XII	Siao, Lucky V. Jr.	PAO, Sarangani	Agricultural Science and Technology	SKSU	For Refund	
768	XII	Sioco, Christopher P.	LGU-Tampakan	Agricultural Science and Technology	SKSU	Graduated	Temporal Districution and Colonization of Insect Pests of Adlai Crop Under Natural Environment
769	XII	Souribio, Elanie N.	ATI, Tantangan	Rural and Economic Development	USM	Graduated	Performance Assessment of Agricultural Training Institute in Region XII
770	XII	Suleik, Gaphor P.	LGU, Pikit	Crop Protection	USM	Graduated	Competitive Ability of Rice (<i>Oryza Sativa, L.</i>) Against Weeds as Influenced by Cultivars and Weed Control Durations
771	XII	Tayapad, Charity S.	LGU, Kidapawan City	Rural and Economic Development	USM	Graduated	Socio-Economic Contributions of Rubber Production Among Rubber Farmers in Kiddapawan City
772	XII	Tomaro, Ma. Pura	LGU-Tampakan	Agricultural Science and Technology	SKSU	Graduated	Biochemical Potential of Coconut Water as Promotant of Growth and Yield of Tomato (<i>Lycopersicum esculentum, Linn.</i>)
773	XII	Torres, Jocelyn F.	RFU-Amas	Extension Education	USM	Graduated	The Postharvest Program of the Department of Agriculture in the Corn Cluster Areas of Region XII
774	XII	Torres, Rene A.	ATI, Tantangan	Extension Education	USM	For Refund	
775	XII	Velasco, Winny M.	LGU, Columbio	Agricultural Science and Technology	USM	Graduated	Influenced of Various Potting Media and Vermitea on the Survival of Tissue-Cultured Lakatan Meriplants
776	XII	Verdeblanco, Helen T.	LGU, Antipas	Rural and Economic Development	USM	Graduated	Socio-Economic contributions of Oil Palm Production in Antipas, North Cotabato
777	XII	Villanueva, Ruel L.	PAO, So. Cot.	Agriculture and Fisheries	USM	Graduated	Loan Repayment Performance Assessment of the Sikat Saka Program Beneficiaries in Cotabato Province

778	XII	Ygay, Rey L.	LGU, Midsayap, Cot.	Crop Protection	USM	Graduated	Efficacy of Varying Population Densities of <i>Trichogramma japonicum</i> Ashmea Against Rice White Stem Borer, <i>Scriophaga innotata</i> Walker Under Midsayap, North Cotabato Conditions
779	CARA GA	Alvez, Cynthia S.	SDSSU, Tagbina, SDS	Agriculture and Fisheries		Graduated	
780	CARA GA	Amista, Vergenita	OMA, RTR, ADD	Crop Science	CSU	Graduated	
781	CARA GA	Andig, Felomino B.	OMA, Las Nieves	Horticulture	USEP	Graduated	
782	CARA GA	Aparicio, Yazmin	OMA, RTR, ADD	Crop Science	CSU	Graduated	
783	CARA GA	Auxtero, Tijani B.	LGU, Agusan del Norte	Crop Science	CSU	Graduated	Population Pattern of Rice White Stem Borer (<i>Scriophaga innotata</i> Walker) and its Natural Enemies amidst Climate Change
784	CARA GA	Bangalisan, Maria Luz C.	OPAG, Patin-City, Prosperidad Bayugan	Crop Science	CSU	Graduated	
785	CARA GA	Bausing, Elena	CSU, Ampayon, Butuan	Crop Science	CSU	Graduated	
786	CARA GA	Campos, Genalyn	OMA, Esperanza	Crop Science	CSU	Graduated	
787	CARA GA	De los Santos, Joseph L.	MAO, Carmen, ADS	Environmental Management	CSU	Graduated	
788	CARA GA	Del Agua, Raul M.	MLGU, Kitcharao, Agusan del Sur	Management	FSUU	Graduated	Agricultural Management Program and Climate Change towards Farmers Productivity
789	CARA GA	Dollano, Lourd Anthony O.	Caraga State University	Crop Science	CSU	For Refund	
790	CARA GA	Duero, Ale Boy U.	OMA, Kitcharao	Crop Science	CSU	For Refund	
791	CARA GA	Endico, Maricel C.	OMA, Butuan City	Agriculture and Fisheries	CSU	Graduated	
792	CARA GA	Gemina, Marianita S.	OMA, Butuan City	Agriculture and Fisheries	CSU	Graduated	
793	CARA GA	Himarangan, Ronald	OMA, Mainit	Crop Science	CSU	Graduated	

794	CARA GA	Laguna, Violeta T.	SCAT, ADS	Crop Science	CSU	Graduated	Effects of Organic Fertilizer in the Incidence of Rice Pests, their Natural Enemies and Grain Qualities of NSIC Rc128 Under Remedios T. Romualdez, Agusan del Norte Conditions
795	CARA GA	Lumapas, Mary Ann	OMA, RTR, AND	Crop Science	CSU	Graduated	
796	CARA GA	Maniliguez, Reggie T.	OMA Mainit	Crop Science	CSU	Graduated	
797	CARA GA	Nalam, Pedrito S.	LGU, Tubay, ADD	Environmental Management	CSU	Graduated	
798	CARA GA	Quico, Elsa	OMA, Cantilan	Veterinary Medicine	CMU	Graduated	Decomposing Enhancers on Organic Composting as Alternative Source of Fertilizer
799	CARA GA	Ronquillo, Ariston O.	SDSSU, Tagbina, SDS	Agriculture and Fisheries	FSUU	Graduated	
800	CARA GA	Sabanpan, Cecelia	OMA, Butuan City	Agriculture	CSU	Graduated	Response of Different Upland Rice Varieties to Balance Fertilization Strategy in the Municipality of Kicharaao
801	CARA GA	Salvador Sr., Romulo C.	OMA, Butuan City	Agronomy	CMU	Graduated	
802	CARA GA	Tare, Joven Z.	SDSSU, Agusan del Sur	Forest Resources Management	CMU	Graduated	Variation of Rooting Performance of Molave (<i>Vitex parviflora Juss</i>) Cuttings Under Various Factors in Non-Mist Propagation
803	CARA GA	Valenzuela, Delia O.	Rosario, Agusan del Sur	Agriculture and Fisheries	BSU	Graduated	
804	ARMM	Arakama, Nursima	SUC, Jolo	Agricultural Science	USM	Graduated	Assessing the extent of NIA assistance to encourage active participation and acceptance/sustenance of farming practices designed in the operation and maintenance of these irrigation system
805	ARMM	Baragona, Amina Pampa	Marawi City	Farming System	MSU For Refund		
806	ARMM	Basser, Cecilia	LGU, marawi city	Farming System	MSU-LNAC	Graduated	The Response of Glutinous Corn Intercropped with Mungbean to the Different Distances of Planting and Varied Levels of Vermicast Application
807	ARMM	Belongan, Siya B.	simuay	Rural Development	CMU	Graduated	The Ginintuang Masaganang Ani (GMA) Rice Program in ARMM
808	ARMM	Buisan, Pasigan	SUC, cotabato city	Agricultural Science	CCSPC	Graduated	Disease Management of Indigenous Rice Cultivars using Organic Pesticides in Brackish Areas

809	ARMM	Cortez, Marcelina R.	Marawi City	Rural and Economic Development	USM	Graduated
810	ARMM	Kempa, Omar M.	RFU, ARMM	Agricultural Extension	CCSPC	For Refund
811	ARMM	Lolos, Aida M.	cotabato city	Rural and Economic Development	USM	Graduated
812	ARMM	Macabago, Mapiama S.	simuay	Rural Development	CMU	Graduated
813	ARMM	Magatang, Amer B.	marawi city	Agriculture	USM	Graduated
814	ARMM	Malawani, Pisingayo A.	Marawi City	Agricultural Extension	CMU	For Refund
815	ARMM	Manalocon, Soraya M.	Piagapop, LDS	Farming System	MSU	For Refund
816	ARMM	Oma, Omar B.	Marawi City	Agricultural Education	CMU	Graduated
817	ARMM	Panday, Samsudin S.		Agricultural Extension	USM	Graduated
818	ARMM	Pendaliday, Abonawas	SUC, cotabato city	Forestry	USM	Graduated
819	ARMM	Sappalani, Ganh I.	Tawi-Tawi	Agriculture	CCSPC	Graduated
820	ARMM	Te, Alfreda	Marawi City	Agricultural Education	CMU	Graduated
821	NCR	Allig, Ana B.	Kalinga	Agriculture and Fisheries	UP-Diliman	For Refund
822	NCR	Badua, Aldrin	PhilMech	Rural Development	CLSU	Graduated
823	NCR	Balisang, Charlotte S.	Kalinga	Rural Development	UP-Diliman	For Refund
824	NCR	Calica, Gigi B.	QC	Economics	UST	Graduated

The Effectiveness of Corn Research and Development Project in ARMM

Agrikulturing MAKAMASA - Postharvest Component, Its Implementation in Lanao del Sur

Disease Incidence of Coffee Leaf Rust (*Hemileia vastatrix* Berk and Br.) in Maguindanao Province and its Management with Organic Fungicides

A Causal Model on Research productivity Among Regional Integrated Agricultural Research Centers (RIARCS's) in Mindanao

Factors Affecting the Utilization of Rice Combine Harvester in the Province of Isabela

Value Chain Analysis Towards an Integrated Bulk Handling System from Manila and Cebu to Manila and Cebu

825	NCR	Dacillo, Rhona G.	QC	Community Development	UPLB	For Refund	
826	NCR	Gasmen, Andrew D.	QC	Extension Education	UPLB	Graduated	Innovation System and Rural Advisory Services in the Organic Agriculture Supply Chain in Negros Occidental, Philippines
827	NCR	Luna, Myrna Benita Z.	UP-Diliman	Agriculture and Fisheries	UP-Diliman	On Going	
828	NCR	Mario, Jennifer Christine SJ	QC	Business Administration	UST	For Refund	Analysis of the Effectivity of ATI Trainings in Increasing Productivity and Efficiency to its Clients
829	NCR	Morfe, Noemi A.	Nueva Ecija	Food Science	UP-Diliman	On Going	
830	NCR	Urbano, Milagros	ATI, QC	Agriculture and Fisheries	Trinity	On Going	

Annex C

**List of DA-SEARCA Umbrella Capacity Development Program
(UCDP)**

**DA-SEARCA Umbrella Capacity Development Program (UCDP) on Strategic Management and Policy
for Agriculture Professionals and Executives**

No.	Name (Last, First, Middle Name)	Agency/ Office	Degree Course	School	Status	Thesis/Dissertation
1	Briguera, Nazario C	BFAR, NCR	Master in Public Management Regular Program (30 months)	ASoG	Completed	A Comparative Study on the Effectiveness of SIKAT Inc. and Camarines Sur Provincial Government's Initiative on Securing Fisherfolk Settlement
2	Manicad, Joseph C.	BAS, NCR	Master in Public Management Regular Program (30 months)	ASoG	Completed	Public-private partnership (PPP) Strategies in Enhancing the Bureau of Agricultural Statistics (BAS) Information System for SWINE in CALABARZON (Region IV-A/Quezon, Laguna, and Batangas)
3	Bernabe, Joselito F.	BAS, NCR	Master in Public Management Regular Program (30 months)	ASoG	Completed	Public-private partnership (PPP) Strategies in Enhancing the Bureau of Agricultural Statistics (BAS) Information System for SWINE in CALABARZON (Region IV-A/Cavite and Rizal)
4	Obice, Juvylee D.	DA-RFU IV	Master in Public Management Regular Program (30 months)	ASoG	Completed	Baseline Assessment of Internal Control System in the Department of Agriculture - Region IV-A
5	Camacho, Ernie C.	DA-RFU IX	Master in Public Management Customized Program (18 months)	ASoG	Completed	Mainstreaming Sustainable Agriculture: Strengthening Research and Extension Linkage
6	Cuello, Zarina B.	DA-RFU VI	Master in Public Management Customized Program (18 months)	ASoG	Completed	Organizational Capability, Performance and Institutional Capacity of People's Organization in the Development and Management of Organic Agriculture Projects in Iloilo Province
7	Durna, Garyzalde L.	DA-RFU VIII	Master in Development Economics Customized Program (15 months)	UPSE	Completed

Studies of Cholera El Tor in the Philippines*

2. A Retrospective Investigation of an Explosive Cholera Outbreak in Bacolod City and Talisay, November 1961
F. R. JOSEPH, L.R. TAMAYO*, W. H. MCGOWAN, M. G.
J. J. D'AMICO & D. A. PRITCHARD*

The epidemiology of cholera was studied in the Bacolod-Talisay area, Philippines, during November 1961. An explosive outbreak of cholera occurred in Bacolod City and Talisay, resulting in 100 deaths and the number of survivors could not well be determined.

The results suggest that cholera during the year 1961 in Bacolod City and Talisay was similar to that reported in 1960.

Cholera outbreak declared in Catanduanes

Catanduanes Province, Philippines

The 1961 Cholera Epidemic in Manila, Republic of the Philippines*

DEAN R. WALLACE, ANASTACIA E. FABIO, OMARIA MANOUSTAKI,
A. VELASCO, CORAZON RUBIO & ROBERT A. PHILLIPS

Conclusions of the 1961 cholera epidemic were drawn during 1962, after intensive investigation of the disease by government officials and the public, were confirmed by the World Health Organization. The mortality rate among cholera patients admitted to San Lazaro Hospital early in the Philippine epidemic, was in the present communication also found to be similar to that of cholera patients in other countries, but also higher than that of cholera patients in the United States and Canada. The incidence of cholera cases was different from that which is described in the literature.

DOH declares cholera outbreak in Virac

By RICELA CRISTOBAL AND CELSO RAO

Communicable diseases health offices around the country have declared cholera outbreaks against Bacolod last Saturday - except in Visayas and areas affected by Typhoon Ketsana.

"We communicated that there is no cholera, because the existence of cholera has already been assessed last year," said Dr. Erico, the health officer of Albion in Malay, Negros Oriental.

While the sections are in regular session, including Bacolod, Dauin, Nagcarlan, Sagay and Pilar, Bacolod's communicable disease risk management team said they were still monitoring the situation very closely to validate if it was indeed CFC.

He said the inter-agency task force cholera unit will issue its alert once all the sections

and provinces have been declared as cholera-free.

Recorded *Vibrio* outbreaks in the Philippines

Date of Occurrence	Area of Incidence	Number of Cases/Deaths	Primary Commodity	Source
Jan-Dec 1997	Muntinlupa, Manila	605 cases	Seafood/Water	Benabaye and Dayrit, 1998
Feb 1998	Buenavista, Guimaras	16 cases	Seafood/Water	Marte et al., 1990
May-Jul 2004	Dagupan, Pangasinan	2,778 cases (24 deaths)	Seafood/Oyster	Carteciano, 2004 DOH, 2005
Aug 2008	Mindanao	71 cases (21 deaths)	Seafood/Water	Manila Bull, 2008 USAToday, 2008
Apr 2011	Bataraza, Palawan	17 Villages (30 deaths)	Water	Phil Dly Inq. 2011
Jun 2012	Virac, Catanduanes	1,370 cases (18 deaths)	Water, fishery resources	Phil Dly Inq. 2012 Phil Star, 2012
Mar 2013	Laoag City, Ilocos Norte	4 cases	Oyster	Phil Star, 2013

What are *Vibrios*?

- Vibrios are gram-negative (-) halophilic bacteria that naturally occur in estuarine environment [Joseph et al., 1982; Kayser and DePola, 1991; McCarter, 1999; Su and Liu, 2007].
- *V. parahaemolyticus* (Vp), *V. cholerae* (Vc) and *V. vulnificus* (Vv) were considered as the species responsible for most illnesses caused by *Vibrio* spp. (Oliver and Kapas, 1997; Dalsgaard, 1998; FAO/WHO 2001).
- Particularly the *Vibrio parahaemolyticus* (Vp) and *Vibrio cholerae* (Vc) are the leading causes of bacterial gastro-enteritis diseases among shellfish consumers worldwide (Vongzay et al., 2008). Specifically, they cause watery/bloody diarrhea often with abdominal cramping, nausea, vomiting, fever and chills.
- *Vibrio cholerae* can rapidly lead to dehydration and death in untreated patients. V cholerae of the O1 and O139 serotypes are responsible for epidemic cholera in humans. [Karanasagar et al., 1995; FAO/WHO, 2005; DOH 1961-2013]
- *Vibrio parahaemolyticus* is the most common non-cholera vibrio. Associated with bloody diarrhea (Potassium et al., 2002; Honda et al. 1976).
- Pathogenic Vp (tdh/trh- lyse erythrocytes); Choleragenic Vc (ctx-responsible for cholera symptom-watery diarrhea)
- When the appropriate conditions occur (salt content and temperature), *Vibrio* species thrives.
- *Vibrio* related illnesses reports in the country were caused mostly by Vc (The Philippine Star, 2012; Carteciano, 2002) while some Vp and no Vv illness has been reported, however, a number of septicemia cases has been reported without any conclusive reports on what organism causes such disease.

Methodology (USFDA BAM-MPN Method)

Sample Preparation (Homogenate 15-20 pcs oyster meat)

1g homogenate

Serial Dilution 10-10⁻⁶ (PBS & APW MPN Enrichment)

Incubate at 35-37°C

Record growth (+/-)in APW
(discard - tubes)

Protocols:

- Kayser and DePaola (2001)
- Nordstrom et al. (2007)
- Jones and Ludeke (2012)
- BAM (2013)

Used Method Rainy and Dry Season

Streak all + tubes in TCBS

Incubate at 35-37°C

Suspected Vp (sucrose negative colonies)

Colony isolation and
Confirmatory Test(API 20E kit)

Conventional MPN/g
estimation

Used Method Additionally for Dry Season

1 ml aliquot each from + tubes
(VpRTi-PCR pathogenicity test)
(DNA samples analyzed using EAX® System
RTi-PCR, Colony Lift DNA Hybridization,
Serotyping and Biochemical Test)

RTi-PCR coupled with
Conventional MPN/g
estimation

ABSTRACT

Codex guidance recommends all seafood-producing countries assess the total and pathogenic *Vibrio* levels in commercial shellfish production areas. As no data existed on local *Vibrio* populations in the Philippines, we conducted a study to assess the prevalence and densities of *V. parahaemolyticus* populations in oysters from the major producing areas of Northern Manila Bay. Oysters were collected from seven stations during the wet (Nov 2011) and dry (April 2012) seasons. A most-probable number (MPN) technique followed by colony isolation on TCBS agar was used during both collection seasons. Presumptive *V. parahaemolyticus* colonies were classified by the presence of typical (colonies negative) green colonies on TCBS. Additionally, no samples collected during the dry season, the BASIC Vibrio Real-Time RT-PCR Assay was used for total *V. parahaemolyticus*, while pathogenic *V. parahaemolyticus* was determined using an RT-PCR assay that targets the thermostable direct hemolysin (tdh) and the heat-labile hemolysin (trh) genes. Lower densities of total *V. parahaemolyticus* were detected during the wet season (3-16 MPN/g) compared with the dry season (290-15,000 MPN/g). Densities of pathogenic tdh⁺ (0.23-93 MPN/g) and trh⁺ (0.93-240 MPN/g) comprised ~1% of the total *V. parahaemolyticus* recorded. These levels are consistent with levels found in shellfish from countries that routinely report *V. parahaemolyticus* illness. Shellfish-borne *V. parahaemolyticus* illness has not been reported in the Philippines, but this may be attributed to the absence of an established reporting system. The data presented here indicates the potential for *V. parahaemolyticus* illness from consumption of oysters harvested from Northern Manila Bay, Philippines.

Keywords: *Vibrio parahaemolyticus*; pathogenic; MPN; RT; wet season; dry season.

Vinarao, Revin Final Paper on Vibrio (2)

Me, Dear Cath, just to acknowledge my colleague's agreement

Catherine McLeod

To: Me

Dear Name,

Many thanks for the revised paper, it is very much appreciated.

I hope to see you at the Chile EMSS.

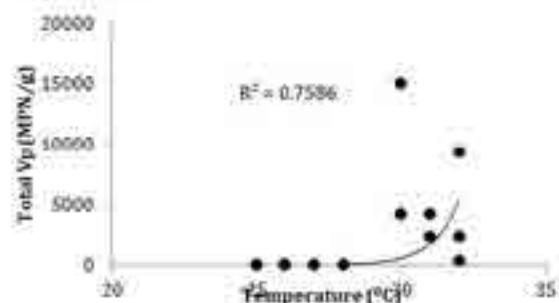

All the best

Cath

Fig 1. Location of Northern Manila Bay sampling sites

Incidence	Density (MPN/g)	
	Rainy Season	Dry Season
Total Vp	3.16	290-15,000
Ave	7.89	5,427.00
TDH ⁺ Vp	no data	0.23-93
Ave	-	14.00
Proportion	-	0.01%-2.2%
TRH ⁺ Vp	no data	0.93-240
Ave	-	110
Proportion	-	0.04%-8.3

- Positive correlation between the levels of *Vp* with temperature data ($r=0.51$).
- Pathogenic levels (tdh⁺/trh⁺): ~1% from total (0.23-240 MPN/g Vp)
- Pathogenic Vp levels that cause illness: >105 MPN/g (Daniels, 2000); 2.1-3.5 MPN/g (McLaughlin et al., 2005); > 100-1000 MPN/g (V. Cachicas, Chile).
- Temperature control has been initiated by researchers in other regions of the world with different levels of success (Kim et al., 2012, Phuvatasate et al. 2012).
- The same study has been initiated by the undersigned for the reduction of *Vibrio* spp. (*V. parahaemolyticus* & *V. cholerae*)

On the process of Capacitating our Microbiology Laboratory

Seasonal Abundance of total and pathogenic *Vibrio parahaemolyticus*, *V. cholerae* and *V. vulnificus* in oysters of Northern Manila Bay

The pathogenic levels data for Jan-Apr is yet to come

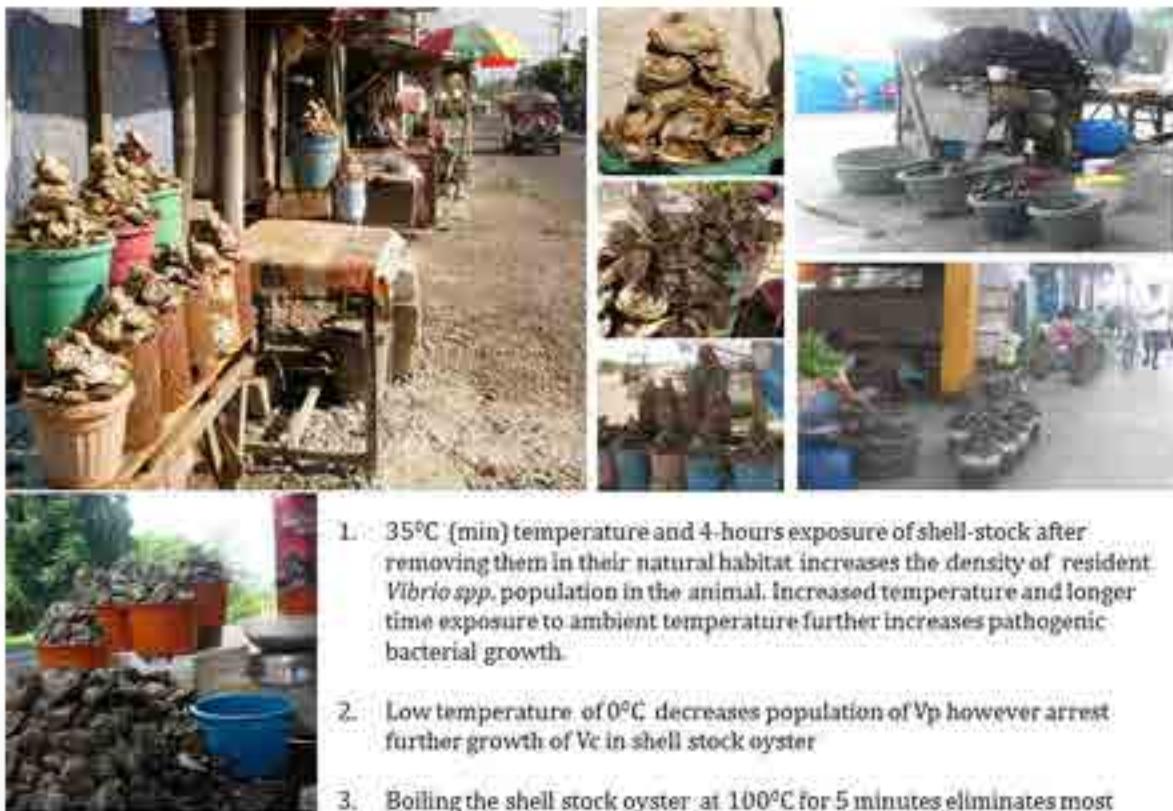

Reduction of *Vibrio spp.* in shellstock oyster using different temperature control treatments

R.T. Vinarao^{1*}, R.J. Ragaza¹, R.A. Bassig¹, A.S. Esmeralda¹

¹ National Fisheries Research and Development Institute, Quezon City, Philippines

2

1. 35°C (min) temperature and 4-hours exposure of shell-stock after removing them in their natural habitat increases the density of resident *Vibrio spp.* population in the animal. Increased temperature and longer time exposure to ambient temperature further increases pathogenic bacterial growth.
2. Low temperature of 0°C decreases population of Vp however arrest further growth of Vc in shell stock oyster
3. Boiling the shell stock oyster at 100°C for 5 minutes eliminates most vibrio populations (Vp /Vc) in the animal

Recommendations

1. Highly recommend cooking of oysters to eliminate *Vibrio* populations in shellstock oysters.
2. Recommend to at least subject the shell-stock oyster to low temperature-shock treatment prior to raw or undercooked consumption (preference).
3. Recommend the use of low-temperature storage facilities for commercial purposes (*in the future at least*). Proper postharvest handling (hygiene, appropriate storage) may increase the value of oyster industry in the Philippines.

Future Plans

1. Validation studies, to greater population size and wider scope area to include major oyster sites nationwide)
2. Consumer acceptability test for temperature-shock treated shelled oyster

**Report on US Paper Presentation during the Aquaculture 2013
Presentation: Paper on Recirculating Aquaponic System using the
Nile Tilapia and Freshwater Prawn Polyculture and the Productivity
of Selected Leafy Vegetables**

RECIRCULATING AQUAPONIC SYSTEM USING NILE TILAPIA *(Oreochromis niloticus)* and FRESHWATER PRAWN *(Macrobrachium rosenbergii)* POLYCULTURE and the PRODUCTIVITY of SELECTED LEAFY VEGETABLES

CHITO F. SACE, Ph.D.

Philippines

KEVIN M. FITZSIMMONS, Ph.D.

Arizona, USA

Vegetable consumption

□ Philippines: country of meat-eaters

- ❖ Increasing trend of meat consumption
- ❖ One of the lowest vegetable consumers in Asia
- ❖ 40 kg annually per capita (2003)
- ❖ Below the 146-182 kg per capita recommendation by WHO
- ❖ Among the top 10 risk factors of mortality (WHO)

Food production:

- ❖ A major challenge
- ❖ Affected by increasing population, declining arable land, water scarcity, climate change

FAO's optimistic prediction

- ❖ an abundant food supply in the coming years using available technology
- ❖ Capable of increasing agricultural productivity to meet the demand
- ❖ Scientific knowledge plus computerized equipment is more important than hard work and muscle power that traditional agriculture requires

Philippine policy-makers

- ❖ Cognizant of the prediction and situation
- ❖ FAO's call to change the age-old agricultural practices
- ❖ Shift paradigm to adopt "smart farming/precision agriculture" technologies
- ❖ Aquaponics - the raising of fish and growing vegetables in one infrastructure and system

MATERIALS AND METHODS

□ Objectives

- ❖ Determine the productivity of leafy vegetables in an aquaponic polyculture system using Nile tilapia and freshwater prawn in a controlled environment
- ❖ Evaluate the growth and yield response of lettuce, Chinese cabbage and pac choi
- ❖ Water productivity of the system

MATERIALS AND METHODS

□ Controlled environment greenhouse

- ❖ Gable-roofed, double-layered polycarbonate sheets
- ❖ 7.3 m W x 7.6 m L x 4.4 m H
- ❖ Raft culture, recirculating system; tilapia/prawn stocked 30 days before planting vegetables

MATERIALS AND METHODS

□ Types of cultures

- ❖ System 1 - Tilapia-prawn polyculture
- ❖ System 2 - Tilapia culture (control)

❖ Vegetables:

- ✓ Lettuce (Black-seeded Simpson)
- ✓ Chinese cabbage (Rubicon)
- ✓ Pac choi (Black Summer)

□ Data gathered

- ✓ General observation
- ✓ System design
- ✓ Stocking density
- ✓ Component ratio
- ✓ Growth and yield (hydroponic and aquaculture crops)
- ✓ Feed conversion ratio
- ✓ Water productivity
- ✓ Other observation

□ Single-factor ANOVA

MATERIALS AND METHODS

□ System components

- ❖ Bio-filtration tank (220L)
- ❖ fish tank (250L)
- ❖ Raceway (2.44m x 4.88m)
- ❖ Applied “one-pump rule”
- ❖ 40-watt pump

RESULTS AND DISCUSSION

□ The Nitrogen Cycle

- ❖ Nitrosomonas bacteria - toxic ammonia (NH_3 or NH_4^+) to nitrite (NO_2^-)
- ❖ Nitrobacter species – nitrite to nitrate (NO_3^-)
- ❖ Bio-balls were added to the bio-filtration tanks

RESULTS AND DISCUSSION

□ General observation

PARAMETERS	COMPROMISED LEVEL*	LEVEL ACHIEVED BY THE SYSTEM			
		With Prawn		Without Prawn	
		1st Crop	2nd Crop	1st Crop	2nd Crop
Environmental					
Air temp, °C	22-30	20-32	18-30	20-32	18-30
RH, %	40-90	55-85	58-87	55-85	58-87
PAR, nm	390-760	435-685	410-645	435-685	410-645
Water quality					
pH	6.0-7.5	6.5-7.5	7.1-7.9	6.7-7.7	7.3-8.2
TDS, ppm	>300	246-344	240-393	228-328	261-344
Water temp, °C	>20.0-30.0	18.8-22.9	16.3-23.5	19.2-23.9	18.5-24
DO, ppm	>3.0 -7.0	3.2-6.9	2.8-7.3	3.2-6.7	3.0-7.2
Saturation, %	60-125	58-125	51-123	52-123	56-125

* values compiled from various literatures

RESULTS AND DISCUSSION

□ Stocking density

- ❖ From Rakocy, et al., 2006
 - ✓ 50-100 g/pc at 100–200 pcs/m³
or 5–20 kg/m³
 - ✓ even at 250 pcs/m³ or 25 kg/m³
- ❖ From Licameli, et al. (2010)
 - ✓ 5 kg/m³
 - ✓ 150 g/pc * 71 pcs in 0.25 m³
= 42 kg/m³ (**VERY HIGH**)

At 20 kg/m³

a fish tank of 0.25 m³ = 30 kg fish (150 g/pc)

RESULTS AND DISCUSSION

□ Component ratio

- ❖ Speraneo system = 1:2
- ❖ Other system = 1:4
- ❖ For this study
 - ✓ Tank = 0.25 m³
 - ✓ Raceway = 2.38 m³
 - TANK:BED RATIO = 1:9.5 (VERY HIGH)**

Using the ratio 1:4

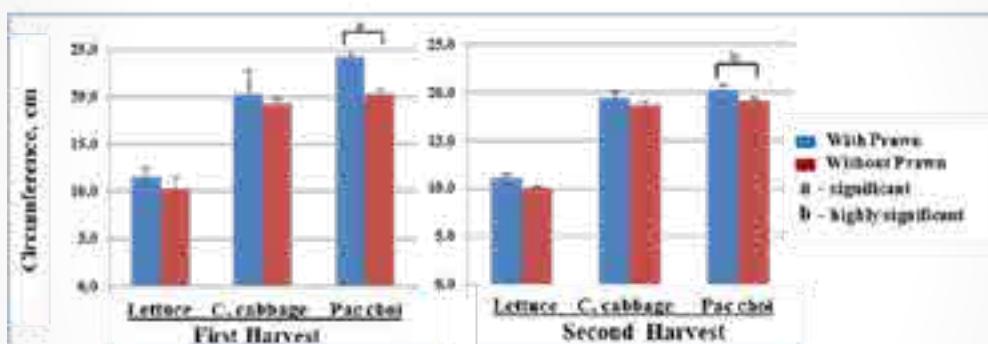

a fish tank of 0.25 m³ = 1.0 m³ raceway

a raceway of 2.38 m³ = 0.6 m³ fish tank

RESULTS AND DISCUSSION

□ Growth parameters

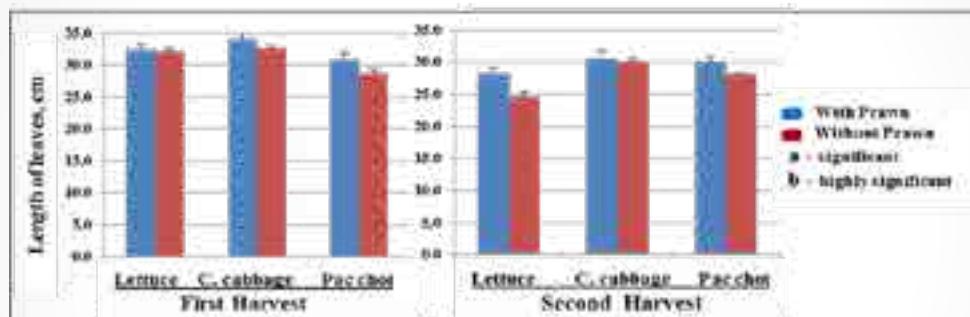

- ❖ Circumference of crown

RESULTS AND DISCUSSION

□ Growth parameters

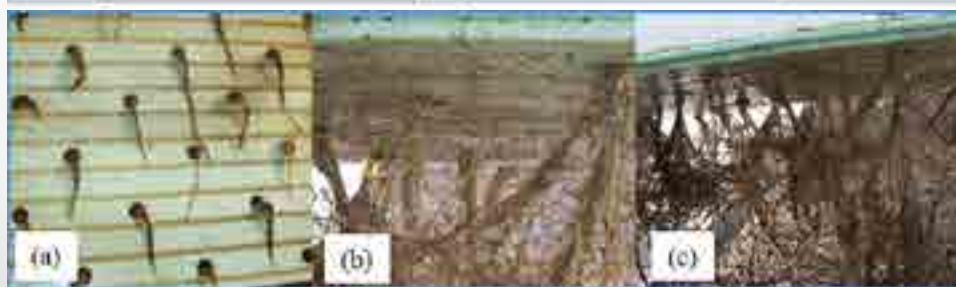

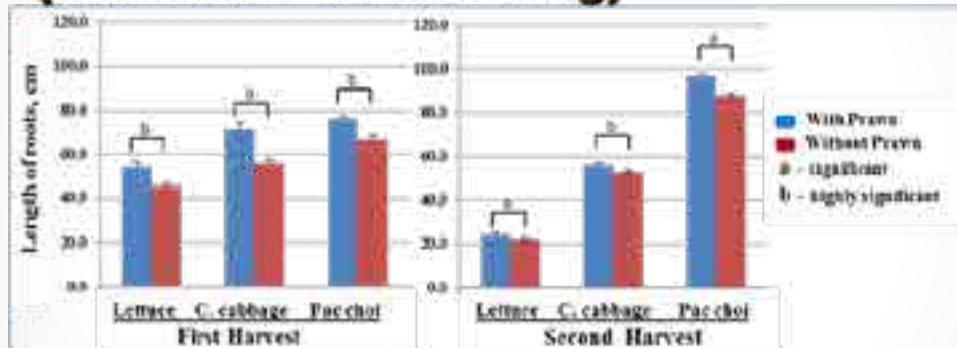

❖ Length of leaves

RESULTS AND DISCUSSION

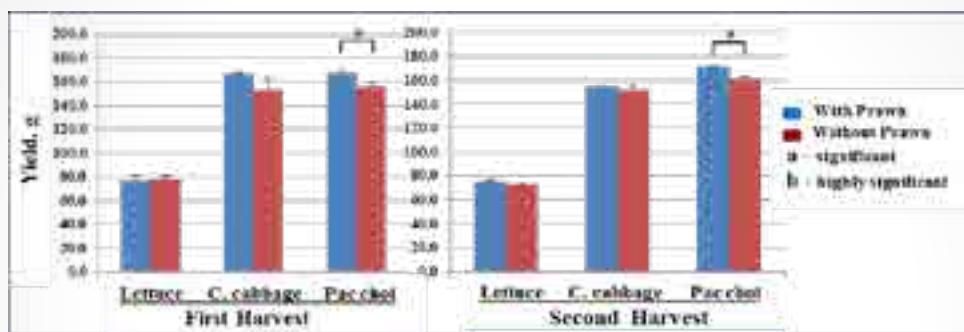

□ Growth parameters

❖ Length of roots (Pac choi - 120 cm long)

RESULTS AND DISCUSSION

□ Yield of vegetables

RESULTS AND DISCUSSION (water analysis)

ITEMS	PARTS PER MILLION		USEPA GUIDELINES
	With Prawn	Without Prawn	
Nitrates	30.8	24.6	$\text{NO}_3 = 25 \text{ PPM}$

Copper	N/A	N/A	1 PPM Sec. std.
Zinc	N/A	N/A	5 PPM Sec. std.
Manganese	0.07	0.038	0.05 PPM Sec. std.
Potassium	N/A	N/A	
Comments:	N/A	N/A	

RESULTS AND DISCUSSION

□ Growth and yield of tilapia and prawn; FCR

SYSTEM WITH PRAWN

Crop	Weight	Initial, g	Final, g	Gain, g	Growth rate, g/day	FCR
Tilapia (71 pcs)	Total	22,040.00	31,610.00	9,570.00	88.61	1.69
	Individual	310.42	445.21	134.79	1.25	
Prawn (208 pcs = 71%)	Total	494.00	1,631.00	1,137.00	19.27	
	Individual	1.67	8.00	6.32	0.06	

SYSTEM WITHOUT PRAWN

Tilapia (60 pcs)	Total	22,017.00	31,409.00	9,392.00	86.96	1.72
	Individual	366.95	523.48	156.53	1.45	

RESULTS AND DISCUSSION

□ Water consumption and productivity

❖ Water consumption

- ✓ Evapotranspiration = 10 % approx.
or about 22 L/day
or 2,376 L for 108-day culture period
- ✓ Volume of water (system) = 2,850 L
- ✓ Total volume = 5,226 L

❖ Productivity

- ✓ 71 pcs tilapia/harvest
- ✓ More than 200 pcs of prawn
- ✓ 495 heads of vegetables (990 pcs)
- ❖ More productivity with improved management

RESULTS AND DISCUSSION

□ Other observation

- ❖ Chlorotic and necrotic leaves mostly observed in Chinese cabbage and pac choi
- ❖ Lettuce with elongated stalk
- ❖ Also deficient in potassium, zinc, magnesium, manganese

CONCLUSION

- Integration of prawn in the raceway improved the performance of the system
- Pac choi has the best growth and yield performance among the three vegetables
- Stocking density and component ratio are crucial in designing a system
- “One pump rule” to recirculate the culture water from the lowest to highest portion then use gravity to recirculate water in a close loop
- Aquaponics saves water

RECOMMENDATION

- Utilize aquaponic polyculture in the production of fish, prawn and vegetables in rural and urban areas**
- Conduct studies for other crops like rice, corn, taro, water spinach, etc.**
- Build laboratory, backyard and commercial models**
- Promote aquaponics as alternative production system**
-

**Report on the US Study Tour on the Cooperative Extension
System of Some Southern States of the USA**

EXECUTIVE STUDY TOUR OF THE COOPERATIVE EXTENSION SERVICES OF SOME SOUTHERN STATES OF THE UNITED STATES OF AMERICA:

A Report

May 20-June 1, 2013

OVERVIEW

Study tour focused on cooperative extension system of selected southern United States of America, namely:

**Georgia,
Alabama,
Mississippi and
Louisiana.**

Land-Grant System is the origin of USA's Extension Service.

First, classroom instruction...realized laboratories are needed to "discover" knowledge (research)...

then came the need to disseminate information not only in the classrooms but also to the outside world...extension was born.

Extension in the USA will be celebrating its 100th year in 2014.

"Cooperative Extension" means resource partnership (funds , manpower and in kind), working together for extension and not "extension for cooperatives."

Each of the 4 state universities oriented the group.

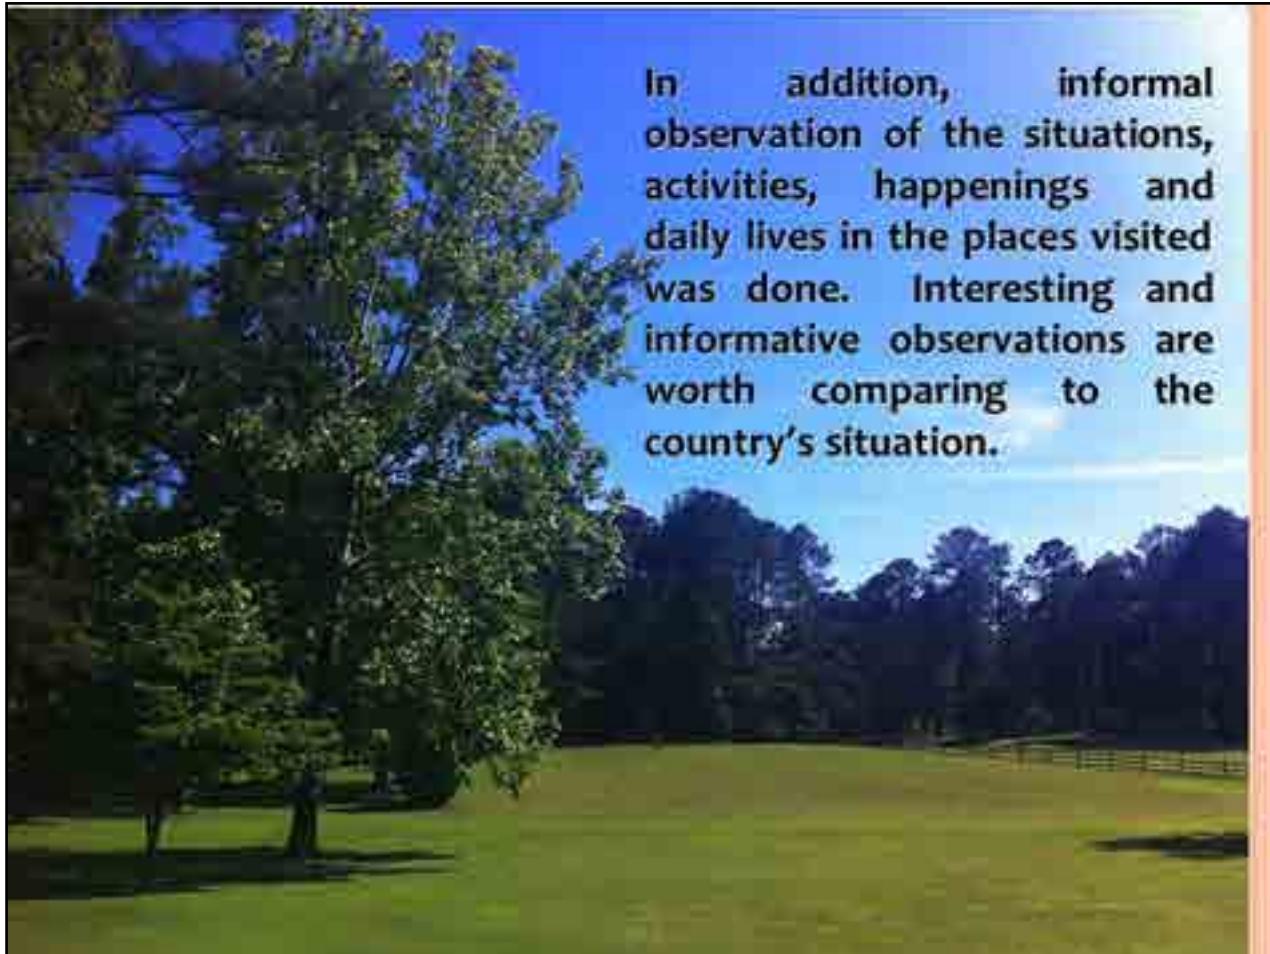

Showed some of their projects and brought the group to their County Extension Offices;

Parish Office also referred to as their "classroom in the field" or "movable school."

Exchange of notes took place, question and answer/open forum was undertaken for clarity and better understanding. The exchange of information was not limited to agriculture and extension; culture, values, and other relevant aspects were also covered.

In addition, informal observation of the situations, activities, happenings and daily lives in the places visited was done. Interesting and informative observations are worth comparing to the country's situation.

• THE VISIT AREAS AND ACTIVITIES

1. GEORGIA:

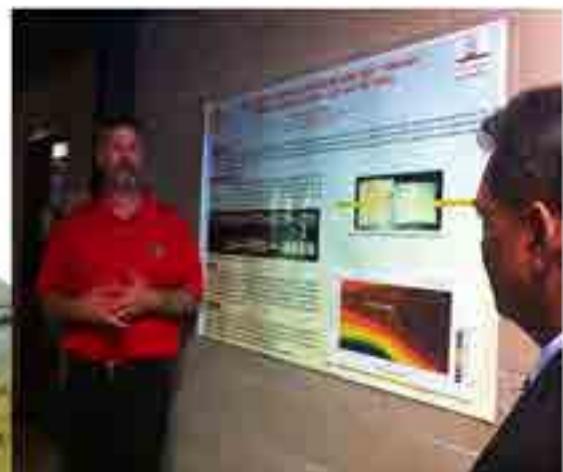

• University of Georgia Cooperative Extension System

○ Welcome Program & Orientation took place at their Conner Hall by Beverly Sparks, Assoc. Dean for Extension.

- University of Georgia as among the top five universities of the USA

- Georgia has 159 counties, 158 with County Extension Office managed by the state university; 2-3 extension agents per county office depending on the size of the county.

Main commodities: peanuts, blueberries, poultry.

4-H Youth Development Program as a major concern of their extension.

- Agricultural & Environmental Services Laboratory Tour & Orientation (Dr. David Kissel).

- Strong laboratory service for testing soil,
- plant and household water;
- pesticides & hazardous waste;
- feeds & environment water;
- trace level analysis.

- Agricultural & Environmental Services Laboratory Tour & Orientation (Dr. David Kissel).

- Soil analysis as a primary service; "Soil Recommendation in Georgia" serves as the farmers' "bible."
- Results feedback through internet;
- fees are charged for the service except analysis for feeds.
- Service primarily for farmers.

- Poultry Tour & Orientation (Dr. Scott Russell).

- Focus on research.
- Claimed as the biggest poultry research center, most efficient system in the world!
- Private companies also provide funds for research.
- Have achieved 18 days incubation only, 3 days finishing; conversion of 1.7lbs feed to 1 lb meat was achieved as a result of their research studies.

- Visit to one county office - Oconee County Extension Office (Monte Stephens).
 - This County Extension Office has a strong research component.
 - Strong 4-H Youth Development Program; focus on public speaking, information and communication training for their youth.

- Visit to Rock Eagle 4-H Center with Extension Leadership Team

- Rock Eagle 4-H Center is the camp site of the state's 4-H members, where annual camp activities are undertaken.

- Visit to Rock Eagle 4-H Center with Extension Leadership Team

- Panel discussion at this Center's Founders Lodge Conference Room:

- Emphasized researchers should be connected with the end-users, hence the need to put research and extension together.

Training an important intervention for both the extension agents and the clientele.

Training areas include: HRD, training for child care providers, nutrition and health, agriculture-related and other state priorities.

2. ALABAMA:

Alabama Cooperative Extension System, Auburn University

- Orientation on Alabama's Cooperative Extension System (ACES), Gary D. Lemme and Team

- ACES as primary outreach organization for the land-grant mission of Alabama A & M University and Auburn University with the following core values:
 - 1) the research-based underpinning of programs, materials and educational activities;
 - 2) ability to establish positive working relationships with clients, communities, partners, and stakeholders; and
 - 3) relevant programming that addresses current societal challenges and opportunities.

ACES Mission:

"The Alabama Cooperative Extension System collaborates with many partners to help people and communities improve their quality of life and economic well-being.

ACES Mission:

We accomplish this mission by providing educational opportunities and information grounded in research-based science in the following program areas:

- agriculture,
- economic and community development,
- urban affairs and new nontraditional programs,
- family and consumer sciences,
- 4-H and youth development,
- forestry, wildlife and natural resources."

ACES

- Described their extension service as "movable school" to help people improve their lives;
- that person-to-person delivery is still the best;
- that extension is a relationship.
- "Be available, be responsive and be seen;
- look for the underserved."

ACES

- In the delivery of extension service, structure should not be a barrier.
- Attitude and economy are correlated (importance of core values).
- Clear understanding of local needs as basic thing in extension interventions; balance of national and local priorities is done to establish what is relevant to do.

ACES

- Specific Priority Issues 2011
 - Health & Wellness
 - Workforce Development
 - Safe and Secure Food Supply
 - Financial Literacy
 - Sustainable Agriculture and Forestry Systems
 - Environmental Stewardship

ACES

- How the priority issues are addressed:
- Alabama has 67 counties, with County Extension Office, and six (6) Regional Centers manned by specialists of six priority areas.
- Master Gardeners are certified, who serve as "ambassadors" for the Extension Service.
- Agronomic factors included in agriculture.

Visit to Lee County Extension Office

- 4-H Youth Development as its major program;
 - conducts training for 4-H youth,
 - youth camps;
- Availability of reading materials such as brochures, leaflets and handbooks.
- Conduct agricultural fairs to showcase and market farmers' products

- Visit to Fisheries Project and “Rain Harvesting Project”
 - Catfish and cattle fish as main products.
 - Two components: the production areas including a newly established production area in a man-made lake, and the marketing center.
 - The project in-charge has been to the Philippines to study the country’s fish industry.

- Visit to the “rain harvesting project” that collects rain water for irrigation during the dry months.

3. MISSISSIPPI:

- Mississippi State University Extension Service (MSU-ES)

Mississippi has 82 counties and 4 Regional Research & Extension Centers with a population of 3 million people only.

- MSU Extension Service is the university's "classroom in the field" with educators and offices in each of the 82 counties; it is a unit of the Division of Agriculture, Forestry, and Veterinary Medicine.

- Extension Mission:

"MSU-ES provides research-based information, educational programs, and technology transfer focused on issues and needs of the people of Mississippi, enabling them to make informed decisions about their economic, social and cultural well-being."

- Extension to address and respond to critical opportunities and challenges—communities, business and families: timely information, outreach education, technical assistance, and applied research.

– Four main focus of extension:

- Agriculture and natural resources – agronomy, horticulture, livestock, poultry, veterinary medicine, pest management, engineering and agricultural economics.

- Community resource development – leadership development, economic analysis, health care, business retention and expansion, strategic planning, tourism development and public water systems.

– Four main focus of extension:

- Family and consumer science

- 4-H youth development – community-based 4-H clubs, special interest groups, school enrichment groups, day camps, individual study programs, after school clubs, military club; about 95,000 youth participating.

- The 4-H program is handled by their 4-H Department;
- Their 4-H categories: community clubs, in-school, after school, and military soldiers' children.

- **Visit to Oktibbeha County Extension Office (Julie White)**

- Composed of 2 extension agents and 7 experts;
- Extension Agent A takes care of agriculture & forest resources and community resource development.
- Extension Agent B takes charge of family and consumer science,
- Both work together in handling their 4-H youth development program, under the 4-H Department of the university.

- Activities and accomplishments under their 4-H Club program were presented.

- Visit to College of Forest Resources
- The College includes fisheries. They consider Mississippi as fish producer.
- Research and production of catfish, cattlefish, fresh water fishes and endangered species.

- Maintenance, development of forest as a major concern, like Alabama.

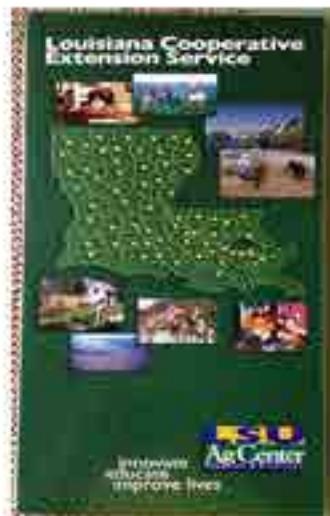

- Wood processing is done to produce construction materials such as plywood and other wood materials.

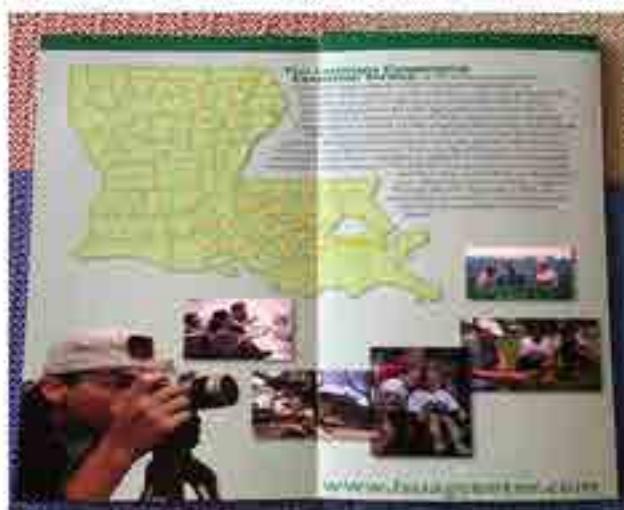

4. LOUISIANA:

Louisiana State University (LSU) Cooperative Extension Service System

- Orientation Program opened by Chancellor William B. Richardson

- Louisiana an agricultural state with 64 counties;
- plant commodities include cotton, feed grain crops (corn, grain sorghum and oats), forestry, fruit crops, greenhouse vegetables, hay, home gardens, Nursery stock and ornamentals, peanuts, pecans, rice, sod production, soybeans, sugarcane, sweet potato, commercial vegetables, and wheat; animal commodities include: cattle/calves, milk, horses, poultry, rabbits, ostrich/ratite, quail/pheasant, sheep, goats, swine, and exotic animals.

- The Louisiana Cooperative Extension Service is a division of the LSU Agricultural Center responsible for education and outreach across the state.

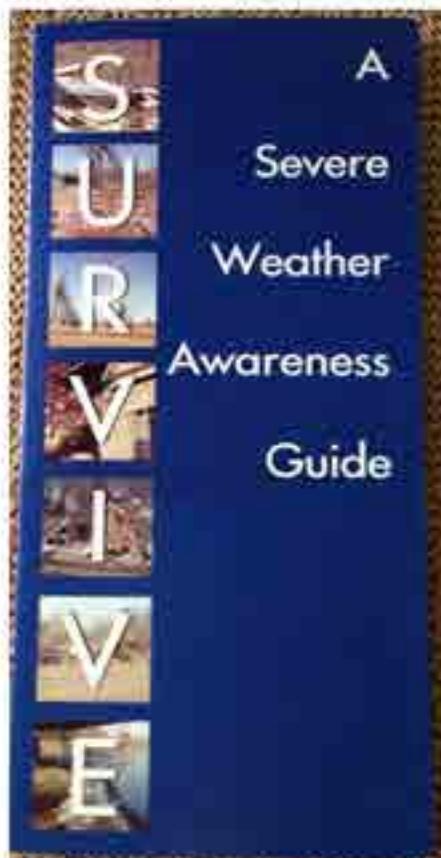

- LSU has Parish Offices instead of County Extension Offices for its extension service in the localities, a total of 64 parishes.
 - It has a Research and Extension Center with 20 research stations located across the state;
 - Rich clients also provide funds for research activities.

Core Program areas:

- Agriculture and natural resources
 - Lawns and gardens
 - Helping producers master best management practices
 - Protecting the environment and conserving resources
 - Health and family life
 - Housing and emergency preparedness
 - Helping youth and adults be the best they can be
 - Developing state's future leaders

- Strong extension in Louisiana, with tremendous relationship with the clientele; over 3M client calls received requesting assistance or information.

The collage includes:

- A small photo of a person wearing a 4-H uniform.
- A yellow banner with the text "4-H CLOVER CONNECTION" and "4-H CLOVER CONNECTION" repeated below it.
- A larger page from the magazine with the title "THE 4-H CLOVER CONNECTION". It features a large green four-leaf clover illustration. The page contains several columns of text and small images, likely describing various 4-H projects and activities.

- 4-H program a critical extension intervention as it serves to "direct" the youth, so need to make it relevant.

- **Wellness Program**
 - Nutrition as a critical aspect because America has an obesity problem;
 - children and adults have this problem and their number is continuously increasing across the country and the state as well.

❖GENERAL CHARACTERISTICS OBSERVED/LEARNED AND SOME COMMENTS

➤The Extension Service is lodged in state universities, no other extension service providers. Research is likewise lodged in the state universities; researches are conducted by the university research centers/laboratories and results are delivered/disseminated to end-users (extension) through the County Extension Offices or Parish Offices (Louisiana case). These offices are under the state university Extension Service Centers. Clients served through these offices. Research results are also taught to students (instruction).

In the Philippines, extension is not provided by a single office/agency nor the SUCs. All development agencies, SUCs and the LGUs have their own extension services, anchored on their respective mandates and programs. Agricultural Extension alone is provided by the Department of Agriculture, the LGUs, other development agencies, the NGOs, private sector.

If we are to consider the states of USA as the provinces in the Philippines, this would mean a "provincial level extension service" that would cover the province's priority issues, not only agriculture.

- Research facilities of the universities are state-of-the-art. Provision of information needed by the end-users/feedback is prompt, as the internet is used to do this.

Research facilities in the country needs catch up, compared with that of the US. Use internet not yet maximized.

- Extension service is not limited to agriculture concerns alone. Their extension service is encompassing, anchored on the priority problems/issues of the state; harmonized and integrated. Priority issues usually range from life skills, social skills to agriculture and environmental development. Being the lone extension provider in the state, concerns of all offices/agencies needing extension service are given to the university extension service office for dissemination.

As the country has a pluralistic extension service, the above situation is not done. Like, the Department of Agriculture-ATI and the LGU agriculture offices generally focus on agriculture commodity concerns, although to some extent, some social technology courses are integrated in the training interventions.

It would take another legislation to revise this pluralistic system.

- Family concerns, Health & Wellness and 4-H Youth Development are musts in all states.

In the country, family concerns, health and wellness are handled by the DOH, Nutrition Council, DSWD, and other agencies and NGOs.

- The extension personnel of the Cooperative Extension Service of the state universities and the County Extension Offices/Parish Offices are specialists and are required to undergo higher education to be at par with the university's research and instruction personnel. Most of them are Ph.Ds.

Lately, the DA through ATI, has launched scholarship programs to upgrade the extension system of the country.

- **Funding of extension:** Funded through federal, state, and county appropriations; federal grants; county donations of office space and utilities and to some extent, appropriations; private partnerships and contracts and grants. USDA also provides funding, both as regular allotment and proposal-based. Salaries of the extension personnel/agents come partly from the universities and partly from the other fund sources; usually, 50% from the state universities.

Funding of extension service is lodged in the agencies/institutions providing such service.

- Strong 4-H Youth Development Program as these 4-H Club youth are envisioned and being prepared to become future farmers. Required age: 9-19 years old. Funding for 4-H youth development program is allocated although such has to be augmented by undertaking fund raising activities.

4-H Youth Development is also part of the DA's programs, with some funding. The age range however, differs; in the country, age limit is 30. Both countries limit membership to the single youth.

- Concept of Master Gardener being accredited.

The concept of Master Gardener is similar to the country's farmer-extensionist.

- Concept of Master Gardener being accredited.

The concept of Master Gardener is similar to the country's farmer-extensionist.

- e-media is highly used, although they also admit that face-to-face extension is still the best.

e-media is just starting in the country.

- Organizational structure of the extension service differ a little among the state universities but all towards “best delivery of extension service in the locality.” As they said, “structure should not affect the delivery of extension.”

*With the country's current set-up,
extension organizational
structure is organization-based.*

- On Extension Planning: Commodity-based planning is still being done by some of the state universities; balance of national and state priorities is done; participatory planning – involvement of the clientele – is employed.

*Through the AFMP of the AFMA,
participatory planning is
encouraged.*

❖ **WHAT COULD BE ADOPTED GIVEN THE CURRENT SET-UP IN THE PHILIPPINES?**

As the current set-up in the country can be changed only by legislation, the following can be considered:

- ✓ Aligning research and extension services; both should focus on the priority issues of the country/localities. A general framework for research and extension should be developed and agreed upon to set the direction..
- ✓ Close working relationship between research and extension agencies, beginning with the Department of Agriculture (within) then with the SUCs, etc.

- ✓ Inclusion of life skills and social skills in the DA-ATI's training interventions.
- ✓ Work for function-based planning and budgeting.
- ✓ Strengthen e-media; farmer-extensionist concept.
- ✓ Enhance 4-H Youth Development Program; decrease the maximum age, from 30 to perhaps 25 years old.

- ✓ Study the organization of in-school high school 4-H Clubs.
- ✓ Establishment of 4H Youth Camp and Parks.
- ✓ Continuously enhance the upgrading program of extension agents
- ✓ Work for cooperative funding for the extension service.
- ✓ Long range plan: Legislation needed to amend the set-up of extension in the country.

- ✓ Study the organization of in-school high school 4-H Clubs.
- ✓ Establishment of 4H Youth Camp and Parks.
- ✓ Continuously enhance the upgrading program of extension agents
- ✓ Work for cooperative funding for the extension service.
- ✓ Long range plan: Legislation needed to amend the set-up of extension in the country.

Participants:

- | | |
|--------------------------------|---------------------------------------|
| • ASEC Edilberto M. de Luna | Asst. Secretary for Field Operations |
| • Josyline C. Javelosa, Ph.D. | Agricultural Attaché, Washington DC |
| • Dir. Asterio P. Saliot, Ph.D | Director IV, ATI Central Office |
| • Reynato George A. Maguilgod | Training Center Director, ATI-RTC2 |
| • Efren C. Sabularse | Training Center Director, ATI-RTC5 |
| • Carolyn May O. Daquio, Ph.D. | Training Center Director, ATI-RTC7 |
| • Arlene L. Flores, Ph.D. | Training Center Director, ATI-RTC CAR |
| • Pat Andrew B. Barrientos | Training Center Director, ATI-RTC4B |

For all these, gratitude is due to Dr. Catalino Blanche of the USDA who was responsible in arranging the visit areas; to Dr. Josyline C. Javelosa, Agriculture Attaché based in USA, for her assistance and service to the group for the whole duration; to ASEC Edilberto M. de Luna and Dir. Asterio P. Saliot for leading and guiding the group especially during the orientations and panel discussions that took place, making the activities fruitful.

Report on the US Expository Activities on Extension Services in USA

USA EXPOSITORY TRAVEL REPORT

September 1-13, 2013

EMMA K. SALES, Ph.D. and JOSEPHINE R. MIGALBIN, Ph.D

University of Southern Mindanao
Kabacan, Cotabato

 Extension is a part of the four-fold functions of all State Universities and Colleges in the Philippines.

 A significant social innovation, an important force in agricultural change, which created and recreated, adapted and developed over the centuries.

Purpose of the Expository Travel

To have a closer look at the federal, state and county agriculture extension services (nature of services offered vis a vis the needs of the clientele)

To observe best practices in extension including knowledge management and how it maybe introduced in the Philippines to make extension services more effective and responsive to the peculiarities of an area and people.

University of California Agriculture and Natural Resources: An engine for problem solving

- The University of California's Division of Agriculture and Natural Resources (ANR) is the bridge between local issues and the power of UC Research.
- ANR's advisors, specialists and faculty bring practical, science-based answers to Californians.
- ANR works hand in hand with industry to enhance agricultural markets, help the balance of trade, address environmental concerns, protect plant health, and provide farmers with scientifically tested production techniques and Californians with increased food safety.

- 200 locally based Cooperative Extension advisors and specialists
- 57 local offices throughout California
- 130 campus-based Cooperative Extension specialists
- 9 Research and Extension Centers
- 6 statewide programs

- 700 academic researchers in 40 departments at 3 colleges and 1 professional school:
 - UC Berkeley College of Natural Resources
 - UC Davis College of Agricultural and Environmental Sciences
 - UC Davis School of Veterinary Medicine
 - UC Riverside College of Natural and Agricultural Sciences

The group with three Extensionists of the University of California Davis (seated from L to R – Dr. Larry Godfrey, Dr. Daniel Putnam and Dr. Mark Bell)

The group with Dr. Jim Hill, Associate Dean of the College of Agriculture and Life Sciences, University of California Davis

The group with Dr. Fred Conte, an Aquaculture/Fisheries Extensionist of the University of California Davis

Cornell University
Cooperative Extension

✓ A national leader in creating positive change on behalf of families and communities through rigorously-tested extension programs.

✓ Creates measurable change in five priority areas by aligning local needs with the resources and priorities of the land grant system and its state and federal partners.

✓ Mission is to put knowledge to work in pursuit of economic vitality, ecological sustainability and social well-being.

✓ Brings local experience and research based solutions together, helping New York State families and communities thrive in a rapidly changing world.

Mission Areas

Agriculture and Food Systems

Environment and Natural Resources, Sustainable Energy, and Climate Change

4-H Youth Development/Children, Youth, and Families

Nutrition, Food Safety and Security, and Obesity Prevention

Community and Economic

 These areas provide the lens through which decisions regarding program content, funding, staffing, and infrastructure are assessed.

United States Department of Agriculture
National Institute of Food and Agriculture

National Institute of Food and Agriculture (NIFA)

An agency within the U.S. Department of Agriculture (USDA), part of the executive branch of the Federal Government. Congress created NIFA through the Food, Conservation, and Energy Act of 2008.

NIFA replaced the former Cooperative State Research, Education, and Extension Service (CSREES), which had been in existence since 1994.

National Institute of Food and Agriculture (NIFA)

NIFA's mission is to lead food and agricultural sciences to create a better future for the Nation and the world by supporting research, education, and extension programs in the Land-Grant University System and other partner organizations.

NIFA's Two Key Mechanisms

To accomplishing its mission of "advancing knowledge" are:

National program leadership. Helps states identify and meet research, extension, and education priorities in areas of public concern that affect agricultural producers, small business owners, youth and families, and others.

Federal assistance. Provides annual formula grants to land-grant universities and competitively granted funds to researchers in land-grant and other universities.

- ✓ Aims to improve economic, environmental, and social conditions in the United States and globally.

Activities

Lecture/Discussion

- ✓ Extension specialists in the three organizations visited by the group presented the extension system of their respective organizations.

- ✓ The Philippine group shared about the Philippine Extension System.

Field Tours

Dixon Ridge Farms, Putah Creek Road, Winters, California.

- ✓ grows, buys, and processes California organic walnuts.
- ✓ established in 1979, it is proud to continue a century-long tradition of family farming.
- ✓ known as a leader in the organic walnut industry; the preferred choice of growers throughout California, and buyers worldwide; and the largest and most established handler of organic walnuts.
- ✓ more than two decades, it has built a relationships and provided its customers with a consistent supply of the finest quality products.
- ✓ vertically integrated farming operation and raise, hull, dry, shell, sort, store, package and sell organic walnuts.

Field Tours

- ✓ Tomato Production for Processing, Yolo County, Woodland, California.

Program goals are to increase tomato crop quality and profitability for clientele.

- ✓ Mc Gowan Farm with Don Viands. Alfalfa Forage breeding

Field Tours

- ✓ Potato Breeding Farm with Walter DeJong

- ✓ Cornell University Organic Vegetable Research and Demo Farm with Martha Mutschler and Michael Mazourek

Field Tours

- ✓ Nelson Hoover's Maple Lane Produce. Nelson and his wife Ruth grow greenhouse and field produce on their 4-acre farm in Yates County.
- ✓ Nelson has worked with the Cornell Vegetable Program for over 10 years by hosting variety trials, grafting research and much more.
- ✓ A key individual in the high tunnel movement, Nelson and his family have fabricated 100's of these low-tech greenhouses for growers throughout the Northeast US.

Field Tours

- ✓ Martin's Produce Shack.
- ✓ Ivan and Eva Martin are dairy farmers and produce growers.
- ✓ They operate two high tunnel greenhouses and have cooperated with the Cornell Vegetable Program by hosting twilight meetings, grafting trials and biological control demonstrations.

What is Cooperative Extension?

(Our Observations/Learnings)

Cooperative Extension

A public funded, non-formal educational system

Links education and research resources of USDA, land grant universities, and county governments

Vision

The Cooperative Extension Service is the educational resource for all _____ that serves as a catalyst to build better communities and improve quality of life.

Mission

The Cooperative Extension Service serves as a link between the counties of the Commonwealth and the state's land grant universities to help people improve their lives through an educational process focusing on their issues and needs.

Focus

- ✓ Valuing diversity and capitalizing on its potential to strengthen programs
- ✓ Being locally-driven, flexible, and responsive
- ✓ Empowering people to solve problems, make decisions, and embrace change
- ✓ Applying knowledge and research-based information
- ✓ Accomplishing work through collaboration, volunteerism, and leadership development
- ✓ Developing youth, adults, families, and communities

Cooperative Extension is guided by the principle of

“helping people help themselves” – working with people and not just for them.

The Cooperative Extension Service is the result of a unique cooperative agreement between the following:

- ✓ University (Land Grant)
- ✓ U.S. Department of Agriculture
- ✓ Counties

**Cooperative Extension is an
OUTREACH PARTNER OF
LAND GRANT
INSTITUTIONS**

Other Observations

1. All proposals submitted for funding are research cum extension.
2. Government provides extension workers per county
3. Very strong, active and progressive farmer associations have strong ties and linkage to the academe (e.g Cornell and UC Davis)
4. Farmers trust the expertise from the academe
5. Farmers give funding support for research and extension activities of the academe
6. Student immersion in extension activities
7. Application of E-extension is better in the Philippines than in the US.

Recommendations

- ✓ Extension is the weakest link in State Universities and Colleges (SUCs) and this therefore needs a thorough review on how to strengthen this particular unit.
- ✓ ATI should collaborate with DOST, DA-BAR, CHED in crafting the Philippine Agenda in research whereby extension should be part of the research agenda.

Recommendations

- ✓ Include in the academic program community engagements.
- ✓ Apply (if applicable) the mechanism of the extension function of USDA, CU and UCD.
- ✓ Engage retired professors to be volunteers in different extension services of universities and colleges

Value for Money

Economy

Can we get the same or equivalent inputs for less money?

Efficiency

Can we get the same results while saving on how we manage the activities?

Would using cheaper different inputs risk the effectiveness, including sustainability?

Would making savings to how the project is managed risk reducing effectiveness, including sustainability?

Would using cheaper inputs risk greater maintenance costs over the life of the project?

Would making savings on how the project is managed risk incurring other costs?

Cooperative Extension is a well organized network of professional educators and trained volunteers.

The success of Cooperative Extension is worth emulating and whatever is applicable in the Philippines can be duplicated.

Annex I

Report on Paper Presentation During the 2nd International Conference and Exhibition on Food Processing and Technology – “Handling Post Harvest and Processing of Agricultural food Products in the Philippines: Challenges and Opportunities

EHRDPs Non-degree International Activities

May 13-16, 2013

Lima Park Hotel, Malvar, Batangas

Highlights of Travel to Kansas City, Missouri, University of Maine and Washington State University

October 27 to November 12, 2013

Ofero A. Caparino, Ph.D.

PhilMech

Purpose of Travel

- Presented a technical paper during the 2nd International Conference and Exhibition on Food Processing and Technology held on October 28-30, 2013 in Kansas City.
- Explored possible R&D collaboration with the Washington State University and University of Maine in the areas of food processing and waste utilization of selected Agri-fishery commodities.

Financial Support

ATI-Expanded Human Resources Development Program (PL-480)

- Round-trip international airfare,
- Daily Subsistence Allowance (DSA)
- 75% of the registration fees during the conference

Conference organizer

- 25% for the registration and accommodation fees

PhilMech

- Pre-departure expenses

Personal

- Clothing allowance and other incidental expenses

Places visited

Highlights of Activities (*Kansas City conference*)

The 2nd International Conference and Exhibition
on Food Technology, Bioprocess and cell culture

Date: October 28-30, 2013

Place: Kansas City Marriott Country Club Plaza, Kansas City,

Theme: "*Breaking new frontiers through automation and innovation and developing sustainable products*".

Participants: Scientists, engineers, researchers, Journal editors, students and leaders in the fields of food processing and nutrition science, fermentation and cell culture worldwide participated in this event.

152nd OMICS Group Conference

**2nd International Conference and Exhibition on
Food Technology, Bioprocess & Cell Culture**

October 28-30, 2013 Kansas City Marriott Country Club Plaza USA

Operated by

ARTICLE INFO

Article history:

Received 9 November 2011

Received in revised form 3 January 2012

Accepted 3 January 2012

Available online 4 February 2012

ABSTRACT

Mango powders were obtained at water content below 0.05 kg water/kg dry solids using Refractance Window® (RW) drying, freeze drying (FD), drum drying (DD), and spray drying (SD). The spray-dried powder was produced with the aid of maltodextrin (DE = 10). The chosen drying methods provided wide variations in residence time, from seconds (in SD) to over 30 h (in FD), and in product temperatures, from 20 °C (in FD) to 105 °C (in DD). The colors of RW-dried mango powder and reconstituted mango puree were comparable to the freeze-dried products, but were significantly different from drum-dried (darker).

University of Manila, Philippines

Refractance Window® (RW) drying is a novel drying method that has been proven to produce high quality food powders. However, information on the stability of RW-dried products during long-term storage is lacking. In this study, the effect of packaging atmosphere, storage temperature and time on the physical and chemical stability of RW-dried mango powder was evaluated over 12 months. RW-dried mango powder with a water content of 0.037 ± 0.001 g water/g dry solids was stored at 5, 22 and 45°C for 12 months using air-filled or nitrogen-flushed packaging. Headspace in the package, water content, color, ascorbic acid, β-carotene and microstructure of powder were measured at 0, 6 and 12 months. The mango powder stored at 45°C suffered discoloration and ascorbic acid (AA) and β-carotene degradation after 6 and 12 months of storage in both air-filled packaging and nitrogen-flushed packaging. The powder stored at 5 and 22°C had lower nutrient losses and color was retained. Replacing the air inside the package with nitrogen gas was effective in preserving AA in mango powder stored at 5 and 22°C. Nitrogen flushing also reduced the loss of β-carotene after 6 months of storage. The initial microstructure of mango powder stored at 5 and 22°C was preserved after 6 and 12 months. Nitrogen-flushed packaging of mango powder at 5 & 22°C stored for 6 months is recommended in this study to minimize degradation of nutrients during long term storage.

Biography

Oliver A. Caparino has completed his Ph.D. in Biological and Agricultural Engineering/Food Engineering at Washington State University (WSU), Pullman Campus, under the auspices of the Ford Foundation International Fellowship Program/International Institute of Education, New York, USA, and WSU Graduate Research Assistantship Program. He was a recipient of the British Council Scholarship Program and the Philippines Bureau of Agricultural Research Scholarships Program for his Diploma in Agricultural Education and Master of Science in Agricultural Engineering, respectively. Currently, he is the Chief of the Bioprocess Engineering Division of the Philippines Center for Postharvest Development and Mechanization (PhilMech), Philippines.

Re: adaptation study of a novel drying technology (RW drying technology) in the Philippines

Actions Plans

1. Organize a seminar on extraction of Bio-active compounds from selected plant materials with speakers from either WSU and UM.
2. Join as organizing committee member to 3rd international conference on Food Processing in the US
3. Endorse/encourage PHilMech researchers and colleagues from other institutions to attend the 3rd international conference on Food Processing in the US.
4. R&D collaboration with US universities
5. Work out to send PhilMech research personnel to undergo short course, masters, doctoral and/or postdoctoral studies in the US. Areas of research will be on food processing/engineering and waste utilization of selected Agri-fishery commodities.

Updates of Action Plans

1. Invited two (2) Speakers from Washington State University

Dorelyn S. Dolinay, Ph.D.

D. Jonel P. Saludes is an Assistant Professor of Chemistry in the Department of Chemistry at Washington State University (WSU). He obtained a BSc degree in Chemistry from the University of San Agustin, Cebu, Philippines (1991); MSc in Biochemistry of Plant Products Chemistry at the University of Santo Tomas Manila, Manila, Philippines (1995) and Ph.D. in Organic Chemistry at the University of California Davis, USA (2006). He was a Lecturer (1994-1996) and Assistant Professor and Chair of the Department of Chemistry (2009-2010) at the University of San Agustin. He was a Postdoctoral Fellow in Chemical Biology at University of California Davis (2006-2008) and the University of Colorado Boulder, Colorado (2008-2012) before he joined WSU in 2012. He has published 20 peer-reviewed articles, is a member of five journals, presented technical papers at several meetings and conferences, holder of one U.S. patent and has received several research grants. He is an active member of various professional associations in the USA. He was a Fellow of UNILORIN Fellowship in Natural Products and a recipient of EIWAC and RACI World Chemistry Congress Award. His current researches focus on understanding key biological recognition events using the power of chemical synthesis to design and create peptides as molecular probes.

D. Dorelyn S. Dolinay is an Assistant Research Professor in the Institute of Biological Chemistry at Washington State University (WSU). She obtained a BSc degree in Pharmacy from the University of San Agustin, Cebu, Philippines (1991); MSc in Botany of the University of the Philippines in the Visayas (1995) and Ph.D. in Microbiology at the University of New South Wales, Sydney, Australia (1994). She was a Lecturer in the College of Pharmacy and Medical Technology at the University of San Agustin, Manila (1995-2000). She was a Postdoctoral Fellow in Natural Products Chemistry at University of California San Diego (2001-2003) and a Research Associate II at the Somany Products Laboratory, Department of Chemistry and Earth and Ocean Sciences, University of British Columbia, Vancouver, Canada (2009-2012) before she joined WSU in 2012. She has published 20 peer-reviewed articles, is a member of two journals, presented technical papers in several meetings and conferences, holder of one U.S. patent and is an active member of various professional associations in the USA. Her current research focus on metabolome and processes of plant-pathogen interactions, immunology and medicinal chemical biology; natural products chemistry - discovery and characterization of biologically active metabolites from microorganisms, marine invertebrates, and plants, and elucidation of the mechanism of action (MOA) of antitumoral compounds.

WSU eyes collaboration on drugs found in nature

February 7, 2014

By Jane Payumo, Office of International Programs

PULLMAN, Wash. – The potential healing properties of chemicals found in nature was addressed by two Washington State University faculty members recently at a scientific seminar in their home country of the Philippines.

"There was overwhelming interest among faculty, staff and students on the role of natural products in drug discovery and development and how we are advancing the field at WSU," said Dorothy Daisay, assistant research professor in the WSU Institute for Biological Chemistry.

"They too have outstanding ideas and research but lack the facilities and equipment to move things forward," said Jewel Saludes, assistant professor in organic and inorganic chemistry. "I envision collaboration where WSU could help them identify and determine the structure of the compound(s) responsible for the desired bioactivity."

"Talks are ongoing on how we can make this happen," he said. "Meeting of Filipino scholars for short- and long-term trainings to WSU are

https://news.wsu.edu/201/02/07/wsueyes-collaboration-on-drugs-found-in-nature/#.U3tXn_mSxqU

Saludes' research

(<http://www.saludeslab.org/>) is focused on the interface of chemistry and biology, particularly understanding protein-protein interactions for diagnostic, drug and biotechnology discoveries. Daisay works on drug development and natural products. Both are well-published, well-cited scholars and have grants pending.

The Office of International Programs connected the faculty to WSU alumnus Ofero Caparino, from the Philippines, after he visited WSU last year to discuss potential collaborations, knowledge transfer and training activities between WSU and the Philippines.

Extending WSU outreach

Saludes and Daisay spoke at the "Seminar on Cancer Biomarker and Plant Natural Products Discovery" organized by the Department of Agriculture's Philippine Center for Postharvest Development and Mechanization (PhilMech), located in central Luzon, one of the major islands of the country. The seminar drew about 140 participants from nine area research institutions.

The two also gave seminars in three academic institutions in the southern Philippines and in Manila.

"Now they know WSU more and are eager to have international research collaboration with us," Saludes said. "We are glad to champion these joint activities with these Philippine institutions."

Updates of Action Plan

- 2. Membership as co-organizer in the International conference

Invitation

Dear Friend Fellow,

Being the Scientific Advisor for the 2nd International Conference and Exhibition on Food Processing & Technology (Food Technology-2014) at Las Vegas, USA from July 21-23, 2014. It is the ultimate to welcome you all to this International food processing event.

This special 2nd Annual Global grand conference in food processing & technology theme, the main conference "including High-quality school and that enables to build strong future's Global Relation". In this note,

Food Technology-2014 is intended to gather the scientific researches of scientist to promote the scientific discussions, it will be concerned to provide novel, innovative and important scientific exchange on the "Developing new research and innovation in Food Processing and Technology" and contribute to the development of efficient ideas to society health, concern with global impacts of food safety.

Therefore, it is very useful to bring together scientist from the field of food science and nutrition related to discussion of the latest research and theory, and to promote interdisciplinary discussion.

Conference like this one may help to spread up the advancement of science communication in food processing, nutrition and public health.

Our goal is to inform to know our existing food technologies and what to focus the future food safety.

With Best Regards,
Prof. M. S. Sankarapandian
Academy of Food Science (AOF)

Scientific Advisor:

 Prof. M. S. Sankarapandian
Academy of Food Science (AOF)
Food Technology-2014

Congress Chair:

 Dr. C. L. Campbell
University of Texas Health
Science Center San Antonio, USA

Organizing Committee:

 Prof. S. Sankarapandian Academy of Food Science (AOF)	 Dr. S. S. Campbell University of Texas Health Science Center San Antonio, USA
 Dr. S. S. Campbell University of Texas Health Science Center San Antonio, USA	 Dr. S. S. Campbell University of Texas Health Science Center San Antonio, USA

Exhibit on Food Technology-2014

For more information, visit:
www.foodtechnology2014.com

- 200+ Session, Minisymposiums, Workshops, and Exhibitions
- Focus on advancing industry, innovations and education
- Advertising high quality Information of conference/Exhibition for Adding through Quality Global network
- Interaction with World Class Experts from Academia, Research Institutes and New or Emerging Technologies Companies
- Create Opportunities for Networking with Outstanding People
- Special Events
- Other Events and Other benefit can available to participant in exhibit

Call for Abstracts and Paper Submission and Oral Presentation

Key Dates:
 - Abstract Submission Deadline: June 15, 2014
 - Early Bird Registration: June 15, 2014
 - Final Registration: July 15, 2014

Speaker Opportunity Available!

Any speaker who is selected and take a role on the topic of speaking is also invited to interact with your peers at the exhibition.

Journal and Associated Society:

General Benefits:

- All accepted manuscripts will be published in OAFCIS Global Journal
- Each manuscript will be provided with Digital Object Identifier (DOI) <http://dx.doi.org/10.13140/RG.2.1.12345.6789>
- We provide cross-references from 30+ international journals

Supported by International Journals:

- Journal of Food Processing & Technology
- Innovative Technology
- Journal of Nutrition & Food Science

Symposium:
 "Sugar and Fat Are Bad to You?" by Dr. John Wayne Bechtel

Workshop:
 "Food Materials and Applications in Food Manufacturing Process and its Safety Issues" by Prof. David Y. C. Long

Updates of Action Plan

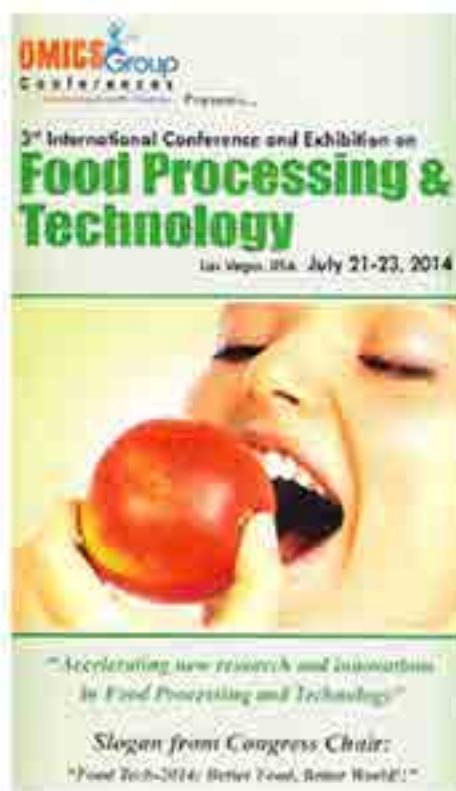

Updates of Action Plan

3. Endorsed Staff / Colleague to join in the 3rd International Conference and Exhibition on Food Processing & Technology

Accepted/Funded:

- ✓ Dr. Ma. Cristina B. Gragasin
Paper presenter: Utilization of Mango Peels as Source of Mango Peels
- ✓ Dr. Michael Gragasin
Paper presenter: Design and Development of Village Level Corn Mill

Benefits to PhilMech

1. Promotion of Philippine products e.g. mango powder
2. Expanded Philmech's network with various researchers, scientists and industry players in the United States and other participating countries.
3. Established R & D collaborations in the area of postharvest, food engineering and conversion of solid wastes into usable products.
4. Possible R&D collaboration with Gallo Corporation re adaptation of a novel drying technology (RW drying technology) in the Philippines.
5. Some of approved research projects for 2014 were influenced by knowledge gained during the trip.

Recommendations

1. Allocate more PL480 travel funds for Researchers / Scientists to present their technical papers in an international conferences in the US and/or attend technical skills training on specific research interest.
2. Balanced allocation of EHRDPs budget to major/priority RDE commodities of the Department of Agriculture.
3. Minimize the number of participants attending in similar course / tour.
4. If not against the EHRDPs policy, create an external evaluators in the selection of participants
5. Provision of DSA during the period not covered in the invitation (e.g.

Kansas - Oct 27-30

Oct 31-Nov2 – **No DSA**

UM - Nov 3-5

WSU - Nov 6-10

Acknowledgments

- ATI-EHRDs Program (PL 480) for full financial support
- Washington State University for organizing my visit
- University of Maine for organizing my visit
- FoodTech 2013 conference Organizers for providing 25% waiver of my registration fee
- Department of Agriculture for granting me travel authority
- PHilMech for allowing me to travel on official time

Thank you..

Musuan, Bukidnon*

STATES/INSTITUTIONS/ FACILITIES VISITED

CALIFORNIA

**California Academy of Sciences
University of California at Berkeley**

PENNSYLVANIA

Pennsylvania State University

NEW YORK

Cornell University

CALIFORNIA ACADEMY OF SCIENCES Golden Gate Park, San Francisco, California

Memorandum of Agreement (MOA) - signing between CMU and CAS on research collaboration in botany and biodiversity

OBSERVATIONS

- The CAS Museum is the greenest museum of the world. It is built out of the rubbles of the old museum which was destroyed during one of the strongest earthquakes which hit San Francisco
- It has green roofs

- CAS has about 20 million research specimens, one of the richest collections in the world. The rooftop holds 17 million plants that are endemic to California
- It has a unique extension service to the citizens of California and the whole of the United States by providing educational lectures, hands-on activities, internships and actual experiences
- CAS is an active member of the Bay Area Youth Media Network(BAYMN), that believes that media can be used to engage the youth for social change

LEARNING

Museum

Multipurpose concept of facilities to maximize utilization of resources

Green Roof

Eye opener technology for conservation of mother earth and cooling a building

UNIVERSITY OF CALIFORNIA at Berkeley

- UC Berkeley Botanical Garden
- Jepson Herbarium

OBSERVATIONS

- A non-profit research garden and museum of UC-Berkeley with one of the most diverse collection of plants in the US (including the rare and endangered)
- The Jepson Herbarium has one of the largest collections in North America. It is fully-equipped with facilities that can preserve specimens collected in the 18th century
- The facility provides assistance to people in all walks of life (students, researchers, etc.)

Learning Botanical Garden and Museum

**Multipurpose concept of facilities to
maximize utilization of resources**

**PENNSYLVANIA STATE UNIVERSITY
University Park, Pennsylvania**

- Animal Disease Diagnostic Laboratory
- Biosafety Laboratory

OBSERVATIONS

Animal Disease Diagnostic Laboratory (ADDL)

- The ADDL maintains a community outreach program in cooperation with the industry. Their membership to the National Animal Health Network (NAHN), enables them to harmonize common diagnostic procedures.
- They are responsible for the Pennsylvania Egg Quality Assurance Program that ensures safe and high quality eggs in the market.

Biosafety Laboratory

- The PSU Biosafety Laboratory is a very new facility and a Level 3 laboratory that can detect new pathogens
- Level 3 laboratories possess state-of-the-art diagnostic facilities

Learning

A university can be of great help to countryside development by sharing the various expertise and facilities available in the University

CORNELL UNIVERSITY
Ithaca, New York

Observations

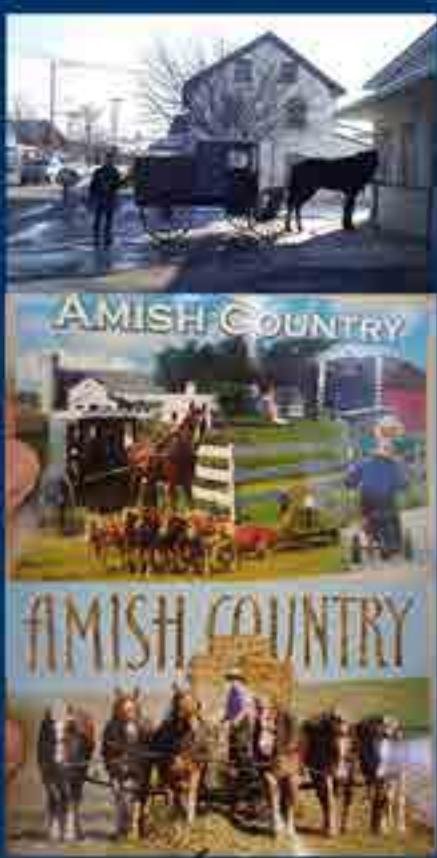

- The group visited the Teaching Dairy Barn (TDB) which was very impressive; the high-milking cows were uniformly fed and milked. It supplies the state of New York and the University with quality milk
- It has a modern milk processing plant. Although small but designed as scalable for commercial purposes.

- Cornell University maintains greenhouses and growth chambers for smart-innovative researches hosting about 400 projects annually.
- High tech research facility tailored to locality's condition
- They have student farm
- They conduct farm work party

Learning

- Community-needs based R and E
- Engagement of students in the farm updates them on the latest farming technology and management, and develops in them the values of teamworking
- Farm work party develops the spirit of volunteerism, and delivers enjoyment while working

**AMISH ORGANIC
FARMING VILLAGE**

**LONGWOOD
GARDENS**

Kennett Square, Pennsylvania

**Our heartfelt
thanks and gratitude to
ATI for the opportunity
and the funding!**

Observation

**Glass garden contained many economic species of plants and commercial products displayed
Treated, Endemic and economic plants can be propagated in a Greenhouse**

Annex J.1

D.A. Team Report

D.A. TEAM REPORT

INCUBUNAEC PHILMECH (DECEMBER 10, 18, 2013)

CONTEXT

- The itinerary of the study tour was arranged by the Central Mindanao University
- Last minute changes in the list of participants
- We were included on the list barely ten days before departure
- The DA Team does not know exactly what we will do but only guided by the study tour mission
- On that basis we just rode on the proposed IT to visit two Universities and the other places we just decided while the tour was ongoing

PURPOSE, DATES AND PLACES OF TRAVEL

- Expository and benchmarking activities on research and extension services in US Universities and other related institutions
- December 10-18, 2013
- Pennsylvania State University, Main Campus
University Park, Pennsylvania
- Cornell University, Ithaca, New York
- Maple Farm Produce Market, Lancaster County, PA
- Hershey's City, PA

PENNSYLVANIA STATE UNIVERSITY MAIN CAMPUS

PENNSYLVANIA STATE UNIVERSITY
MAIN CAMPUS

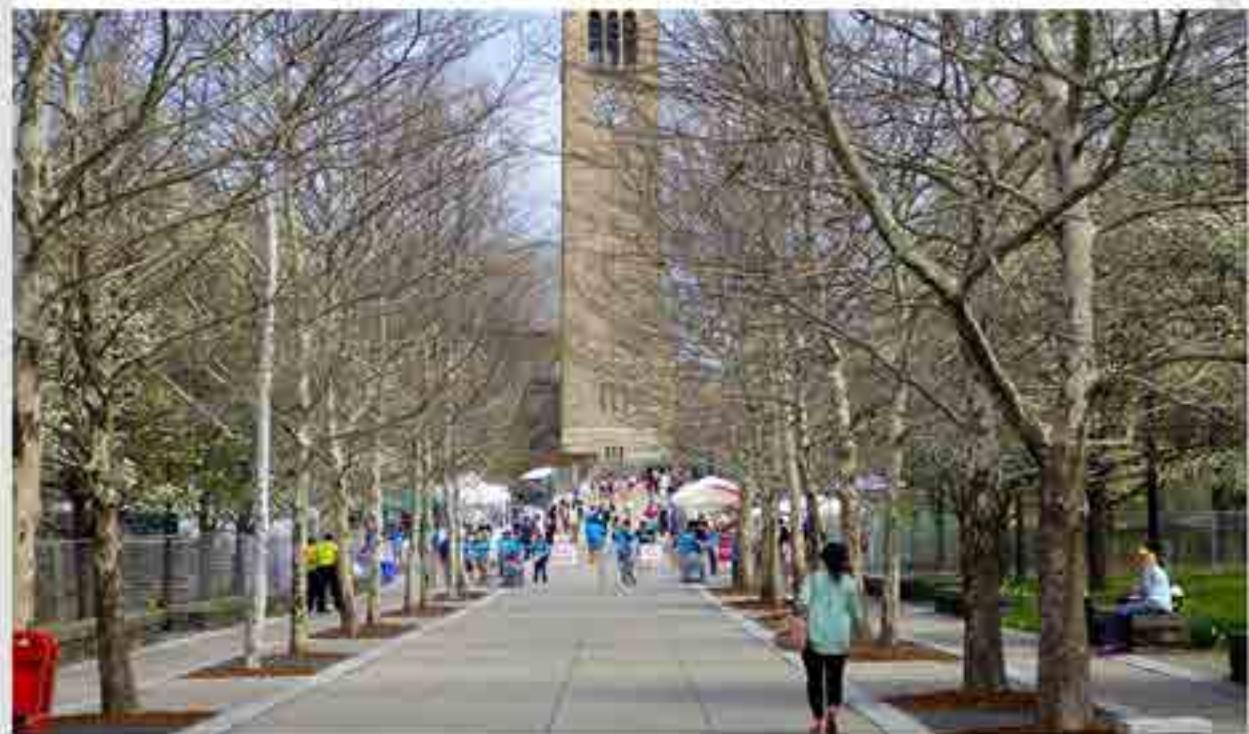

PENN STATE U

CORNELL U

CORNELL U

CORNELL U

SHADY MAPLE PRODUCE MARKET

SHADY MAPLE PRODUCE MARKET

SPECIFIC PURPOSE

- The study tour served as benchmarking activity in the state and trends of agricultural extension services in the selected universities and allied institutions which will be the basis for development of relevant programs to deliver extension support, educational and training services to the agriculture sector.
- The study tour kept abreast the participant in the crafting of relevant and appropriate extension programs in postharvest and mechanization.

DA ATTACHED AGENCY PARTICIPANTS

- Dr. Jovita Corpuz, Executive Director, ACPC
- Ms. Ma. Cristina Lopez, Director II, ACPC
- Ms. Diosile Arida, Division Chief, Admin, NAFC
- Dr. Rodolfo P. Estigoy, Chief Science Research Specialist, PHILMech

ACTIVITIES DONE (PSU)

- Our host was Dr. James Dunn, Professor of Agricultural Economics, College of Agricultural Sciences
- He briefed and oriented us on CAS thrust and programs in research and extension
- Tour to research and extension faculties like the Animal Diagnostic Laboratory, and Biosafety laboratory
- Meeting with Agricultural Economics, Sociology and Education Faculty to exchange notes on Research and extension programs

ACTIVITIES DONE (PSU)

- Briefing on horticulture and plant science department research and extension programs
- Briefing and orientation on AGRI PROGRESS DAY (extending R&D results where presentations and displays, demonstrations and tours are done in one place for three days)
- Visit to greenhouses because we cannot visit demo farms in winter.
- Limited movements around the campus because of snowstorm

ACTIVITIES DONE (CORNELL U)

- Dr. Michael Hoffman, Director of University Agricultural Experiment Station and Associate Dean, College of Agriculture and Life Sciences was the host
- He oriented and briefed the Team the overview of the CU Agricultural Research Station, its current thrusts and programs
- He discussed pressing issues posing as threat to agriculture like climate change and the University's contributions to mitigate the problem

ACTIVITIES DONE (CORNELL U)

- Presentation about the Dunhill Student Farm- an innovative approach to attract young people to try agriculture through participatory and hands on farm activities and projects like organic agriculture
- Group meeting with faculty and research staff to discuss issues and problems related to research and extension and the possible collaboration efforts bet CU and the Philippines
- Quick tours to Teaching Dairy Barn, New Dairy processing Plant and greenhouses

ADDITIONAL OBSERVATIONS

- Research and extension facilities at the two universities are top-of-the-line, state-of the-art facilities that can respond to strategic thrust and programs of the institutions
- Funds to R&D do not only come from federal and national governments but also from farmers and private institutions benefitting from the R&D results
- PSU and CU have a world class research farms that are bridge between academic discovery and commercial application which contribute to a thriving economy

ADDITIONAL OBSERVATIONS

- They have systematic and integrative extension modalities including the following
 - popular field days to attract farmers and producers,
 - agri progress days to showcase R&D results in interactive, family oriented and fun manner
 - Local school tours
 - Student farms to attract young people to agriculture
 - Popularized R&D findings to suit extension clienteles
 - Researchers popularized their technical recommendations, through IEC materials
- Teaching dairy barn for mentoring and coaching entrepreneurs

SIDE TRIPS TO OTHER INSTITUTIONS

- Shady maple farm produce market
- AMISH community market that sells organically grown produce
- Organic or traditional agriculture is not a program but life itself (lifestyle), they live it, their lives and livelihoods revolve around it
- Cannot go to farm sites because it was winter

SIDE TRIPS TO HERSHEY'S

- Quick tour to Hershey's chocolate world the biggest chocolate processing facility
- Tour of the facility showed how processing of chocolate is done from cocoa beans producing countries to delightful chocolate products like bars and kisses
- The US does not produce cocoa beans but get these from tropical and African countries.
- Interactive mode of engaging clients like making your own bar, high tech 3D theater and amusement activities in the PARK

OTHER PROPOSED IT

- Long Island Experimental Station, New York
- Washington, D. C

REFLECTIONS/LESSONS LEARNED

- The expository and benchmarking tour has widened the horizons of the participants in terms of how developed countries like the US do their RD&E in the agriculture sector.
- Extension modalities like agri-progress day, student farm, dairy teaching barn and other adult learning methodologies can be localized or contextualized
- The interphase between research and extension is optimized because these institutions both conduct research and extension

- Research is demand driven by the industry so extension is efficient and effective
- Research results are packaged in such a way that these meet the needs of the clients through popularization of research results, provision of interactive ways that everyone can appreciate these like integrating fun and family activities into the agricultural shows
- Extension function of the Universities visited is very strong adopting the cooperative extension scheme under the land grant agreement

ON ADMIN NOTES

- More thorough planning of the study tour including the IT, administrative arrangements like selection of participants, longer duration to maximize exposure and more specific mission objectives
- The timing of the study tour was not convenient because it was winter in the US. It was the worst winter in the West Coast according to residents. Three days out of the eight day stay, there were snow storms.

THANK YOU

Annex K

**Report on Study Tour of the Cooperative Extension System
in the USA**

OBSERVATIONS AND LEARNINGS IN THE US TOUR

DATE OF TRAVEL: DECEMBER 15-22, 2013

STATES VISITED: WASHINGTON DC,
NEW YORK, NEW JERSEY, PENNSYLVANIA

USDA NIFA, WASHINGTON DC
DECEMBER 16, 2013

The US Cooperative Extension system is anchored to the land-grant universities which are the front door to extension at grassroots level

Land-grant universities are supported by NIFA by funding extension mission and to supplement annual state and county funds

**Implemented project called
Extension Disaster Education
Network (EDEN)**

**Program focus on rapid
response to areas
affected by disasters
aimed to reduce impact
of such disasters.**

**Agricultural and
Environmental Extension**

**Premier online education
to ensure abundant and
safe food supply to all.**

Climate Change and Bioenergy Extension

- Extension programs towards adapting changing weather patterns
 - Sustain economic vitality while also reducing greenhouse gas emissions
 - Increasing carbon sequestrations

Small Business Innovation Research

An applied science technology transfer program that cater to small business

CORNELL UNIVERSITY AG-EXTENSION OFFICE, MANHATTAN, NEW YORK
DECEMBER 17, 2013

Discussion on cooperative extension program that includes 4-H, nutrition and health and market maker

Extensive 4-H program which cultivates the importance of life skills in the youth

CORNELL UNIVERSITY AG-EXTENSION OFFICE, MANHATTAN, NEW YORK
DECEMBER 17, 2013

Discussion on cooperative extension program that includes 4-H, nutrition and health and market maker

Promotion of healthy eating, food safety, health and wellness and urban and rooftop agriculture

CORNELL UNIVERSITY AG-EXTENSION OFFICE, MANHATTAN, NEW YORK
DECEMBER 17, 2013

Discussion on cooperative extension program that includes 4-H, nutrition and health and market maker

MM is an internet-based market trading system. It is a web-based and phone app platform that links food producers to new markets

CORNELL UNIVERSITY COOPERATIVE EXTENSION (CUCE) LAB., NEW YORK
DECEMBER 17, 2013

Visit to existing projects on hydroponics, aquaculture and aquaponics done in high rise buildings

The Nutrient Drip Flow Technique (NDFT) is used in hydroponics to produce 2 million hills of lettuce in 1 acre space / year.

CORNELL UNIVERSITY COOPERATIVE EXTENSION (CUCE) LAB., NEW YORK
DECEMBER 17, 2013

Visit to existing projects on hydroponics, aquaculture and aquaponics done in high rise buildings

The Biologically driven re-circulating High Speed System (BHS) aquaculture technology is used to produce tilapia at 2 lbs/gal water per harvest

RUTGERS UNIVERSITY, NEW BRUNSWICK, NEW JERSEY
DECEMBER 18, 2013

Discussion on Community Supported Agriculture (CSA) extension Strategy

CSA is an extension model of shared service and responsibility and values volunteerism, mutual understanding, partnership and political support

Discussion on Community Supported Agriculture (CSA) extension Strategy

CSA identifies and determines food needs of the community which can be produced locally & deliver these farm goods to the buying public at intervals.

Discussion on Community Supported Agriculture (CSA) extension Strategy

CEO caters to urban youth & help address prevailing problems of drug addiction, crime and broken families, urban agriculture & leadership development

MIDDLESEX COUNTY COOPERATIVE EXTENSION OFFICE, NEW JERSEY
DECEMBER 18, 2013

Discussion of EARTH Center.

It envision farmers fighting against hunger by means of environmental conservation, agriculture, research, teaching/training and health.

Earth Center provides sound research-based information to meet the needs of country residents

MIDDLESEX COUNTY COOPERATIVE EXTENSION OFFICE, NEW JERSEY
DECEMBER 18, 2013

Discussion of EARTH Center.

It envision farmers fighting against hunger by means of environmental conservation, agriculture, research, teaching/training and health.

The 4-H Program & Supplemental Nutrition Assistance Program (SNAP-Ed) aims to reduce hunger, prevent obesity, improve nutrition, food safety and accomplished thru community-based projects.

COLLEGE OF AGRICULTURE, PENNSYLVANIA STATE UNIVERSITY
DECEMBER 19, 2013

Discussion of EARTH Center.

It envision farmers fighting against hunger by means of environmental conservation, agriculture, research, teaching/training and health.

Cooperative Extension Service covers wide ranging programs which includes:

- Consumer Science Service,
- Agricultural economics, private land issues, energy development and contract leasing,
- Obesity problems

COLLEGE OF AGRICULTURE, PENNSYLVANIA STATE UNIVERSITY
DECEMBER 19, 2013

Discussion of EARTH Center.

It envision farmers fighting against hunger by means of environmental conservation, agriculture, research, teaching/training and health.

- Master Gardener program is an extension modality that encourages recruitment of volunteers as extension workers
- Volunteers come from all walks of life including retired professionals & they view their activities as a social concern

RECOMMENDATIONS

Extension programs implemented with success in USA may be a model in crafting similar programs to suit local conditions and implement in the region on pilot basis.

ATI in collaboration with SUCs may offer Master Gardener course to college students and instructors focused on food & water safety concern, food security and food production

RECOMMENDATIONS

Extension programs implemented with success in USA may be a model in crafting similar programs to suit local conditions and implement in the region on pilot basis.

Extension may involve volunteer members like youth, families and farm workers not only in rural areas but also in urban areas

RECOMMENDATIONS

Always start with little ideas and projects that are doable

Collaboration with Cornell University re: NDFT & BHS technology for adaption in the country

RECOMMENDATIONS

The 4 H Youth Development Program may be the platform of youth empowerment in lieu of the Sangguniang Kabataan

Strengthening 4 H program through various school levels

TRAVELMATES:

End of presentation

Annex L

Report on Attendance to the Course on Certified Knowledge Manager at KM Institute in Virginia, USA and Study Tour at USDA-NIFA and at CU Cooperative Extension

**USDA NIFA
Washington DC**

**CU Cooperative Extension
New York City**

**USDA NIFA
Washington DC**

US Cooperative Extension

- translates science for practical applications; engages with public by providing reliable information leading to positive action; and transforms individuals, families, communities and businesses in rural and urban areas

US Cooperative Extension

- is committed to make the world a better place through research, education and extension focusing on sustainable energy, food safety, climate change, nutrition and health, and food security and hunger

US Cooperative Extension

- EDEN
- Agric'l & Environmental Extension
- Extension Services in Serbia
- Programs in Insular Areas
- Climate Change & Bioenergy Extension
- Small Business Innovation Research
- eXtension & Sustainability

Learnings

- reducing disaster impacts through education
- working with local communities and finding heroes
- enhancing partnership that put experience and research knowledge to work

Learnings

- rating “success” based on who came back after an activity to ask for more questions or info
- enhancing Community of Practice (CoPs) as learning networks
- emphasizing social benefits of programs/projects

Action Point

Enhancement of AFE Partnership

- ✓ creation/strengthening of Community of Practice
- ✓ development of cutting edge and culturally sensitive projects

Action Point

- ✓ development and implementation of integrated programming - integrating two of the three (research, extension, education) in a project

CU Cooperative Extension New York City

CU Cooperative Extension New York City

- empowers clients via partnership with organizations and businesses
- facilitates the communication, which clarifies and refines issues and solutions leading to program that are supported by research and are appropriate to the diverse need of NY residents

Urban Extension Programs

- MarketMaker
(<http://nymarketmaker.cornell.edu>)
- Nutrition and Health
- Urban Environment
- Family and Youth Development
- Food and Finance High School
- Marine Environmental Lab
- Horticultural Research and Extension

Learnings

- make website robust – educational, trading/enterprise, etc
- tie up with community/faith-based organizations as “food hubs”
- employ “learning right at the field or learning by doing” (walk for wellness, cut the junk, dollar power)

Learnings

help improve environment thru:

- healthy soil, healthy communities
- healthy gardens, healthy youths
- housing energy enhancement
- environment-friendly gardens

Learnings

- involve youth in research, education (STEM) and extension (outreach projects) activities
- adopt “train the trainer” model for youth leaders

Learnings

- tap and train local volunteers to work in research and extension activities that provide benefits to the community

Action Point

Enhancement of e-Extension Program

- ✓ Re-think Learning (e-Learning)
- ✓ Expansion of e-Extension portal/services to activate e-Trading patterned after MarketMaker

Report on Training on Meat Goat Production & Sustainable Agriculture

Training on Meat Goat Production & Sustainable Agriculture

American Institute for Goat Research
Langston University, Oklahoma
University of California – Berkeley
Berkeley, California
November 10 - 21, 2013

Our Group

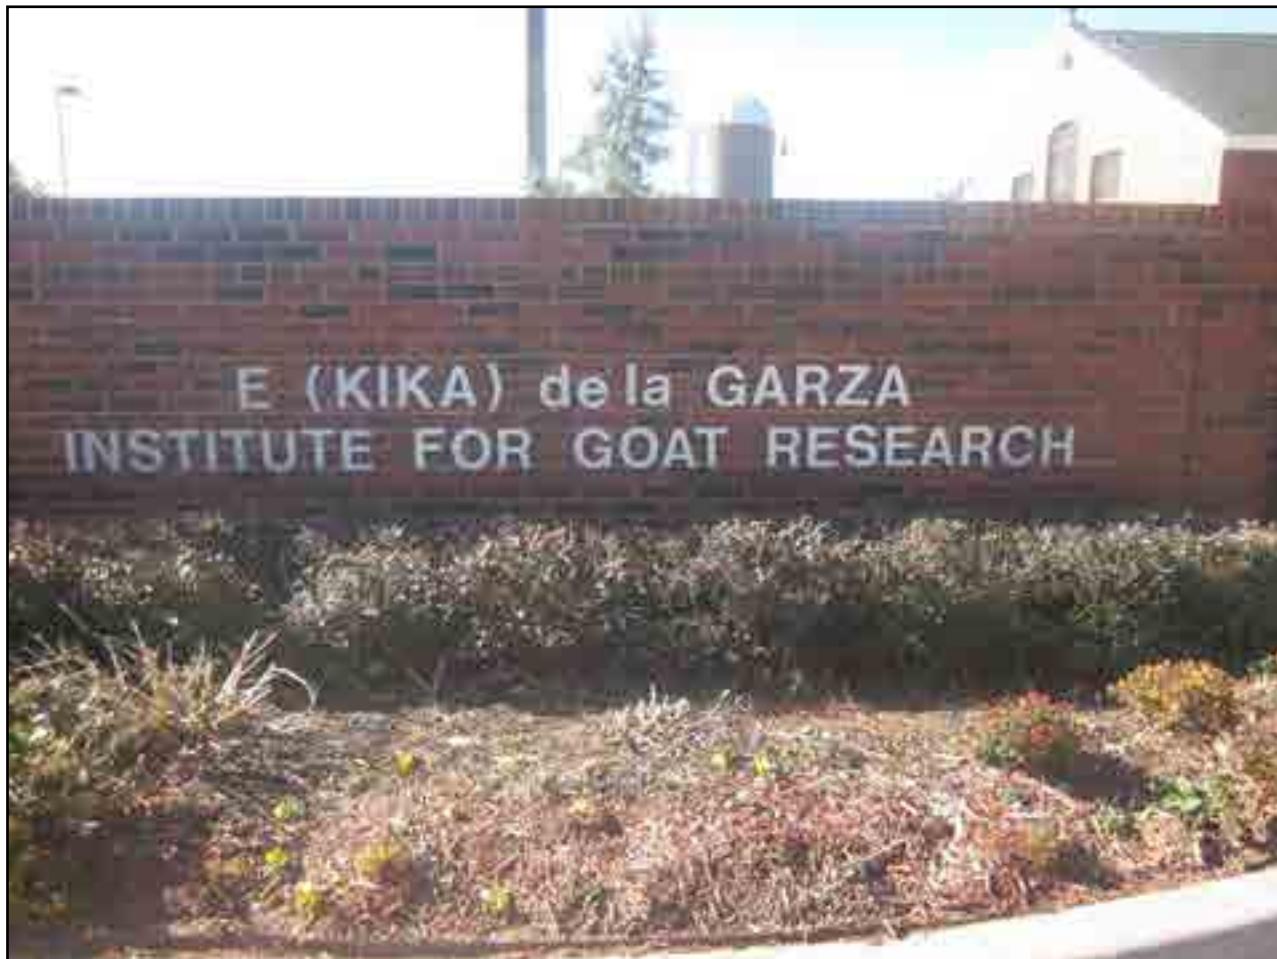

Participants:

- ▶ Dr. Ruth M. Sonaco
- ▶ Dr. Roberto Castro
- ▶ Mr. Abdul Daya-an
- ▶ Mr. Cristino Balancio
- ▶ Ms. Rosalinda Lucero
- ▶ Ms. Ma. Graciela Danza
- ▶ Dr. Paul C. Limson
- ▶ Ms. Floreliz Avellana
- ▶ Mr. Braulio Castro, Jr.
- ▶ Mr. Manuel R. Jarmin
- ▶ Mr. Joaquin Abejar, Jr.

Background

- ▶ American Institute for Goat Research (AIGR)
 - Located inside the Langston University
 - Established in 1983 in Texas but moved to Oklahoma
 - Conduct research and development activities on goat production, dairy and processing
 - Results of research activities are disseminated thru extension services
 - Trends:
 - In the US, there is huge demand for goats
 - Goat milk needs to be processed to be more financially rewarding

Facilities at AIGR

- ▶ Feed Mill Plant – 1 ton capacity
- ▶ Computerized weighing scale
- ▶ Goat housing with automated feeding system & 600-gallon water machine
- ▶ Animal clinic
- ▶ Milking parlor
- ▶ Forage and pasture machineries
- ▶ Dairy processing plant
- ▶ Pasture and grow-out areas
- ▶ Skin tanning facility

Modules by AIGR Specialists

- ▶ Research and Development programs
- ▶ Disease incidence & prevention (internal parasitism)
- ▶ Nutrition and Forage

In Langston University

With Dr. Roger Merkel

Boer Goats

Alpine Goats

Spanish Goats

Observations / Learnings

- ▶ Breeding practices:
 - Use of Intra-uterine Laparoscopic Artificial Insemination (AI) where 80% conception rate is achieved for Angora goats

Observations / Learnings

- ▶ Breeding practices:
 - Use of older bucks (1.5 years old or older) was observed as the practice of the AIGR rather than younger bucks (<1 year old)

Observations / Learnings

- It was observed that a lot of imported parent stocks or breeders in different DA stations died due to unsuitable climatic condition, disease outbreak, etc.

Observations / Learnings

- Use of Integrated Parasite Management (IPM) approach and/or combination of dewormers

Rotational grazing system

Observations / Learnings

- ▶ Use of FAMACHA® technique in determining the infestation of intestinal worms of the *Haemonchus sp.* in the mucous membranes of the goats (eyelids)

Observations / Learnings

- ▶ Goat Nutrition:
 - Mixed feeding system 60 – 70% forage (hay) and 30 – 40% concentrates

Observations / Learnings

- ▶ On milking procedures and safe milk handling:
 - They use somatic cell count with an indicator of not more than 1.5 Million in addition to the mastitis test

Observations / Learnings

- ▶ Promote other goat products rather than meat only
 - Different types of Cheeses
 - Jerky
 - Leather

Observations / Learnings – 2

- ▶ It was noted that some diseases can cause reduction or loss of production even in a well-managed farm
 - Caprine Arthritis Encephalitis (CAE) and
 - Caseous Lymphadenitis (CL)

Oklahoma State University

Modules by CNR-UC Berkeley Specialist

- ▶ Sustainable Agriculture
- ▶ Climate Change and its impact to agriculture
- ▶ Strategies for Climate Change mitigation & adaptation
- ▶ Organic farming policies & practices
- ▶ Extension work

Visit to Petaluma Poultry Farm

Largest Organic Poultry Farm In California

Visit to Kastania Vineyards

Organic Grape Wine

Visit to Private Goat Dairy Farm

[Interview with owner](#)

[Goat milk products](#)

University of California – Berkeley

Graduation Time!

Recommendations

- ▶ Inclusion of small ruminant artificial insemination into the current Unified National Artificial Insemination Program (UNAIP) for large ruminants
 - Train DA Personnel on the Laparoscopic AI technique for fast reproduction system including embryo transfer
- ▶ Purchase imported frozen semen which is more economical rather than maintaining imported parent stocks
 - Need for a more organized genetic improvement program (GIP) for small ruminants

Recommendations

- ▶ Use of FAMACHA® technique in determining internal parasite load of goats
- ▶ Test effectiveness & efficiency of different dewormers
- ▶ Adopt the hay-concentrate feeding system (60% hay & 40% concentrate)
- ▶ NDA & other dairy agencies should purchase somatic cell counting machine in determining quality of milk

Recommendations

- ▶ Establish state of the art facilities to cater to the livestock industry
 - Semen banks to preserve semen of superior breeds of goats sourced from foreign countries
 - Equip Regional Animal Disease Diagnostic Laboratories (RADDL)
 - More veterinary hospitals for management of sick animals
 - Modern milking facilities
 - Promote marketing of goat products particularly cheese and leather

Recommendations

- ▶ Continuous exchange of information & research findings on climate change effects & mitigation and adaptation strategies
- ▶ Establish formal partnership with AIGR & UC Berkeley

Recommendations:

- ▶ On Capability Building of Farmers, AEWs, RBOs
 - ▶ – Need for training/updating on the following aspects
 - ▶ . Animal nutrition, and feed formulation
 - ▶ . Forage and Pasture Development
 - ▶ . Proper housing Management
 - ▶ . Integrated Parasite and disease control and prevention
 - ▶ . Milk processing, other products development
 - ▶ . Waste management,Organic Farming
 - ▶ . Farm management and Record Keeping
 - ▶ . Farm enterprise management/entrepreneurship
 - ▶ . Climate Change adaptation and mitigation strategies

**Cycle Long Trainings or ladderized modality*

Recommendations

- ▶ For short duration Trainings in USA:
 - ▶ -Trainings focused more on research findings and extension modalities/experiences
 - ▶ -More hands-on/and project visits
 - ▶ -Training conducted in spring or summer
- ▶ Include other policy making bodies in the educational tour
- ▶ Include some slots for AEWs, farmers, RBOs

Recommendations

- ▶ Continuous exchange of information & research findings on climate change effects & mitigation and adaptation strategies
- ▶ Establish formal partnership with AIGR & UC Berkeley

Thank you for your time!

Annex N

Report on Executive Study Tour to Observe the Cooperative Extension Systems of the USA

Executive Study Tour to Observe the
Cooperative Extension System of the
United States of America

Nov. 20-22, 2013

The Visits

Briefing/Discussion on the US Cooperative Extension System by the USDA-NIFA at Washington DC

- Climate Change and Bioenergy Program
- Renewal Resources Extension and Community of Practice
- Community Foods
- The Extension Activities of the USDA Office of Pest Management
- Extension and NIFA
- The Electronic Extension
- Extension Disaster Education Network (EDEN)
- Obesity and Nutrition Issues in the Insular Areas
- The Environmental Systems Programs

The US Cooperative Extension System

- The Cooperative Extension System is a nationwide non-credit educational network.
- Each US state and territory has a state office at its land-grant university and a network of local or regional offices.
- It is a partnership of the federal government, with states and counties.
- Each entity contributes resources. Funding ratios vary by state.

The Cooperative Extension Functions

- It is the continuing education service for the land-grant mission: agriculture, home, youth, finance, and community development.
- It disseminates knowledge to the citizenry it serves.
- It engages stakeholders and completes the feedback for the university.

Visit to Virginia State University at Shenandoah County

- Mr. Robert Clarke of the Virginia State University in Shenandoah County in Woodstock, Virginia, USA welcomed the Philippine delegation.
- He discussed the different programs, projects and activities being undertaken in the university especially program on the 4-H club.
- He emphasized that the people's lives in the county were improved through the educational programs implemented based on research and developed with input from stakeholders.
- He also stated that the county's programs were focused on agriculture and natural resources, family and consumer sciences, 4-H youth development and community viability.

Meeting with Officials of Virginia State University

- The Philippine delegation also met with officials of the Virginia State University (Virginia Tech) to discuss about the Virginia cooperative extension, extension program planning and reporting, program area discussion and the Virginia agricultural experiment stations, among others.
- Through innovative, science-based programs, the Virginia cooperative extension promotes effective soil testing, fertilizer application, insect management and pesticide use, all of which help reduce unnecessary costs to the producer and protect the environment. Animal tracking and educational health programs promote food safety and safeguard plant and animal health.

Meeting with Officials of Virginia State University

- Also discussed in the meeting were topics on agriculture and engineering, 4-H programs, science and engineering and technology, competitions at the local levels, exercise, partnerships and healthy foods.
- Under the 4-H program of the university, a wide variety of high quality of programs were organized like communication and expressive arts, family sciences, foods, nutrition and health, leadership and personal development, natural resources and environmental education, plants, soils and entomology, science, technology, engineering and math.

Tour and Briefing at North Carolina A & T University and at Guilford County Cooperative Extension Office

- The group was ushered to a Mixed Greens Community Garden, Legacy Demonstration and the DaShenna Huey Learning Center which were all managed by Master Gardener Volunteers in the community.
- The extension office implemented and encouraged the involvement of the residents in the community garden. The objectives are to save money, eat healthier, get fit, make friends, relieve stress and teach children. People came together and grow food.
- The extension office work with the church and Department of Health. Vacant lots and parks were utilized for community garden.
- Waste recycling was also taught to the residents.

Tour and Briefing at North Carolina A & T University and at Guilford County Cooperative Extension Office

- The group also visited the North Carolina Agricultural and Technical State University Field Research and Demonstration were strawberry, moringa and other crops are grown under controlled temperature (greenhouses).
- The group also visited another research station of the University were Natuculture is being studied and researched. Natuculture is a human made system that mimics nature in human disturbed landscapes.

Insights

1. On Extension System

- Extension in US is implemented by the University unlike here in the Philippines.
- They also work and collaborate with the county or in the Philippines, the local government units.

2. On Extension Programs

- Overall, similarities are evident in the extension programs of both the Virginia cooperative extension system and the Philippines. The Legacy Demonstration Garden, for example, is also the same with the ATI-RTC 7 Adopt a School Program which are designed for school children to appreciate and value farming.
- The 4-H program in Virginia covers diverse needs of the community which is lacking in ATI's 4-H programs. Involvement of younger children is prominent and had access to a variety of programs. Age requirement is younger as compared to ATI's 4-H which is 15.

2. On Extension Programs

- The Education and Disaster Extension Network (EDEN) is also a noteworthy endeavor in addressing the impact of climate change and disasters which can be adopted by ATI. Future collaboration has to be done.
- The rainwater harvesting project is notable which could be adopted by all ATI RTCs.

3. On Planning, Monitoring and Evaluation of Extension Programs

- The Virginia Cooperative Extension (VCE) Programming Process is also the same process introduced at ATI by JICA on TSEP-RLI and UPLB on Community-based Programs Extension Management but were not institutionalized nationwide although these approaches are used in crafting community-based programs at the field level mostly by NGOs.
- VCE has a strong M & E systems in place. The budget is measured against how many projects and how much food produced and how many area covered. This is not yet done by ATI which needs strong capability building.

3. On Planning, Monitoring and Evaluation of Extension Programs

- Virginia University employed electronic reporting from the faculty. Similarly, ATI also has electronic reporting through the ATI web-based PMES. The only drawback is the slow internet connection connections in some of the regions. Also, just like the VCE, the Institute had conducted reaction and outcome levels evaluation of its programs. ATI also formulated guidelines in preparing a written report of evaluation findings just like the VCE.
- The University created Impact Teams by commodity responsible in tracking the progress of the program. If this approach will be introduced at ATI, thorough training and exposure is needed.

3. On Planning, Monitoring and Evaluation of Extension Programs

- The University conducted impact evaluation internally. However, external impact evaluation was also encouraged but would depend on the availability of the University's budget. At the Institute, impact evaluation is planned to be conducted by external parties to avoid subjectivity and bias.

Recommendations

1. On Extension Programs and Projects

- Community food concept – helping small farmers by connecting with farmers' markets; low income farmers can get access to healthy foods; local produce can be sold to school cafeterias, especially those near fast foods and can help in reducing obesity.
- Encourage the youth, apart from the 4-H members, to go into urban agriculture.
- Rainwater harvesting should be institutionalized to promote green building in all the RTCs especially in the dormitories and guest houses.

1. On Extension Programs and Projects

- The Legacy Demonstration Garden that showcased waste recycling, vermicomposting, ornamentals, herbs, information about weather and other technologies which are designed for children can also be adopted at ATI-CO garden in support to the Learning and Discover (LeAD) Center. This can also be strengthened through the project "Adopt A School" in collaboration with DepEd in urban areas.
- Extension programs can go beyond production technologies and should transcend to nutrition issues and health aspects like obesity.

1. On Extension Programs and Projects

- The program on developing next generation farmers can also be considered as such – (1) farm transition program which focuses on farm family and identifies who within the family will take on farming; (2) Beginner farmer-retirees or individuals willing to go into farming; (3) Master volunteer – much like the local farmer technician concept but the difference is that the master volunteer is not necessarily a farmer. The MV undergoes rigid trainings for months at once a week sessions and after course completion is given a certification to be a master volunteer in the community
- ATI can collaborate with Education and Disaster Extension Network (EDEN) of USDA-NIFA to develop disaster and climate change resilient communities.

2. On the 4-H Program

- The 4-H youth development program can also take into consideration these mission areas: (1) science, technology, engineering and math; (2) healthy living; and (3) values orientation and love of country through educational, residential camps / character camps.
- The age requirement of 15 years old should be lowered to encourage children to participate in 4-H activities.
- Summer activities should be designed to allow children to engage in learning activities that will encourage them to appreciate agriculture and other activities such as gardening and vermicomposting.

3. On Planning, Monitoring and Evaluation

- Collaboration with Virginia Tech and North Carolina can be done for capacitating the skills of planning officers, M & E officers and focal persons of 4-H and other programs.

4. On Competitive Grants

- Budget grant is a competitive process and favors non-profit groups; should be community based and not community placed.

5. On Planning Similar Expository Tour for the Future

- Two-weeks instead of 3 days trip duration so that actual implementation of the extension programs with beneficiaries can be observed for the participants to have a deeper understanding of program implementation at the grassroots.
- The program should be regularly carried out to expand the understanding and enhance knowledge of how agricultural extension in the USA is being carried out and cull out best practices that can be adopted in the Philippines not only by ATI but also by the LGUs and SUCs.

5. On Planning Similar Expository Tour for the Future

- The planning officers and M & E officers should also be given the priority to undergo such exposure.
- The 4-H Focals and Presidents of the clubs should also be given the opportunity to understand and appreciate the 4-H programs of the Cooperative Extension System of the USA for them to be able to craft innovative programs in collaboration with their respective planning officers.
- One or two-day acclimatization period must be included in the schedule to adjust to the new weather of USA and to increase listening and learning absorption on the topics discussed. This will also participants to sleep while the discussion is going on.

Problems Encountered

Problems Encountered

- The schedule for 3 days was too hectic and there was no time for the group to acclimatize.

The Group

The Group

- Vilma Patindol
- Elsa Parot
- Rosemarie Dulla
- Rogelio Evangelista
- Angelito Quirog
- Leonila Caiz
- Jose Tanhueco

Thank you

EHRDP Scholars

The screenshot shows a news article titled "Another of ATI's Pride". The article features a photo of a man in academic regalia receiving a certificate. The text discusses Mr. Warren Macalito de Guzman, an EHRDP scholar from Laguna, who graduated with a weighted average of 1.089 and received an Academic Excellence Award.

Thematic 3: Expanding Partnerships in Advancing Excellence in AF Extension

Another of ATI's Pride

Another EHRDP Scholar making waves in the academic field is Mr. Warren Macalito de Guzman from Alaminos, Laguna. He believes that "the most important graduation today and always learning tomorrow is commendable the day after" (Baker, Newton D.). This was his guiding principle in life as a scholar and as an extension worker of the Philippine Coconut Authority. He was given an "Academic Excellence Award" by having a weighted average grade of 1.089. Indeed, he is worth emulating. Read more about him by clicking the link on featured stories.

The screenshot shows a news article titled "It's Pay Back Time for EHRDP Scholars". It features a photo of three women (Ms. Lovella Paret, Ms. Madel Jauringue, and Mr. Roy Victoria) presenting at a technology fair. The text describes their role as resource persons in a two-day technology fair for farmer leaders and agricultural technicians in Sta. Cruz, Laguna.

It's Pay Back Time for EHRDP Scholars

STA. CRUZ, LAGUNA - Selected EHRDP scholars were tapped as resource persons in the two-day Technology Fair on Agricultural Breakthroughs for farmer leaders and agricultural technicians of Laguna. It was held last October 24-25, 2013 at the Asia Blooms Hotel in Brgy. Patimbao, Sta. Cruz, Laguna. There were about fifty (55) participants to the said fair. Ms. Nelia Alzona, EHRDP Focal Person of ATI-IVA together with Ms. Marini Dayanghirang,

Ms. Lovella Paret, Ms. Madel Jauringue and Mr. Roy Victoria managed the two-day activity. Part of the action plan of the ATI-EHRDP Scholars was the conduct of technology forum for them to disseminate results of their studies to the end-users who are the farmers and technicians. They simplified their presentation and highlighted only those that might interest their intended audience. Surprisingly, there were many questions raised by the farmers and as indicated in the over-all training evaluation, they were able to acquire new information from the speakers.

Gilmar Gaspar

Gilmar Gaspar Story

Mon, 08/11/2014 - 10:47pm by [Jesus A. de Leon](#)

He made it with diploma: *Gilmar Gaspar Success Story*

As a head of the family, Gilmar V. Gaspar, 53 of Bagong Sikat, San Jose, Occidental Mindoro wasn't sure how he would realize his dream of going back to school for his PhD degree. Even with a full-time job, there wasn't much money left after paying various bills and other expenditures of the family, thus he cannot imagine saving over for tuition or books.

"Glim" as his family and friends call him struggled early in life to pull himself out of poverty. He remembered his father's income was not enough for their daily needs but he promised himself that he would finish his study to escape from the chain of poverty. "Yung pagiging mahirap ko, hindi ako nagmaramdali, I took one step at a time rearing what I have", he says.

He completed his elementary education at San Jose Pilot Elementary School and his secondary education at San Jose National High School. He finished his Bachelor of Science in Agriculture (Farm Management) at Central Luzon State University in September 26, 1983 and received a Leadership Award.

Real courage breeds success

Fri, 03/25/2016 - 7:38am by Enan Pasan

Success is not how much you learn, but in never stopping to learn," she started.

Nanette M. Rosales came from a poor family. She said that she would not be able to finish her study if she did not pass the scholarship from the Coconut Producers Federation (COCOFED), Inc. She experienced a lot of difficulties that somehow discouraged her to pursue her study. But as a woman with strong faith, despite the hardships she went through, Nanette finished her bachelor degree in Agriculture from Luzonian University Foundation, Lucena City in Quezon.

Having earned her bachelor degree, she started working at the Department of Agriculture Oriental Mindoro Agricultural Experiment Station as casual employee in 1983. A six months after, with her dedication in work and excellent job performance, she was then promoted as Livestock Inspector for a permanent post.

"God poured out His blessings to me. He created perfect opportunities for my career growth. I worked as Livestock Inspector for three years. Through hard work, I became an Agriculture and Food Technologist. With the new responsibility, I was more inspired to make a difference in the lives of others," Nanette narrated.

With a heart for farmers, she put her lifelong knowledge, as well as new skills she learned through trainings and consultation with experts to help them uplift their lives. Together with her co-workers, they went to field just to cater the needs of their clientele.

With every turn of page of her career, each day presented new challenges to her. Nanette remembered a well-known Biblical verse in Luke 12:48: "From everyone who has given much, much will be demanded; and from one who has been entrusted with much, much will be asked." The verse inspired her to go back to school. She said that her knowledge on her chosen field was not enough to teach wider scope of farmers. "I need to study to be updated on the latest technologies in farming," Nanette claimed.

In 1992, without any doubt, at her own expense, she took up her Masteral Degree in Agriculture from Pampanga Agricultural College, Pampanga. Though she experienced difficulties in balancing her time with work, family and schooling, she still succeeded and earned her MS degree major in Crop Science in 1994.

Link: <http://ati.da.gov.ph/mimaropa/feature-stories/glimar-gaspar-story>

Maricel Endico

Pursuing Greater Heights: The EHRDP Scholarship Success of Ms. Maricel Endico

Mon, 03/02/2015 - 10:41am by [minerva10](#) [log in]

Growing up in a family with very limited financial resources, Maricel Endico's dream to grasp greater heights through education was never shaken. As eldest among the four siblings, she had a goal set in mind to save her family from the bondage of poverty.

Destiny seemed to cooperate with her humble undertakings. With persistence, she finished Bachelor of Science in Agricultural Education at Surigao State College of Technology (SSCT) despite the toughness of being a working student.

Blessed with mental acuity, she passed the Licensure for Teachers (LET) and the Caraga Service Professional Examination in the same year. These achievements paved way to her employment at LGU Mainit as Agricultural Technologist.

In pursuit of equipping herself with efficient extension delivery services, Maricel was closely working with Agricultural Training Institute (ATI) – Caraga in year 2004.

She never had expected that working with ATI could take her to greater heights, wider professional opportunities and higher personal growth.

Maricel took-up Master in Environmental Management thru the ATI's Expanded Human Resource Development Program (EHRDP) in 2013.

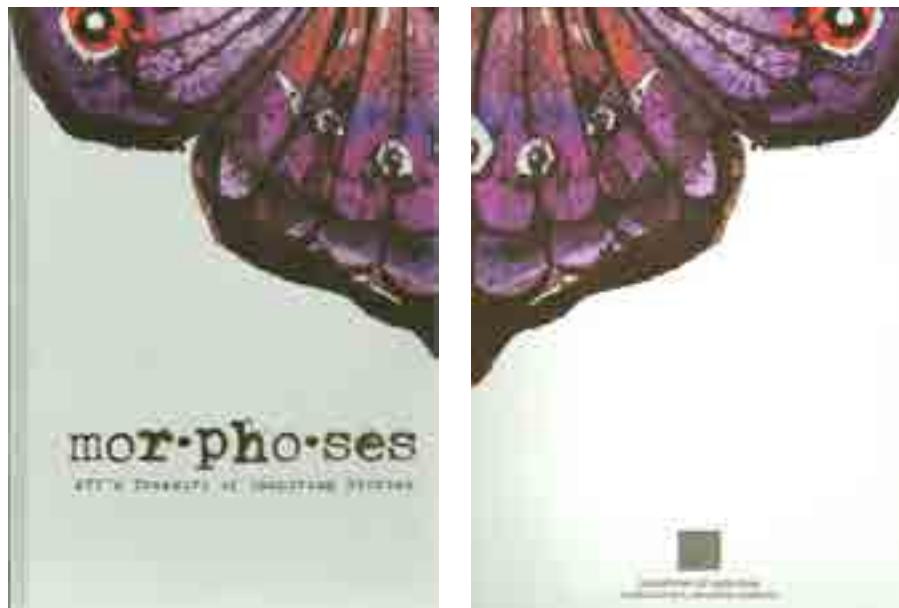

One of the highlights of her scholarship journey was the impact and recognition of her research study entitled *Assessment of Mercury Contamination In Sediments and Common Carp in Selected River Mouth of Lake Mainit, Philippines*. The study was presented in an international conference and accepted for international publication for release in 2015.

Today, Maricel joins the pool of college professors in her alma mater SCCT. Maricel considers ATI Caraga as saving grace in taking her dreams to greater heights. The completion of her master's degree served as an entryway to brighter door of opportunities and higher professional growth.

Testimonials References

Hector U. Tabbun (Region II)

"The scholarship has helped my family, financially and for me professionally. The Financial assistance made our life easier for no longer think of school fees. More importantly, the program is molding me to be an efficient and effective public servant with the introduction of new ideas and strategies on organization, management, human behavior and public administration.

Likewise, it pushes me to finish the course in line with acceptable standards, quality and excellence. It motivates me to give my best knowing that taxpayers' money is involved and there is a need to reciprocate this with acceptable and right work etiquette. Government employed should be always accorded such kind of assistance so that they will be inspired to pursue higher studies and be more productive.

I salute the Agricultural Training Institute (ATI) for implementing the program. I pray that this activity shall always be given emphasis and funding priority because it really benefits people in government who wants to excel but does not have the means.

From the bottom of my heart and in behalf of my family, thank you, thank you and thank you".

Hector U. Tabbun highly expressed his gratitude for being one of the fortunate recipients of EHRD Program. He emphasized that "...the program molded me to be an efficient and effective public servant with the introduction of new ideas and strategies on organization, management, human behavior and public administration." Moreover, the Program motivates him to bring out the best in his work to view gratitude to the people's money and worth for the opportunity given to him.

Roger Tamayo: "An Epistle from a Scholarship Grantee" (Region II)

Campus Extension Coordinator and College of Agriculture Faculty Member, Cagayan State University at Lal-lo

You cannot give what you do not have. This is an overused adage that suited in my profession as a college teacher in Cagayan State University at Lal-lo few years ago. From teachers' point of view, it reminds me of how educational growth should be valued in academes. However, although many teachers like me are desirous to enrich their knowledge and skills in their own fields of specialization, their scanty wherewithal or finances hamper them from entering the threshold of any post-baccalaureate school.

Actually, this scenario made me quite skeptic in enrolling in the graduate school several years ago. Not until the almighty poured out His abundant and over-flowing graces through the ATI in its EHRDP scholarship program. It was like a feast day full of colorful images of thanksgiving when I availed ATI's scholarship program. Because of it, my high enthusiasm or zeal in widening my horizon has been totally restored.

I appreciate so much this of program of the ATI because it does not only give hope to teachers like me but also encourage more mentors to enrich their knowledge and skills to eventually escalate the quality of education in the whole Philippines. In other words, the program has a rippling effect – through that scholarship given to teachers and workers, my students will be benefited with deeper knowledge and equipped with appropriate skills to be globally competitive. Hence, when they find their jobs, they can contribute in stabilizing and developing our economy.

Moreover, I commend the ATI and its key officials for formulating this mission because it becomes a sine-qua-non partner of the universities and colleges in coping with international standards in teacher's development. This means that through this kind of scholarship program, universities and colleges in the Philippines will be confident in the capability of their faculty members. Thus, their teachers can likewise help the community with innovations in various fields of agriculture."

Herminia B. Atal (Region II)

Reaping the fruit of Success

I was not able to reach my dreams and reap the fruit of my success if not because of the scholarship ATI-RTC II had granted me through EHRDP program. It is one of most valuable and precious gift I ever received.

Looking back to the years when I was a Bachelor's degree graduate upon performing my position as Agricultural Technologist, I need to bring home a lot of references whenever our farmer-clientele ask a quirky questions especially pertaining to the management of crop pests and diseases. I need to scan all of those things overnight. The next morning when the client comeback I had given him a better answer/solution or right recommendation.

I had become my habit of giving our client a turnaround time. I came to remember the simple reminder on the provision of the Civil Service rules that, "A good public servant should always be prompt in attending to the needs of his client." I need to do/explore solutions to my logjams.

I grabbed several opportunities through attending several briefings, seminars and trainings offered by different government agencies just to add or hone/improve my skills and knowledge to my field of expertise-crop science. I can still remember about 75% or majority of the events were hosted by ATI-RTC II. It boosted my confidence and developed my professionalism in mingling with my co-workers and especially stakeholders.

Times have elapse performing the day-to-day activities. I realized I need to be advanced. I should know the scientific basis of doing things and dreamed the mastery of my field of expertise. But how? Everyone knows that being a rank and file government employee earns only for daily survival and definitely could not afford to take studies again. I had not ceased praying for someone to finance my studies. I applied for the scholarship grant and was so lucky to be granted. Thanks to Dir. Asterio P. Saliot, Dir. Renato Maguigad together with other ATI staff and to almighty God for giving me the rare opportunity.

I enrolled my Master of Science in Crop Science at ISU, Echague, Isabela with unloaded burden of financially incapability. I took my studies smoothly because of constant/indescribable support ATI had provided me. I graduated Master's degree with pride and honor in which I am forever grateful to this agency.

I was so lucky and I should give back. I promised myself to serve farmer-clientele with accurate, immediate and helpful information through tireless public service. Aiming to touch their mind and heart and uplift their lives through assisting them in their noble way of living-farming.

Pat F. Dumalaon (Region X)

In pursuit towards earning a Masters Degree at first to me is just simply a dream. A dream that I've never expected to happen. For the reasons I know that it is very expensive and it requires much of my time. To me, it was really an impossible dream to achieve because I'm not financially capable and most of my time were devoted to my work and family. In short, getting a Masters Degree that time is not my priority. Despite all that, I'm was still hoping and praying that someday I would pursue my dream of earning a Masters Degree.

Just like an answered prayer, in 2009 I was granted a full scholarship for a Masters Degree under the Expanded Human Resource Development Program (EHRDP) of the Department of Agriculture – Agricultural Training Institute (DA-ATI). The scholarship grant includes a full tuition fee plus an allowance of Ten Thousand Pesos (P10, 000.00) per month as well as a thesis support of Fifty Thousand Pesos (P50, 000.00). That time, I really said to myself, God is so good and granted me this miracle. Because of that scholarship, I really know that I'm one step closer in achieving my dream.

After two years of dedication and commitment to my studies, I finally graduated with a Degree of Master in Agricultural Science and Technology Major in Crop Science at the Misamis Oriental State College of Agriculture and Technology (MOSCAT) at Poblacion, Claveria, Misamis Oriental.

Since MOSCAT is just a walking distance from my home, I made big savings in my allowance. Through time, my allowance accumulated and I decided to use it for renovating my house as a remembrance.

Up to this moment, it is still fresh in my memories that the knowledge and skills that I have acquired in my masteral years, does a good multiplier effect in my career and in my life as a whole. First and foremost, it is a vital tool for me in passing the Agriculturists Licensure Examination in 2012. Secondly, my Agriculturist license prompted my promotion to become a Municipal Agricultural Officer in March 2013. Thirdly, I became more competent and gained more expertise in my field. Fourthly, my salary doubled plus other benefits that are being given to the department head under our constitution. Lastly and most importantly, it brings me and my family closer to God.

For now, I still never stop dreaming. But this time, I'm hoping that I would finish someday my Doctorate Degree. Even though, returning to school is a challenge and the Doctorate Degree is much expensive, however, I am confident that the financial sacrifices I make now will benefit my family and my community someday especially the farmers in our municipality.

Being an EHRDP scholar has been more than a help to my endeavors. It played a big part to the success that I have achieved today. I would not have been able to realize my dreams if not for the EHRDP-ATI scholarship.

In all of this, I give thanks to our Almighty Father for all the blessings He had bestowed upon me. I would like also to express my sincerest gratitude for the opportunity granted to me by the EHRDP-ATI especially to ATI Director Asterio P. Saliot, ATI-RTC 10 OIC-Center Director Dr. Angelito Y. Quirog and Ms. Lydia A. Echavez, the Regional EHRDP Focal Person. Again, I would like to extend my heartfelt appreciation to our Municipal Mayor Redentor N. Salvaleon and to my former supervisor Dr. Crisologo G. Casiño for giving me the chance to study. Special thanks extended also to my family, professors and to all the people who were always there to support me.

Let me end my testimony from the quote of Benjamin Franklin, "An Investment in knowledge pays the best interest".

Thank you very much and God Bless!!!

Maria Lilith M. Turan (Region X)

In James 5: This verse always reminds me that knowledge, skills and intelligence are all void without wisdom. Wisdom comes from God. No matter how intelligent a person is without wisdom, it's nothing.

All praises and adoration will all be to GOD Almighty alone. Praise Him for the success that I have earned. God grant me all the privileges and the opportunities in earning an MS degree. I'm so grateful for His grace and bountiful blessings. God uses people and institutions in granting my prayers and in achieving my goals. In all things that I have achieved and received, to GOD be the Glory.

God uses the Agricultural Training institute (ATI). Through this agency, I developed and enhanced my skills in public speaking. God also uses people who are instruments and are all behind in my success: my mentors, my friends, officemates and classmates. They gave me moral support and friendship. But most of all to my family who are always with me for richer, for poorer, in sickness, or in health, when I'm in pain and in happiness.

While I was still studying for my Masteral Degree which ATI funded under its EHRDP Program, there were subjects related to my course that helped me understand more about my organization and the management. My thesis which was on values orientation of extension workers taught me more about life and made me re- evaluate my values, attitudes and behavior. Other than that, my skills in extension services were enhanced. I developed more confidence in public speaking. I also established more rapport with fellow extension workers and most of all, with the farmers. The fellowship with other co-EHRDP scholars during assessment made me become outgoing. During trainings, meetings and seminars, I also met new friends and other workers from other provinces.

Through ATI, I was able to extend my expertise during trainings and seminars as Resource Person on different topics that I am capable of, such as: Aflatoxin, Values Orientation, Palay Check, EnFFS for rice and Climate Change. I became a Resource Person of the ATI during Training Of Trainers (TOT) and also during Farmers Field Schools (FFS). I also anchored Radio Programs and hosted the School On Air program of ATI and Department of Agriculture –Regional Field Office -10 (DA-RFO 10). For now, I'm no longer hosting and anchoring radio program, but I was invited many times as guest lecturer on specialized topics.

I even extended the coverage of providing lecture on Climate Change to other provinces in region 10. I developed more sense of helping and reaching out to others and be concerned with our environment.

Because of the scholarship, I feel that it is my duty to repay the agency through my services. It made me realize that the close linkage and partnership with ATI and DA is very important in extending agricultural services to the farmers.

Because of my learned skills in delivering services, the Department of Agriculture RFO 10 also requested my expertise in providing information on Climate change and Enhanced FFS to the different provinces within region 10.

Without hypocrisy, the financial allowances I received from ATI during my scholarship, helped me very much in providing my financial obligation to my family. The extra money I received was used as other source for expenses. It helped my daughter to graduate in college.

In the side of my promotion, though I'm not still promoted, my MS degree gives me the confidence in applying for promotion because it adds credit to my qualifications.

Above all, In 2014, I received an award as an Most Outstanding DA Rice Achievers Award – Agricultural Extension Worker. My skills in making thesis helped me a lot in preparing manuscript and scrap book in joining the Rice Achievers Award. It made me so proud that for two years, our province has become an Outstanding Rice Achiever – LGU Category. Time spent, field services, hard work and cooperation, made us an outstanding province. I am so proud and so fulfilled that I have accomplished much more after my scholarship.

Ms. Maria Lilith M. Turan share her award received after the EHRDP scholarship program. Like the other experiences of the graduates, she also share that her life was uplift through the benefits gained because of the earned degree. Because of the learned experiences, knowledge and skills acquired during her thesis, she applied it when completing the needed requirement in joining the Rice Achiever Award "...I received an award as an Outstanding DA Rice Achiever Award – Agricultural Extension Worker." She was grateful and honored for the award she received. In addition to that she said, "It made me so proud that for two years, our province has become an Outstanding Rice Achiever – LGU Category."

Jocelyn O. Zarate (Region X)

First and foremost, it was a blessing in disguise because I did not ask for it but it was given to me unexpectedly. At the back of my mind, this is a break – thinking of being a student once again, I thought life would be easier then. But I was wrong. Why? I have encountered so much physical, mental and emotional stress and pressures that made me almost gave up. God is good (all the time), He made me survive all those hardships and difficulties. I can say that I have learned many things from this experience such as strive for excellence but not necessarily perfection; do more than what is expected in everything that I do; try to become an expert in time management; be open to new ideas; meet the deadlines because they are important; not to use time or words carelessly because neither can it be retrieved; give my best and after I have worked hard to get what I want, I should take the time to enjoy it.

The MPM scholarship was a tough experience with difficulties always looming ahead. Imagine those sleepless nights of finishing requirements to beat deadlines... computers bogging down at the time you need it most... the stress and "butterflies in the stomach" during presentations and defenses... myself getting sick and sometimes family members too. The lesser interaction with my little daughter really breaks my heart due to a lot of researches and paper works. I was guilty that I was not giving her enough time and at the same time worried that I can't give my kid the best of everything.

I would always cherish the thought of meeting and making new friends with my MPM classmates. By getting to know them and with them, I have learned to share knowledge especially during group study sessions, a factor for surviving the scholarship; be happy and enthusiastic about the success of your classmates; not deprive someone of hope but to keep on encouraging each other; be sincere and alert for opportunities to show praise and appreciation. It was a learning experience for all of us.

With the scholarship, I can say it was hitting two birds with one stone because it is not only for my professional advancement but as well as for my personal development. I learned to take responsibility for every area of my life and making the best out of bad situations. Mistakes are inevitable but not wasting time grieving over it but learning from them and moving on. I also learn to evaluate myself by my own standards, not someone else's. Lastly, being brave and strong even if I am not.

For the past 18 months, I will never forget the learning and my insights to... never give up on what you really want to do; not expect life to be always fair; discipline is essential to success; accept pain and disappointment as part of life; I can always depend on your family for support and encouragement; and lastly, always count your blessings.

MPM is another GOD's blessing for me... and I always count it.

Johnny V. Ramos (Region XIII)

For me, the 18 month company with fellow scholars is a sociological study in itself. One has to be flexible to the varying actions and reactions of everybody. An unstinting stamina for nocturnal internet researches and voluminous readings is also a must. It also requires versatility for one to be able to cope with the diverse behaviors as result of difference in exposures and personalities. Individual differences, however, have not hindered anyone but rather had ignited an even closure camaraderie. We have a lot of differences that's why we have a lot to share with each other. I believe there could never be the same group of scholars that exist in the whole planet than what we had in the first batch of DA-XU EHRDP MPM Scholarship.

Once again, I hope that my experience would become an authentication for all who still don't accept the fact that "poverty is not hindrance to success". And, as a public servant for five years yet, I am cognizant that there are still a lot of things I need to learn and experience. Nevertheless, of all the things in public service, the greatest fear I ever had was the fear that somebody would miss the letter "L".

Liza L. Abarido (Region X)

It was my greatest dream to be one of the EHRDP Scholars. Two years ago after attending a training seminar a good friend and a co-AEW from other municipality encouraged me to apply for EHRDP scholarship. With a very short notice I was able to comply all the necessary requirement at ATI and fortunately I qualify and was accepted.

It was a great challenge after knowing that my LGU-MAO family has no support in this endeavor and it took me sleepless nights. Series of crying, heartaches but another agency welcomed me, the ATI family. I learned that opportunities knock just once so I better grab it and never let the moment pass by.

During my graduate studies, I met new classmates (AEWs) whom I considered the person closest to me and has been my angels for fulfilling my graduate studies. They are Eutropio Gayloa (Claveria), Jessica Gonzaga (Balingasag) and Edwin Villamil (Claveria). They never left me out... instead we studied hand in hand, helping each other, facing the school examinations and defense together and graduated all together. For without them, I may not have taken the MS-Agriculture on time.

After taking up my graduate studies, I hear praises from my boss. My co-officemates confined me on how mean they were the time I beg for considerations especially on my work schedule and study leave status. Despite of failing me to avail such privileges, I still managed to perform my office duties and responsibilities 5 times a week and studied with whirlwind during Saturdays and Sundays.

With all these I come to realize that 1) rejection should never stop you, 2) failure is not a problem at all, 3) people who reject you know nothing and 4) believing in yourself is the key to success in life. There's nothing better than educating yourself to become a successful individual.

I know it is not enough to just saying thank you to ATI through the EHRDP but all my learning and of what made me now I owe it all to ATI... at the bottom of my heart a million thanks to you and I will always keep my fingers crossed to continuously support and e part of your family.

Baby Jane S. Almogela (Region X)

Being a DA-ATI EHRDP scholar is a great opportunity that us coupled with big responsibilities. One has to maintain a harder study habit, exert more effort and get out from the usual comfort zone in life.

The blessings of the EHRDP scholarship paved way to my long-time desire to take up a masteral course related to my field work which will help me to be effective and efficient public servant and agricultural extension worker. Last 2008, I had the chance to know the program thru Ms. Jonah Bianito of Provincial Veterinary Office-Lanao del Norte. She then encouraged me to communicate with Mrs. Sonia Talibong who was the program in-charge at that time.

Interested and very willing to apply, I proceeded to complying the required documents and necessary attachments. But after 2 months of waiting, I became pregnant of my first child. Due to my delicate pregnancy, I did not push through my application. But, the opportunity knocked again my door because two months after giving birth, Dr. Edna M. Mabeza, ATI-RTC X Center Director, called up asking if I am still interested to pursue my scholarship application. Of course, I assured the Center Director that I will really pursue it.

The scholarship program contributed much to my character, knowledge and experience. It gave me the opportunity to acquaint, mingle and relate to co-workers and practitioners of Agriculture. Moreover, the scholarship program encouraged me all the more to be more efficient and effective agricultural extension workers so that I can contribute both to agricultural productivity and environment conservation through the knowledge and experience we earn out of the study. Thanks to God who give me strength and determination and the family of ATI who approved my application. Thanks to EHRDP!

The Expanded Human Resource Development Program (EHRDP) of ATI was an instrument for me to develop my technical working skills. This is manifested in me because praise be to God, I passed the licensure examination for agriculturist last 2013. In addition to that, I was promoted as agriculturist II last December 2013. This is a blessing for me to support my family needs and to continue to improve myself and serve more the municipality that was torn by war but now is striving to leap towards sustainable development.

The two-year scholarship program enhanced my knowledge and skills in agriculture and improved my passion in the delivery of services to the municipal agriculture office, to the entire local government and the municipality. Years after I graduated from my masteral degree, there had been lots of milestones in the municipality which I am proud to say I was partaker. Last year, we won the National Organic Agriculture Achievers Award for LGU Category and we made it to the Top 10 of the Gawad Galing Pook Awards for the "Arms to Farms-Walking through the Paths of Peace" Program, which is jointly worked on by the ATI, Armed Forces of the Philippines and the local government of Kauswagan. In addition to that, we were also awarded as second place for the Literacy Award Category B Municipality. All of these awards are all signs that we have exerted effort in running the race for development in Kauswagan, making it true to its name.

Personally, all these milestone pushed me to do better in my services. I strive hard to deliver efficiently and effectively the tasks that are delegated to me. I am presently assigned to handle special projects in the municipality. I also served as registrar and mentor to the School for Practical agriculture which is presently offering the scholarship program of ATI-FPD-LGU Kauswagan partnership. Its good thing that I am also able to impart to the students of this scholarship program the basic work values and ethics which are very vital in realizing their dreams and ambitions and in practicing and internalizing the need for co-existence in the community since the students are Maranaos and Bisaya and the influence them to love agriculture.

With regards to my thesis in MS Farming Systems, the results were used during trainings as proof and convincing tool to the farmers that intercropping is better than monocropping and that there is a need for them to select the right organic fertilizer that will give them optimum income. Since I am also handling peanut production in Kauswagan, my thesis is very useful for me every time we conduct orientation, meetings and trainings, in fact, there is expansion of areas devoted to peanuts and corn. Some farmers are convinced to intercrop peanut in corn production under coconut. We also strengthen marketing aspects in our municipality.

As time goes by, the lessons I learned will always be with me and this will radiate from me and influence people surrounding me who will also help in realizing our goal in Kauswagan.
